A **BIG** difference in lift trucks is the Engine

Allis-Chalmers lift trucks
are powered by
Allis-Chalmers engines with
world-wide reputation...

for reliability

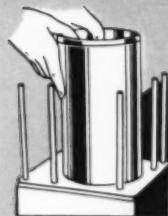

There's plenty of strength in an Allis-Chalmers engine—from heavy-duty block to rugged crankshaft and connecting rods.

Cooling is more complete; temperatures more evenly maintained due to valve-in-head design.

for easy maintenance

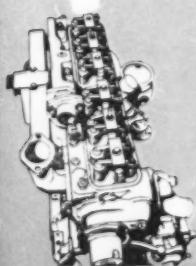

No reboring necessary, no need for oversize rings, with wet sleeve cylinder liners that are easily replaced.

for performance

GRADE CLIMBING ABILITY (popular size truck)

There's high torque at normal engine speeds with Allis-Chalmers engines—extra grade-climbing ability, extra usable horsepower.

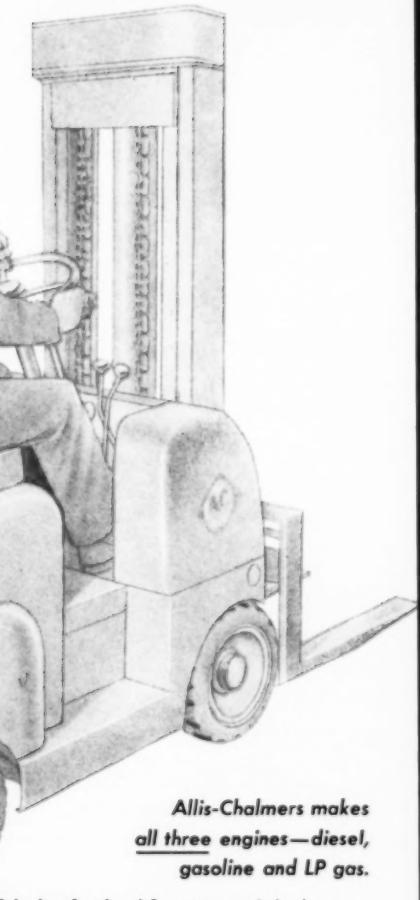

Greater efficiency, increased power, easier servicing results from the use of overhead valves.

Engine is fully accessible and so simple to repair that it can be completely overhauled without removal from truck.

Simplified design of engine means no complicated or unfamiliar parts to contend with.

Allis-Chalmers makes
all three engines—diesel,
gasoline and LP gas.

This is the inside story of the heavy-duty engines made by Allis-Chalmers specifically for Allis-Chalmers fork lift trucks.

The fact that they are the most rugged used in lift trucks means thousands of extra work hours. The fact that they deliver more *usable* horsepower means they do extra work every hour.

Send for literature telling you more about this power that makes the big difference in lift trucks, or see your Allis-Chalmers material handling dealer.

OCTOBER 1957

Why Risk Accidents with Your Industrial Trucks?

Plant accidents can cost you plenty. But *electric* industrial trucks can help eliminate the risk of three kinds of serious accidents—and save you money at the same time.

Fume free. Especially indoors, you must guard against air pollution. Fumes make personnel uncomfortable. And they can be fatal, even in low concentrations. But with electric industrial trucks you are free of this hazard. They're safe even in small rooms, in unventilated rooms, and in rooms with large numbers of people.

No fuel storage problem. You buy your electric power as you use it—from your local electric company—and at low rates that have been declining for years. Heavy duty storage batteries furnish dependable power throughout their long life. And you are relieved of the need to store liquid or gas fuel. Providing safe areas, handling the fuel daily to fill truck tanks—these difficulties are eliminated. And there's little danger of the truck itself catching on fire.

Cleaner floors. Your personnel are far safer against the danger of slipping on oil or grease spots. Electric industrial trucks have no messy crankcases—the battery power plant has no moving parts to lubricate. They run clean, keep your plant clean.

Why take chances? Besides increasing your plant safety, electric industrial trucks last longer, cost less to operate and less to maintain—savings that add up to an average of \$1000 per year per truck.

These are important considerations for up-to-date management men today. Have a talk with your nearby industrial truck dealer or salesman. He's listed in your classified telephone directory under "Trucks—industrial."

This message is presented as a service to industry by Exide Industrial Division, The Electric Storage Battery Company, Phila. 2, Pa.

New diesel-powered **INTERNATIONAL** tractors are offered in three models—one single axle and two tandem axle—each with four wheelbases. GCW—68,000 to 76,000 lbs.

Cost records prove **International Trucks**

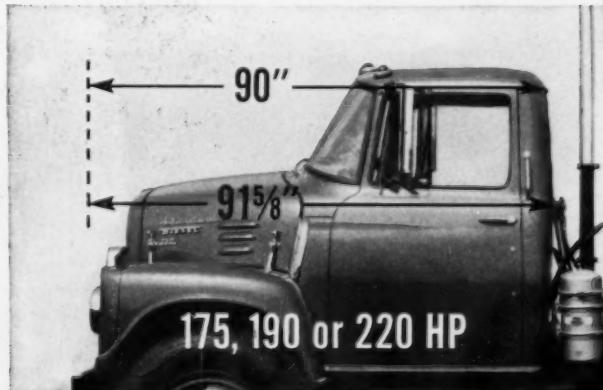

NEW! Short 90-inch BBC dimension

NEW! Heavy-duty diesel power

NEW! Low purchase price

in these

INTERNATIONAL TRUCKS

Choice of three big diesel engines—175, 190 or 220 hp. to performance-match your job exactly.

Bumper-to-back-of-cab dimension is only 90-91 $\frac{5}{8}$ inches and bumper-to-front-axle only 26 inches to haul biggest payloads under overall length and bridge formula restrictions.

Here's the *complete* answer to the demands of every highway hauler who wants heavy-duty diesel power—new INTERNATIONAL truck-tractors with up to 220 hp. for top performance anywhere, short 90-91 $\frac{5}{8}$ -inch bumper-to-back-of-cab dimension for top payloads everywhere. And, they are priced right down with the lowest!

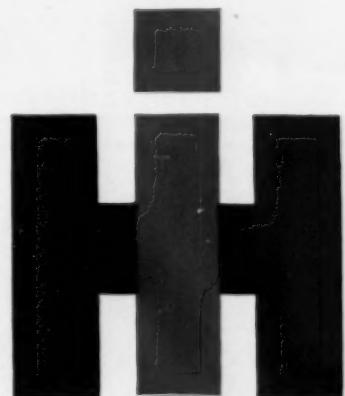

You can pull bigger payloads, coast to coast or city to city, re-

gardless of terrain or state restrictions. For example, you can haul 35-foot square front trailers in 45-foot states or 40-foot square front trailers in 50-foot states. You can standardize your fleet with one type and one make truck and still use your present trailer equipment.

For more information on these models AC-225-D, ACF-195-D and ACF-205-D, ask your INTERNATIONAL Dealer or Branch now.

Top of engine and entire left (accessory) side are open for convenient service when insulated engine cover is removed. Access to front of engine is through wide opening hood. Right side of instrument panel is easily removed for increased working area.

NEW YALE G-3

CAPACITIES: 15,000 – 20,000 LBS.

SERIES

the only high-capacity gas trucks with all three features you need for fast, safe handling of **BIG LOADS**

300% MORE VISIBILITY. "Wide-Angle Vision"—a Yale exclusive! Upright channels are wide-spaced and nested. Hoisting cylinders and lifting chains are right next to channels to reduce frontal obstruction. Fork carriage has only one top, one bottom bar for extra forward visibility at all levels of fork lift. Unique open front design plus high center position of driver provide a wide arc of vision—maximum visibility forward and to the rear for fast, safe handling of heavy loads.

GREATER STABILITY. You get maximum stability under capacity-load conditions—even over soft or bumpy terrain. Center of gravity is low. Underclearance is high. Large, high-flotation tires give plenty of traction. Articulated steering axle, rugged wide-spaced upright design, side-thrust rollers keep loads steady at all points of lift, minimize weaving.

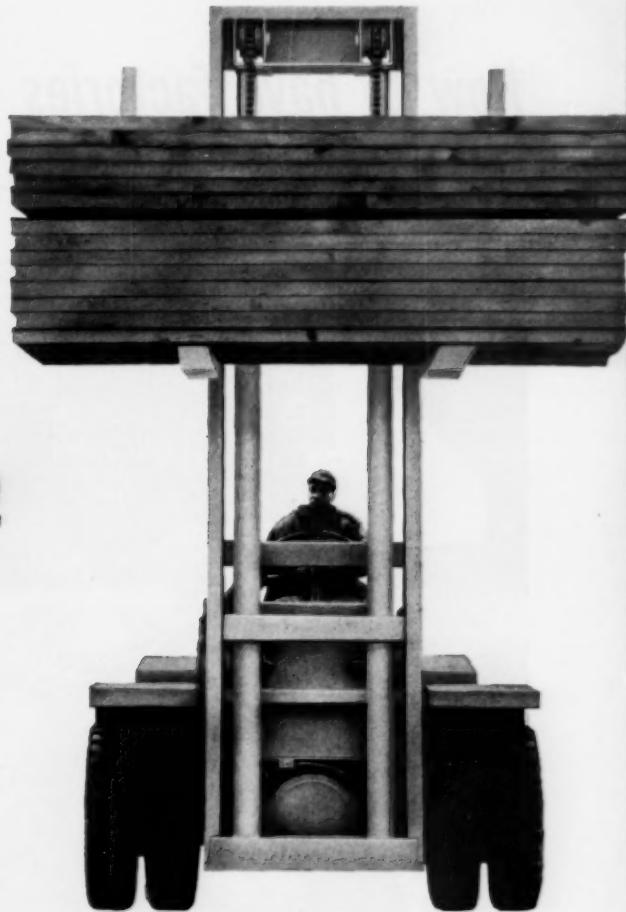

EXTRA MANEUVERABILITY. Short overall length plus 75-degree steer-wheel angularity mean extra-tight turning radius—high maneuverability. Power steering helps driver to move in and out of tight areas fast. For fast cycle operations, these new Yale trucks feature lifting speeds up to 60 feet per minute... fast, controlled lowering...travel speeds up to 20 MPH.

New G-3 Series Gas Trucks Have Famous Yale Quality—Premium Engineering Features Included as Standard:

- **For extra strength:** All welded steel frame. H-beam members in frame. Rugged channel construction.
- **For driving comfort:** Hoist, tilt, attachment and gearshift controls are grouped for easy-reach, right-hand operation. Directional control on steering column.
- **For maximum safety:** Power brakes. Anti-cavitation valve in tilt cylinders prevents hydraulic voids, stabilizes channels.
- **For easy maintenance:** Hinged hood and removable covers give easy access to engine and all other operating units.
- **For smooth lifting action:** Channels and carriage are mounted on roller bearings with side-thrust rollers. Lifting cylinders are ball mounted.
- **Your choice of Fluid Coupling or standard transmission.** Gasoline or LP-Gas powered models. Wide range of attachments—all engineered for a minimum loss distance.

How to have factories in every city... ship United!

Electric motors being loaded aboard DC-6A Cargoliner are checked by United's W. S. Emrich and Reuland's W. L. Johnson (right).

Reuland Electric Co. makes electric motors, many on special order. Reuland's reputation for prompt delivery is known coast to coast. "Our customers couldn't get better service if we had factories in every city," says Reuland's Western Div. Sales Manager, W. L. Johnson. "As it is, the motors are made to order here in Alhambra, California, shipped overnight by United Air Freight."

Examples of United's low Air Freight rates

	per 100 pounds*
CHICAGO to CLEVELAND	\$4.78
NEW YORK to DETROIT	\$5.90
DENVER to OMAHA	\$6.42
SEATTLE to LOS ANGELES	\$9.80
PHILADELPHIA to PORTLAND	\$24.15
SAN FRANCISCO to BOSTON	\$27.00

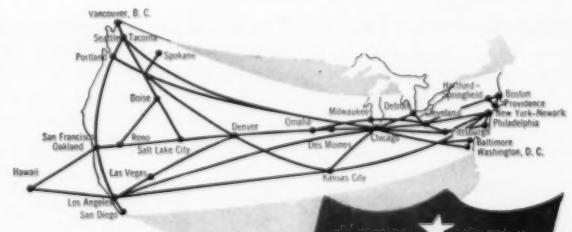

*These are the rates for many commodities. They are often lower for larger shipments. Rates shown are for information only, are subject to change, and do not include the 3% federal tax on domestic shipments.

Door-to-door service

SHIP FAST...SHIP SURE...SHIP EASY

For service, information, or free Air Freight booklet, call the nearest United Air Lines Representative or write Cargo Sales Division, United Air Lines, 36 South Wabash Avenue, Chicago 3, Illinois.

Shipping United has important competitive advantages for companies like Reuland: wider markets, lower inventory, savings in packaging and insurance. Plus guaranteed space dependability (Reserved Air Freight), door-to-door service, modern cargo handling procedures, round-the-clock flights featuring the world's fastest passenger and all-cargo planes. Ship United!

NEWS

Seaway Toll Problems Studied At Public Conferences

Methods of establishing and collecting tolls on the St. Lawrence Seaway were discussed last month at public conferences in Washington and Chicago. The open meetings were conducted by the St. Lawrence Seaway Development Corp.

The conferences served as preliminary airings of toll problems. Actual toll rates will be studied at later hearings. Most speakers at the Washington conference suggested that the toll schedule should be "fair and equitable," but that the Seaway should be made self-supporting as soon as possible through a realistic toll system. In Chicago, however, the sentiment was reversed, with speakers calling for lower tolls and possible government subsidies.

The most popular method of assessing tolls seemed to be a system calling for a nominal toll charge based on registered tonnage, with the major charge being levied on cargo. A lower toll was suggested for bulk items, with a higher toll on general cargo.

In addition to representatives from the Development Corp. and its Canadian counterpart, participants included representatives from competing modes of carriage, port cities, and user associations.

—DA—

Organization of its 22nd chapter, the Central California Division, has been announced by the Society of Industrial Packaging and Materials Handling Engineers.

New Concepts in Transportation Theme of ATC's 34th Annual Meeting Sept. 29-Oct. 2

New Concepts in Transportation is the theme of the 34th Annual Meeting of the Associated Traffic Clubs of America. The meeting was called for Sept. 29-Oct. 2, in Dallas, Texas.

The meeting was scheduled to open with a Board of Directors gathering

on the evening of Sept. 29. The business program opened the following morning with a Council of Club Presidents. R. J. Andress, of Service Pipe Line Co., Tulsa, Okla., was listed as luncheon speaker the first day. A Traffic Club Clinic, with Executive Vice President L. E. Galaspie presiding, was scheduled for the first afternoon.

Tuesday's program called for committee reports and an address by George P. Baker, professor of transportation at the Harvard Graduate School of Business Administration. The afternoon program called for additional committee and officers' reports and the election of officers. Congressman Oren Harris, of Arkansas, was scheduled as principal speaker at the Annual Dinner Tuesday evening.

—DA—

American Trucking Assn. To Meet in Chicago

Registration for the 24th Convention of American Trucking Associations, to be held in Chicago Oct. 6-11 has reached capacity. Dovetailed with the six-day meeting of trucking industry executives is the 1957 ATA National Truck Roadeo.

Managers of the state trucking associations affiliated with ATA will have a pre-convention meeting and reception Oct. 5, at the Conrad Hilton Hotel, headquarters for the ATA sessions.

The first formal meeting of this year's convention will be an Executive Committee session at 1 pm Oct. 6. Later, at 6:30 pm, the traditional Annual Dinner honoring presidents of the state associations will be held.

Officers for the new year will be elected at a Board of Directors meeting Friday morning. The convention will be concluded by a meeting of the new Executive Committee.

Fibre Box Association Announces Annual Meeting

The 18th Annual Meeting of the Fibre Box Association will be held at the Sheraton-Park Hotel, in Washington, Oct. 17-18. 'New Directions in Packaging' will be the theme. One of the features of the program will be the presentation of awards to winners of the Fourth Annual Fibre Box Competition. All entries in the Competition will be displayed at the meeting.

Chuting the News . . .

(Continued from Preceding Page)

American Society of Traffic & Transportation Conducts Fourth Conference and Seminar

Emphasis on traffic and transportation as a profession highlighted the Fourth Transportation Conference and Seminar, in Atlanta, Ga., last month. The meeting was conducted Sept. 12-13 by the American Society of Traffic and Transportation.

Frederick A. Doeber, Citizens Gas & Coke Utility, Indianapolis, Ind., was re-elected president of the Society. Francis P. Ryan, Eastman Kodak Co., was elected registrar. He succeeds E. H. Breisacher, Philadelphia agent for the Northern Pacific Railway Co., who had served in that office since the Society's inception. Louis A. Schwartz, of the New Orleans Traffic and Transportation Bureau, was elected a director.

Other officers re-elected were: Albert P. Heiner, Kaiser Steel Corp., executive vice president; K. H. Jamieson, Eastman Kodak Co., vice president and director of public relations; F. J. Ryan, Helms Express, vice president; Herschel Hollopeter, secretary-treasurer; Virgil D. Cover, Syracuse University, director of education, and Freeman Bradford, Indianapolis Board of Trade, general counsel. C. J. Goodyear, of the National Coal Association, is chairman of the Board of Directors.

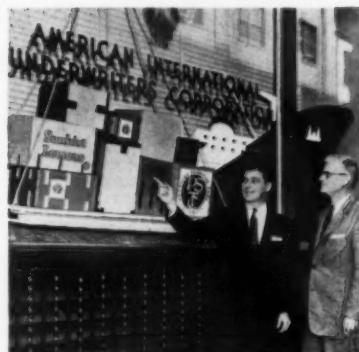

The Society voted to include a new class of members, to be known as contributors. The new class will include corporations and firms, as well as individuals. This move brings to three the types of AST&T members — Members, Founders, and Contributors.

Guest speakers included Robert S. Lynch, chairman of the Board of Atlantic Steel Co., Atlanta; ICC Commissioner Rupert L. Murphy; and Hugh W. Comer, Board chairman, Avondale Cotton Mills, Sylacauga, Ala.

—DA—

The Industrial Bag and Cover Association, meeting recently in Santa Barbara, Calif., re-elected President Harry M. Hanson, Vice President A. A. Abramson, and Administrative Officer Philip O. Deitsch.

Shipping Display

Some of the latest methods of protecting export shipping from damage and loss are on display at the American International Building, in New York. The Pressure Sensitive Tape Council, in cooperation with American International Underwriters, has installed a display in the AIU headquarters building. It illustrates the packaging, sealing, bundling, and reinforcing uses of pressure sensitive adhesive tapes for export packaging. Here, David W. Stewart, II, assistant to the president of AIU, points out a model pallet loaded with cartons sealed with pressure sensitive tape to William Boland, president of the PSTC.

NTLS Reports Long Term Leasing Up, Daily Down

Members of the National Truck Leasing System, at the NTLS 13th Annual Meeting in Chicago last month, reported that long term leasing of trucks is up 20 per cent over last year. At the same time it was reported that daily rentals are down, and fluctuating with business conditions generally.

The recent ICC regulation banning trip leasing seems to have encouraged day-to-day activity, however. Additional member reports indicated that, although volume is up, profits are down. Smaller profits were attributed to higher operating costs. Other subjects discussed included costs, maintenance, paperwork, and legislation.

—DA—

Glen Minear, general traffic manager of the Maytag Co., was named chairman of the Board of Directors of the Iowa Industrial Traffic League at that group's Annual Meeting in Cedar Rapids last month. New president is Paul Gans, Deere & Co., Moline, Ill.

—DA—

Rail Association to Receive Franklin Institute Award

The Association of American Railroads on Oct. 16 will receive the George R. Henderson Medal. The medal is an annual award presented by the Franklin Institute of the State of Pennsylvania. The AAR will receive the award "in recognition of the many achievements of its Mechanical and Engineering Divisions in the many fields of railroad engineering."

Pan-Atlantic Schedules Four-Port Sea-Land Service

Sailing of the "S.S. Gateway City" from Port Newark on Oct. 4 will inaugurate Pan-Atlantic Steamship Corp.'s expanded Sea-Land Service between four Atlantic and Gulf Ports.

Pan-Atlantic, has been operating "lift-on, lift-off" transportation of loaded truck trailers by water service since last year between New York and Houston. The "Gateway City," first of ten C-2 cargo ships being converted for this purpose, will serve the ports of Miami and Tampa as well.

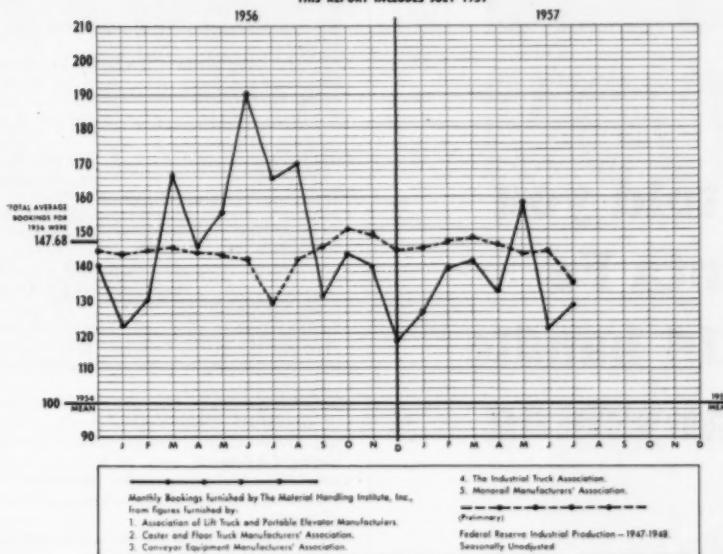

The company is planning to extend the operation to other coastal cities and increase the number of sailings as more Trailerships are converted.

—DA—

S. F. Allison of Ohio Box-board Company's Container Division, was re-elected to the Board of Directors of the Fibre Box Association.

MONTHLY BOOKINGS INDEX REPORTED BY THE MATERIAL HANDLING INSTITUTE, INC.

THIS REPORT INCLUDES JULY 1957

While the seasonally unadjusted Federal Reserve Industrial Production Index dropped for July, the month's bookings reported by materials handling equipment manufacturers showed a sharp increase over the dollar volume of orders received in June. This comparison is noted in the Monthly Bookings Index of The Material Handling Institute, Inc.

Industrial Packaging and Handling Exposition

Packaging and handling in physical distribution, including transportation and warehousing, will be stressed at the National Industrial Packaging and Handling Exposition of 1957. The Exposition, sponsored by the Society of Industrial Packaging and Materials Handling Engineers, is scheduled for Oct. 28-31 in Atlantic City's Convention Hall.

Running concurrently with the Exposition will be the 12th National Competition in Industrial Packaging and Materials Handling, and the 1957 SIPMHE Packaging and Materials Handling Short Course. This year's Short Course is being co-sponsored and directed by Temple University.

Eighteen educational sessions are included on the Short Course program. The sessions will open Monday, Oct. 28, at 9 a.m. Supplemental sessions will start at the same hour on the two following days. Each session will run from 9 to 11 a.m. They then will be repeated from 11:15 to 1:15 p.m. Some of the country's leading experts in the field of packaging and handling are scheduled to speak.

Free Dunnage Allowance Increased by Railroads

R. E. Boyle, Jr., chairman of the Southern Classification Committee, advises that the three classification committees have decided to amend Rule 30 UFC 4 and CFC 21 to increase the present 500 lb free dunnage allowance to not exceeding 2,000 lb. This was proposed in Subject 59, Joint Docket No. 181 of July, 1957. Publication is being withheld to allow carriers to review their Exceptions and Commodity Tariffs so that any desirable changes may be made effective at the same time the Classification Rule is amended.

U. S. Men Win Five Awards At Pan-Am Rail Congress

United States men won five of the 15 cash prizes for the best technical papers presented to the recent Ninth Pan American Railway Congress in Buenos Aires.

For their papers on legislation, personnel and general subjects, Anthony Arpaia, of Washington, D. C., a member of the ICC, received the United States award for his contribution on "The Philosophy of Transportation." Howard E. Simpson, of Baltimore, Md., president of the Baltimore and Ohio Railroad, was given the second Argentine prize for his work entitled "Training and Selection of Railway Personnel."

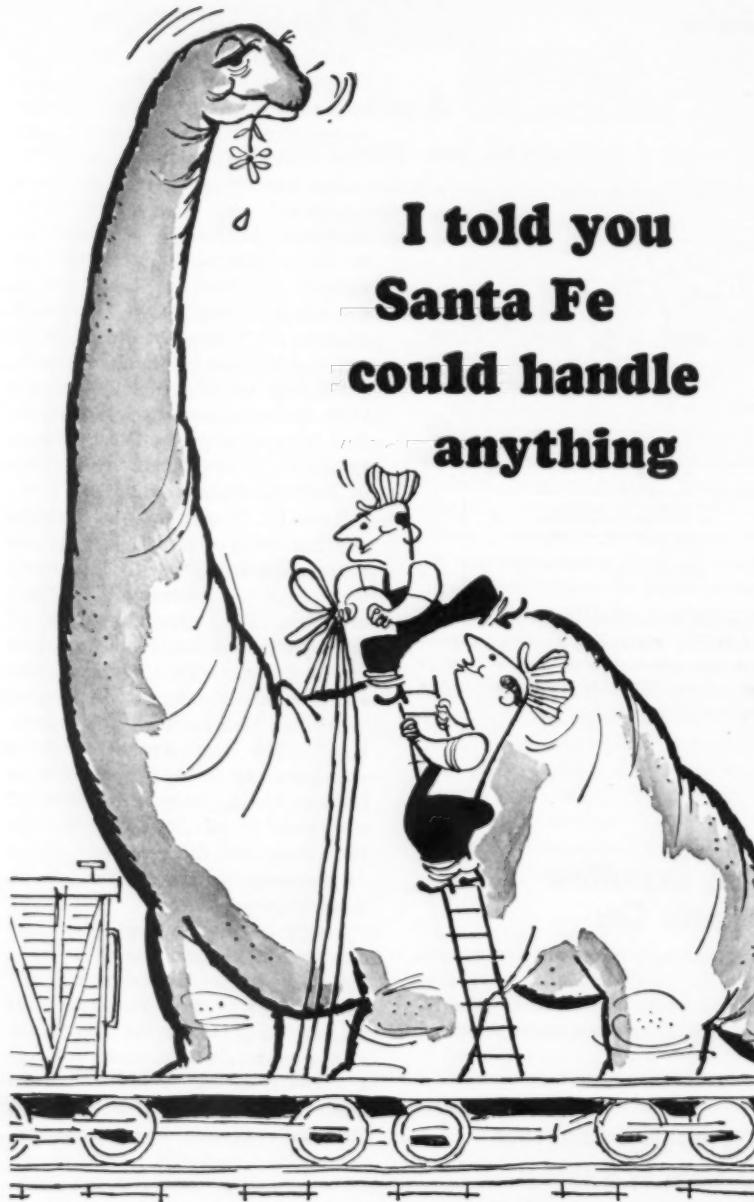

Two U. S. papers on subjects dealing with railroad operations received prizes. The U. S. award went to A. J. Greenough, of Philadelphia, Pa., vice president of transportation and maintenance of the Pennsylvania Railroad, for his presentation on "Reduction of Terminal Delays in Train Operation." The first Argentine prize was given to J. M. Finch, of New Haven, Conn., superintendent of car service of the New Haven Railroad, for his paper entitled "Arrangement and Control in Yard Operation."

Lloyd J. Kiernan, of Washington, D. C., former executive vice president of the Boston and Maine Railroad, was awarded the first Argentine prize in the equipment and power classification for his contribution on "Application of Modern Scientific Research on Railroads of the United States."

**American Management Assn.
Plans Traffic Seminar**

A split six-day workshop seminar on the problems of administering the traffic function has been scheduled in New York by the American Management Association. Sessions will be conducted in the Hotel Sheraton-Astor Sept. 30-Oct. 3 and Nov. 11-13. Some 15 well known industrial traffic managers will present their views on all phases of traffic management.

a useful
guide to
framing
ideas

ACME
STEEL Dexion Slotted Angle used for roller flow rack in shipping room.

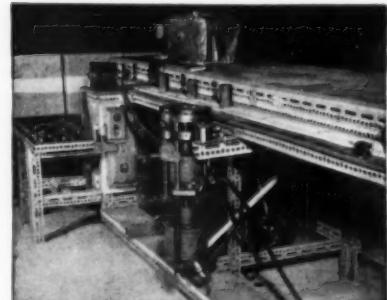

**Reduce Installation costs
frame with**

**ACME
STEEL Dexion Slotted Angle**

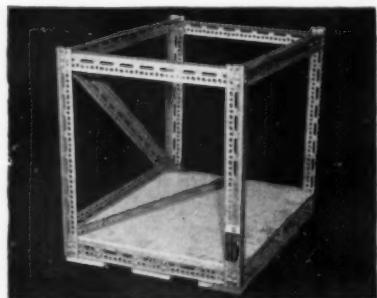

For all installation needs, Acme Steel Dexion Slotted Angle has proved to be the fastest, most convenient framing material available. Dexion Slotted Angle assembles rapidly, easily and always has a slot or hole available for bolts or studs, even for the multiple mounting of components such as those with electrical installations. You can save hours on one installation!

Acme Steel Dexion projects are started and completed—measured, cut and bolted—right at the job site. Embossings spaced every 3 inches simplify measuring, a portable Dexion Cutter shears squarely and cleanly with a single stroke and one wrench tightens all bolts to make strong, permanent frames for any purpose. No drilling or welding, ever.

Cold rolled, galvanized steel Dexion Slotted Angle supports many hundreds of pounds; is available in regular or heavy-duty gauge. Acme Steel Dexion Slotted Angle comes in 10 or 12-foot lengths, ten to a package, with 75 nuts and bolts included. For better Ideas using the simplicity and usefulness of Dexion, write for a free copy of the "Dexion Construction Guide" to Dept. DBD-107, Acme Steel Company, Chicago 27, Illinois.

ACME
STEEL Dexion Slotted Angle frames and supports conveyorized assembly tables.

Legislative Line-Up

Following is a summary of legislation enacted into law by the first session of the 85th Congress.

RATES AND CHARGES—Public Law 124 amends Section 218(a) of the Interstate Commerce Act to require contract carriers by motor vehicle to file with the ICC their actual rates or charges for services.

FREIGHT FORWARDERS—Public Law 176 amends Section 410 of the Act to require freight forwarders to obtain certificates of public convenience and necessity.

CONTRACT CARRIERS—Public Law 163 revises the definition of contract carriers by motor vehicle as set forth in Section 203(a) (15) of the Act. (Carriers have until Oct. 23 to file verified statements to determine which might continue as contract carriers.)

SECTION 22—Public Law 246 amends Section 22 of the Act (see complete story on page 118.)

CARRIER VIOLATIONS—Public Law 135 provides more adequate and realistic penalties for violations of certain statutes administered by the ICC.

REORGANIZATION—Public Law 286 extends the termination date for submission of reorganization plans to Congress to June 1, 1959.

AIR CARRIER AID—Public Law 307 authorizes the government to guarantee private loans to air carriers in the United States, Alaska, and Hawaii for the purpose of aircraft and equipment.

Following is a brief summary of the status of other legislation as the first half of the 85th Congress was brought to a close.

FOREIGN FREIGHT FORWARDERS—Pending action by the House Merchant Marine Committee is HR 479, dealing with foreign freight forwarders.

GOVERNMENT COMPETITION—HR 1975, to establish a federal policy on government competition with private business, awaits action in 1958 by a House Government Operations subcommittee.

HIGHWAY BUILDING—Hearings on forest access roads are tentatively set for November by the Gore subcommittee, Senate Public Works Committee. No substantive action on highway construction is scheduled by Congress before next year.

MINIMUM WAGES—Senate Labor Committee has S 1853, the minimum wage law extension bill, in a pending status. House Labor Committee intends to start a series of minimum wage hearings in the Far West at the end of October.

TERMINAL TRAFFIC—House Merchant Marine Committee plans no action until next year on HR 2229. The bill would channel more government freight through commercial marine terminals.

TRANSPORTATION OF EXPLOSIVES—S 1491, to revise the Transportation of Explosives Act, awaits approval by the House Commerce Committee.

News Briefs

Clark Equipment Co., Battle Creek, Mich., has announced that it has acquired interests in two foreign fork truck manufacturing firms. The firms are I.T.D. Ltd., in Britain, and Ruhr Intrans Hupstapler, G.m.b.H., in Germany. The German firm had been producing Clark trucks under license since 1952.

Fifteen executives of transportation companies and transportation officers in the armed forces were graduated from the first short course for transportation executives given by the Transportation Center at Northwestern University on Aug. 30.

The Traffic Managers Institute will be known as the **TMI School of Transportation** according to an announcement by school officials.

Gould-National Batteries, Inc., has announced that a wholly-owned subsidiary of the company has purchased the assets of the **Nickel Cadmium Battery Corp.** of Easthampton, Mass.

The increased flow of freight traffic between the United States and Mexico has brought about formation of a new firm. The firm is **International Freight Service, Inc.**, an association of American carriers which is soliciting orders for movement of fast truck freight from any point in the United States to any point in Mexico and vice versa.

The Colson Corp., Elyria, Ohio, has been approved for membership in **The Material Handling Institute**.

A new division created to undertake basic research on storage batteries has been established by **C & D Batteries, Inc.** The new division will be headed by Dr. Eugene Willihnganz.

The official beginning of events marking the 25th Anniversary of **Spector-Mid-States** was celebrated last month at Genoa, Wis., at a special three-day management meeting of the motor carriers' top executives. Announcement of the special anniversary celebration program was made at a dinner meeting.

The first non-stop service linking New York and Curacao, will be inaugurated Oct. 11 by **KLM Royal Dutch Airlines**. KLM now unites 23 cities with 10,000 miles of air routes in the Caribbean, Central and South America.

A new training course designed to promote a comprehensive understanding of the important basic principles of contractor-government relationships is being offered by **Container Laboratories, Inc.**, at its Washington Division offices. Known as the **Management Aspects of Government Packaging**, the five-day course is being conducted every other week.

The 30th anniversary of coast-to-coast airline service was observed in September by **United Air Lines**, whose predecessor companies were the first to span the continent.

(Please Turn to Page 118)

A single truck with dual performance

Now for the first time, a single truck meets any terrain condition. On paved surfaces, the *Clarklift CY 40*, with *single standard tires*, is fast and maneuverable. Now change to *dual wide-profile tires*. This same truck now operates over mud or rough terrain with powerful traction, high stability and flotation.

As standard equipment, there's fingertip-control power shifting, and a creeper range for rough ground and steep grades. Power steering insures matchless handling ease. Even weight distribution means positive traction and gradeability.

This new 4000-lb *Clarklift* sets a new pace, regardless of conditions. Try a demonstration on your own property. Your *Clark* dealer will arrange it. He's listed in the Yellow Pages.

KATZ DRUG COMPANY

Kansas City, Mo.

A Typical Katz Store

Katz Warehouse, North Kansas City

**SAVES
\$5,000
A YEAR**

Our warehouse is equipped with both ADT Burglar Alarm and Sprinkler Supervisory and Waterflow Alarm Services. Likewise our thirty-eight stores in Midwestern cities have ADT Automatic Protection, which we consider far superior to watchmen. Estimated savings in warehouse protection are calculated at \$5,000 a year.

Senior Vice President and Asst. General Manager

Public warehouses from coast to coast, protected **automatically** by ADT, set the standard for thousands of private warehouses containing goods which must be adequately safeguarded against burglary, fire and other hazards.

Typical of these is the warehouse of Katz Drug Company, in North Kansas City, Mo. Senior Vice President Blond's letter, reproduced above, indicates how this firm, like thousands of others, gets greater security for property, profits and employees' jobs, than can be obtained by other methods, and **at less expense**.

May we show you what ADT can do for you?

Whether your premises are old or new, sprinklered or unsprinklered, an ADT specialist will show you how combinations of automatic services can safeguard your property. Call our local sales office; or write to our Executive Office.

Like having four trucks instead of one

There are four combinations of same-size drive and steer tires that make this *Clarklift CY 40* the most versatile truck you can buy. Think of it—it's like having four trucks instead of one. Each set of tires fits a different job.

Dual wide-profile tires (shown above) at 30 pounds pressure give extra traction. *Single wide-profile tires* apply when overall machine width is limited. *Dual standard* and *single standard* tires apply on firmer surfaces.

Each tire combination mounts without machine modifications, thus change-outs are readily made according to the job. Clark alone offers the new high flotation wide-profile tires as standard equipment. Ask your Clark dealer about them and the new *Clarklift CY 40*, the truck that's really four trucks in one.

WASHINGTON

By Ray M. Stroupe, *Chilton Washington News Bureau*

LAW CHECKS FORWARDERS — Freight forwarder operating permits may become more difficult to get because of new Public Law 176. With one major exception, it will let ICC deny a request for a permit if shippers in the applicant's area have adequate service. That exception relates to applicants under railroad control. ICC regards this omission as unduly advantageous to the railroad-backed applicants.

SEAWAY FIGHT OPENS — Foes of token toll rates for the St. Lawrence Seaway have become highly vocal. A National Committee for a Nonsubsidized Seaway, representing Atlantic and Gulf Coast port and business interests, is formed to demand adequate rates. The committee is charged by Sen. Potter, R., Mich., with trying to force rates so high as to create a burden on users. Seaway officials promise tolls at a rate that will pay for the project.

DELAY CARRIER RULES — Effective date of the new rules for household goods transportation is postponed again by the ICC. Rules governing motor common carrier movement of the goods were to be in force last June, but the date was changed to Sept. 1. Now ICC sets Nov. 1 as the effective date. Delay is permitted, ICC explains, to give some of the carriers more time to revise their methods in keeping with the changed requirements.

PACKAGING AND HANDLING SYMPOSIUM — Latest developments in packaging and materials handling were to be shown to some 800 persons at Fort Lee, Va., this month. The occasion was the third Joint Military-Industry Packaging and Materials Handling Symposium, opening Oct. 1. Attendees were to be about 60 per cent from industry and 40 per cent from the government. Army was the sponsor, in cooperation with Navy, Air Force, Commerce Dept., and National Security Industrial Assn.

TAKE TRAFFIC POSTS — Top management jobs in the Military Traffic Management Agency are newly filled by three civilians. G. B. Randolph is executive officer; John E. Roberts, Jr., is deputy director of services; and James J. Gianfagna is deputy director of traffic. Mr. Randolph formerly was deputy assistant Chief of Transportation (Traffic) for the Army. His colleagues have served with the Navy Bureau of Supplies and Accounts.

RAILROADS URGE UNVARIED TIME — Food for congressional thought in 1958 lies in the railroads' request for a law making time uniform. Time differences within a single time belt are very costly, the Assn. of American Railroads testifies. Railroads reportedly must spend nearly \$1 million a year on timetable and schedule changes. AAR takes no stand on daylight saving time, but it asks the establishment of time that will hold for all purposes.

CHANGE TRUCK RATES — Motor carriers hauling freight into and out of the Seattle-Tacoma, Wash., area are told by the ICC to refile their rate schedules. ICC gives the truckers until Oct. 23 to stop using existing rates. The agency, investigating fees for that region, finds evidence that they give undue preference to shippers in the Portland-Vancouver area. ICC decides to make a test of the revenue results of altered rates.

SMALL BUSINESS AID — Small firms will continue to draw aid from the Small Business Administration until at least mid-1958. SBA, given another year of life by Congress, also has a larger revolving loan fund.

COAL EXPORTS RISE — Coal cargoes shipped from the U. S. this year are shaping up as substantially larger than the 51 million-plus tons exported in 1956. Latest forecasts in Washington indicate a 1957 total of nearly 61 million tons. This figure is exclusive of 22 to 23 million tons bound for Canada. Coal buying in the export market has advanced since early September.

WILL DROP STORAGE — Cutbacks in Army installations this year and next are to affect a number of storage facilities. Curtis Bay Storage Activity, Baltimore, is to be halted next Dec. 31. Delaware Storage Activity, Pedricktown, N. J., is scheduled to close on May 30, 1958. Camp Stanley, Tex., Storage Activity is listed for closing on Nov. 30, 1958. Each of these employs more than 200 persons.

SHIPBUILDING PACE QUICKENS — Maritime Administrator C. G. Morse sees prospects of the delivery of 47 new ships a year by 1961. In that year, he predicts, the annual rate of merchant vessel deliveries to subsidized operators should reach 30. As early as 1959, nonsubsidized shipping firms should be getting 17 new ships a

Washington DA . . .

(Continued from Preceding Page)

year. He expects that contracts for 20 vessels to be built with some government aid will be placed before the end of 1957.

GRANTS LOAN LEEWAY—Airlines, under new Public Law 295, 85th Congress, can be more flexible in getting equipment funds. They may issue equipment trust certificates when they borrow money to buy new planes or parts. Lenders hold title to the equipment. The airlines lease it and make periodic payments to gain possession of the property. This practice protects the lender and may afford better terms to the borrower.

WOULD REPEAL EXPLOSIVES ACT—In case of war, the U. S. Interior Dept. wants no part in ruling on explosives transportation and storage. The agency petitions Congress to repeal the Federal Explosives Act, administered in World War II by Interior's Bureau of Mines. It authorized licensing agents to issue permits for manufacture, storage, transportation, and use of nonmilitary explosives. The job was costly and cumbersome, the Interior Dept. maintains.

DEBATE HOT CARGO — Next important date in the "hot cargo" transportation dispute is to be Nov. 7. That's when Division 1 of the ICC intends to begin hearing arguments in the Galveston Truck Line Corp. case. Main point at issue is whether motor common carriers refusing to handle freight from another line because of hot cargo agreements should lose their permits. An ICC examiner has recommended cancellation of the permits.

CONTAINER OUTLOOK DIVIDED—Container manufacturers are keeping a close rein on their optimism. A government survey reveals an almost even division between those who foresee an upswing soon and those expecting a decrease or no change. Manufacturers who are preparing for improved business have some weighty reasons in their favor. These include peak national employment, record personal income, and heavy plant and equipment spending.

PLAN MATS, MSTS STUDY—Air and sea carrier services run by the military are to be examined by a special Senate group. The senators will look into the effects on private business of the Military Air Transport Service and the Military Sea Transportation Service. They plan to study the tax loss to the government stemming from the MATS and MSTS operations and the relative efficiency of these and civilian lines.

PLANT OUTLAYS BOOM—Transportation lines are continuing heavy outlays for new plants and equipment. As the government sizes it up, they'll spend at an annual rate of more than \$3 billion in this October-December quarter. Rail companies' investment will be close to a \$1.5 billion annual pace. Other carriers will be spending at a rate of \$1.78 billion.

now this is

Visibility!

MONOMAST UPRIGHT
The greatest basic lift truck
advance in 25 years

...with MONOMAST® UPRIGHT ...available only on HYSTER TRUCKS

The superior visibility from a Hyster Truck equipped with a MONOMAST UPRIGHT enables operator to get far more tons moved per hour—for these reasons:

FASTER APPROACH—Operator has full view of forks as he moves into load.

ACCURATE LOAD PLACEMENT with minimum maneuvering.

LESS PACKAGE DAMAGE—Operator can better see what he is doing.

LESS OPERATOR FATIGUE—Operator efficiency is increased. He works faster *naturally*.

FRESH-PICKED PERFECTION of produce is safeguarded from farm to market by speed and effectiveness of Link-Belt icing and salting equipment—part of a complete line of conveying and power transmission products.

"With USS Gerrard Steel Strapping we've cut material handling time by more than 60%,"

SAYS UNITED CREOSOTING COMPANY, HOUSTON, TEXAS

APPROXIMATELY TWO YEARS AGO, United Creosoting Company began using USS GERRARD Flat Steel Strapping for tying fence posts into bundles for pressure treatment.

Previously, the posts—which range in size from 6 to 12 feet—were manually loaded onto tram cars, then wrapped with black annealed wire and hand-tightened with pliers. Two men required 20 to 30 minutes to load a tram car with 100 to 150 posts. After treatment, the loaded tram cars were removed from the pressure cylinder and deposited in a storage area. Quite frequently, the wire broke due to rough handling, and hours were wasted restacking the posts. But this is no longer the case.

With USS GERRARD Steel Strapping, it's a totally different story. Right at the beginning, the stacks of posts are bound into snug bundles with two steel bands of Gerrard Flat Strapping, or three steel bands if the posts are over nine feet long. From then on, all the loading and unloading is done by crane—onto the tram cars, into the storage area, onto railroad cars and trucks for shipment—all the while held secure by the original steel bands of Gerrard Steel Strapping.

"The reduction of handling time, before and after treating the wood, releases crews of up to 12 men for other important jobs, and has made hand stacking for shipment a thing of the past," says Frank P. Mayfield, Execu-

tive Vice President of United Creosoting. "We have gained both improved efficiency and lower costs by using USS GERRARD Steel Strapping.

"Although we are in an unusually moist climate, we have had no trouble with corrosion, and I know of no cases where our Gerrard-strapped bundles have broken open, despite the swelling of the wood because of treatment. Our customers like steel-strapped bundles, since it cuts their handling time, too."

You, too, can receive the time- and money-saving advantages that USS GERRARD has to offer. No matter what your packaging-shipping problem is, we'll come up with a practical solution. Contact a USS GERRARD sales representative for any help you need.

On the Line-

What's Your Hobby?

A few days ago, we attended the first fall meeting of a traffic club in a central states city. The entertainment featured a five-piece jazz band, led by a local assistant traffic manager.

"If that fellow was half as good on his job as he is leading band, I would have a very valuable assistant," commented our host sourly.

We dismissed the remark with an uncertain smile. The following morning the meaning became clear. We had accepted our host's invitation to visit his department. In the course of our conversation, the topic of damage claims arose.

"If that jazz band leader I've got for an assistant would pay as much attention to checking our carloadings as he does to music, we'd have a much better record," our host snapped.

Again, we declined to comment. Only about a half hour previously, our host spent 15 minutes describing how he had won the three golf trophies standing on his bookcase. Such an accomplishment, we had reflected at that time, was not the result of a week-end duffer.

We haven't been able to discard this incident from our minds. Seemingly innocuous, it has recalled similar incidents, some of which have caused much unhappiness.

For example, in our own travels about a year ago, we met a hotel room clerk who identified himself as a former reader of ours. He said he changed his job because he couldn't stand the "gaff and the grind" of traffic.

The real reason, we learned later that same day, was that this man was a great joiner—fraternal organizations, service clubs, local and

national associations. He spent so much time working on committees and holding various offices that his job suffered.

We also know of a man whose avocation is antique furniture. His garage is full of all kinds of junk he picked up in a three-state area. He works hard and late most nights repairing the stuff and selling it. He has won some honorable-mention awards at exhibitions.

We know for sure that he isn't getting any honorable mentions for his work at his bread-and-butter job. Maybe we should tell him that we hear he is about to be canned.

Then there is that very popular sportsman—popular with everybody but his boss. It's quite a coincidence how his business travel schedules seem to fall on the opening days of trout fishing, duck hunting, deer hunting, and horse racing.

Lest we be misunderstood, we're not against sports, hobbies or interesting avocations. Not if they don't interfere with business. The trouble is that often they do. We know. We've had more hobbies than anyone we've ever known. Fortunately for us, we never got very clever with any of them.

All we want to do now is warn some very nice guys that their hobbies *are* interfering with their jobs. Stuffy as it may seem, we suggest making the full-time job a hobby. If that job is distasteful, we suggest change. Night schools are open. Correspondence schools never close.

Never in American business history has there been such a shortage of trained executives, especially the kind whose jobs are their hobbies.

A.W. Greene
EDITOR

Yakkety Yak

The man who avoids EXcess stands a better chance of attaining SUCCess.

He who really wants to succeed, finds a way; he who doesn't, finds an alibi.

Success comes before Work—only in the dictionary.

Determination moves a man ahead;

stubbornness stops him.

The loudest barkers always are with the sideshows.

DANGER: Of course, some lads have run into trouble by making a hobby of their jobs:

. . . The English teacher who tried to teach his wife to speak softly, succinctly, and seldom.

. . . The bookkeeper who worked out a detailed home accounting sys-

tem for his wife, then tried to make daily trial balances.

BRASS: The most dangerous hobby we know is practiced by a certain hotel doorman. Dressed in his uniform, he meets incoming trains and kisses pretty girls.

. . . During the past year, he has averaged two kisses per gal before explaining, "Sorry, you look like Cousin Sally."

IMPROVING OVERALL
OPERATION THROUGH
TOWMOTOR
MASS-HANDLING

...here's "manpower" that hands you a bonus!

Think how many of your plant's handling jobs can be accomplished with much less effort—swiftly and profitably—by one operator "teamed up" with a powerful Towmotor fork lift truck!

You get an entirely new concept of modern mass-handling. You get a "bonus" in extra profits because you multiply manpower with the payroll you have. And you get a bonus in plant-wide morale when work flows on-schedule through every department . . . effortlessly . . . with a bigger day's work done.

Called the "ideal" fork lift truck by management and operators alike, the latest Towmotor models offer exclusive features as advanced as these, at no extra cost:

- New-concept functional engineering
- Simplified dual-entry compartment
- Full-traction weight distribution

- Adjustable off-center visibility
- New motion-studied centralized control
- Towmotor improved precision steering
- Power steering, 'TowmoTorque' Drive at extra cost

Doing things well and in a big way

Obviously, the happy fellow on the right is expressing The Milwaukee Road's adeptness at providing complete transportation service, both freight and passenger. But you can think of that wide, wide reach as symbolic of something else—the great extent of Milwaukee Road service.

Some folks probably don't realize how BIG The Milwaukee Road is. It's the third biggest railroad in the country in route miles. It extends across two-thirds of the nation. Its 10,629 miles of line directly serve 12 states—one-fourth of the states of the Union.

In addition to the region it serves with its own rails, the Milwaukee serves a much larger area through its strong connections. In fact, it is a fair statement that over its own lines and in association with other railroads, the Milwaukee serves the whole country.

Rich in experience

Of course BIGNESS alone doesn't necessarily make a railroad a top-notch carrier. There have to be other qualities. Wide experience is one, and the Milwaukee is rich in that.

Freightwise, for example, the Milwaukee isn't an "all our eggs in one basket" railroad. It isn't a manufactured goods line, a coal line, a lumber line, a "granger" line, an ore line. It is all of these and many more, because Milwaukee Road territory is among the most diversified of any railroad's. It includes some of the nation's greatest manufacturing and distributing centers. It embraces much of the country's "bread basket." Within it lie some of the most important mineral-producing areas. It ranks high in the production of lumber and other forest products.

With such diversity, it is small wonder that the Milwaukee has acquired the widest kind of experience in hauling every conceivable kind of freight in great quantities—and incidentally that experience runs back more than a century.

Good people, too

As a passenger carrier, the Milwaukee has a world of "know how" too. On every one of the many fine passenger trains the Milwaukee Road operates, it is evident in a variety of ways—extra comforts, a friendly atmosphere and of course, those justly famous Milwaukee Road meals.

To be good, a railroad also has to have first class facilities and real *esprit de corps* among its people. As to facilities and equipment, the Milwaukee is 100 per cent modern. As to people—well, you'd look a long time to find a group of people as friendly and eager to serve as Milwaukee Road men and women. There's a good reason why we're known as "the friendly Railroad of the friendly West."

In short, The Milwaukee Road's not only pretty BIG, but we think pretty GOOD. If you haven't done so, try us and find out for yourself.

The Expediter

on the one hand we provide passengers with the latest refinements ...

Delightful innovations such as Dome Diners, Super Domes and Skytop Lounges. Economies such as Touralux sleepers. Traveling in Pullmans or in reclining chair lounge coaches, you enjoy famous Milwaukee Road meals and friendly service.

Choose the Super Dome HIAWATHAS between Chicago and the Pacific Northwest, or the Western "CITIES" Streamliners to and from Colorado and California. You'll have a happy, restful trip.

MOVING TIPS FOR TRAFFIC MANAGERS:

Mayflower's Pioneer Experience Solves Problems of Plant Removals

Fortunately this kind of an assignment doesn't come your way very often. But when it does, "know-how" on how to arrange the moving of so many families to the new plant site can be a lifesaver. Mayflower has that "know-how" for you. It has been acquired through extensive *actual experience* in handling many complete removals of personnel for industry and government, including the largest industrial move on record! Whether you have many families to move or just a few, Mayflower planning, facilities, and expert personnel can save your company time and money. Yes, and they'll make each individual move easy and safe for your people, too.

LETTERS TO THE EDITOR

Unpaid Storage Charges

To The Editor:

We would like to have your views on the following case.

On April 15, 1955, Mr. B placed his furniture in storage with us, paid one month storage, but has not paid any more.

On Feb. 18, 1957, we received notice from referee in bankruptcy that B had been adjudged bankrupt and his creditors would have a meeting on a certain day. We ignored this notice.

On March 12, 1957, we received notice as to time for filing objections to discharge. We ignored this notice also.

Sometime during April the attorney acting as trustee for the creditors telephoned us that we would have to release all goods we had belonging to B without being paid the \$260 then due us for storage charges.

We told him we would not release the goods until charges were paid in full and only then to B or one entitled to receive them. He then stated that we had lost our lien for storage as it was not recorded at the City Hall, and furthermore we had not protected the lien by joining the other creditors.

Our stand has been, that as one having possession of the goods for nearly two years before bankruptcy proceedings, we were entitled to the accumulated storage charges without such lien being publicly recorded, and also we do not have to join the other creditors. We will risk payment of our lien on the value of the goods in our possession and no one, even the bankruptcy court, can take the goods from us without paying in full charges due us to the date goods are legally released.

(Individual and firm names withheld on request)

Only a specialist in bankruptcy law can, with any degree of dependability, answer your question. Personally, I think the answer to this question must be decided finally by the higher court, which may very well differ from the opinion of the trustee, or even the lower court's decision. Naturally, I believe you should have attended the meetings to which the referee directed your attention. Nevertheless, also it is my opinion that aside from the legal status you may have forfeited by not attending these meetings and joining with the other creditors, your warehouseman's lien is valid if you complied with the laws pertaining to such liens.

When reviewing late and leading higher court decisions, I shall endeavor to locate one or more new

cases to the point of your legal problem, and I shall publish the same at the earliest possible date.—Leo T. Parker, DA Legal Consultant.

Handling & Packaging

To The Editor:

Last October, while in St. Louis on business of another sort, I spent one day at a packaging and materials handling show. Can you tell me who sponsored the show, if it is scheduled again this year and, if so, where and when?

Anthony P. Arpin
Research Director

Griggs and Maltley
Philadelphia, Pa.

The show in question was sponsored by the Society of Industrial Packaging and Materials Handling Engineers. It has been scheduled again this year for Oct. 28-31, in Atlantic City's Convention Hall. Additional details can be found in the *Cutting the News* section of this issue, beginning on Page 9. Advance registration tickets are available through this office.—The Editor.

Industrial Sweepers

To The Editor:

We operate large piers and warehouses in N—, and are interested in automatic floor sweepers. Can you put us in touch with three or four manufacturers of such equipment?

(Individual and firm names withheld on request)

The 1957 DISTRIBUTION AGE Where-to-Buy Directory lists the following manufacturers of industrial sweepers: Allis-Chalmers Mfg. Co., Buda Div., 1135 S. 70th St., Milwaukee 1, Wis.; Austin-Western Co., Construction Equipment Div., Baldwin-Lima-Hamilton Corp., 601 N. Farnsworth Ave., Aurora, Ill.; Econoweld Corp., 519 Hunter Ave., Dayton 4, O.; Handling Devices Co., Inc., 43-45 Pearl St., Brookline 47, Mass.; Holly Pneumatic Systems, Inc., 215 E. 149th St., New York 51, N. Y.; Hough Co., Frank G., 830 Sunnyside Ave., Libertyville, Ill.; Lambert Inc., 519 Hunter Ave., Dayton 4, O.; Little Giant Products, Inc., 1530 N. Adams, Peoria 3, Ill.; Magnetic Engineering & Mfg. Co., 855 Van Houten Ave., Clifton, N. J.; M-B Corp., New Holstein, Wis.; Mercury Mfg. Co., 4044 S. Halsted St., Chicago, Ill.; Modern Power Sweeper Co., 738 N. McKeever Ave., Azusa, Cal.; Parker Sweeper Co., 91-99 No. Bechtel Ave., Springfield 99, Ohio; Tennant Co., G. H. 721 Lilac Drive, Minneapolis 22, Minn.; Wilshire Power Sweeper Co., 247 Dundee Ave., Elgin, Ill.—The Editor.

Letters for publication in DISTRIBUTION AGE must be signed and must give the writer's title and company affiliation. Names will be withheld upon request.

Shipping Problem? call EMI

Big or little, strong or fragile, anything stacks or ships better on EMI quality racks. They protect stock, cut handling costs and speed inventory.

EMI RACKS are made of strong, tubular steel and are adjustable to fit any space or unit load. Special racks designed to your specifications with field engineering service on any installation.

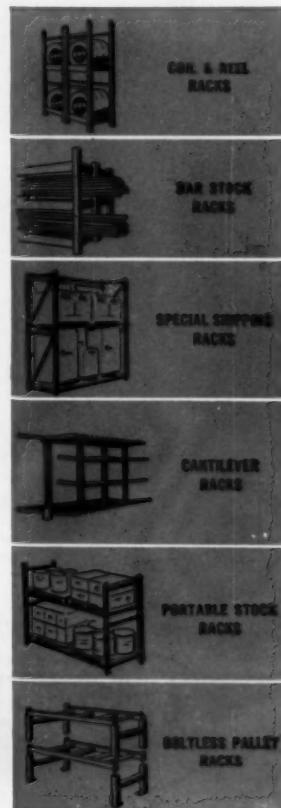

Write for our illustrated catalog before you plan additional storage space or the purchase of stacking or shipping equipment.

This town is tracking down new industry!

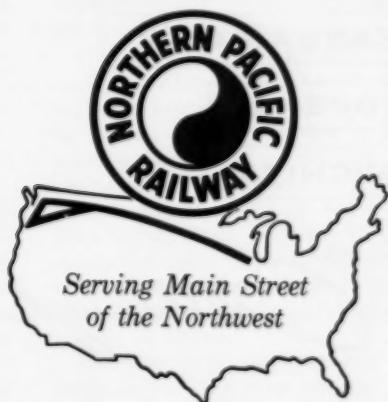

Some communities *talk* a lot about attracting new business—other towns go out and *get* it. Like Chehalis, Washington (pop. 5,639) which persuaded Goodyear Tire & Rubber Co. to erect a \$1.2-million plant in the town's new industrial park . . . and now looks forward to new levels of employment and prosperity.

First, however, there was the problem of rail service. NP and three other roads jointly rebuilt 9,450 feet of abandoned trackage and laid 4,985 new track feet to the edge of Chehalis' industrial park. But that still left over half a mile to go to Goodyear's plant site.

The solution? The town itself put in the 3,450 feet of connecting track. About sixty Chehalis businessmen financed the rail-laying project by selling ties at \$4 apiece to residents. Next, amateur gandydancers working mainly on weekends laid the rails. Thanks to community teamwork, Goodyear now has its spur and Chehalis has a brighter financial future.

This is a good example of the *progressive*, friendly approach to business and industry you'll find along Northern Pacific's "Main Street of the Northwest". For more information about Northwest industrial sites and freight service, call your nearest NP traffic representative or write Otto Kopp, Vice President-Traffic or P. D. Edgell, Manager, Properties and Industrial Development, Northern Pacific Railway, St. Paul 1, Minn. Industrial site inquiries held in strictest confidence.

OCTOBER, 1957 . . . Vol. 56, No. 10

By Arthur C. Butler

Director
National Highway Users Conference

MUCH major state highway legislation this year centered on planning and implementation of the federal-state highway program. Primary attention focused on providing control of highway access, easement and right-of-way acquisition, reimbursement of utilities, and taxation and finance.

Other legislative activity included mileage taxes, vehicle size and weight limits, and adoption of Uniform Vehicle Code provisions. Forty-five states had legislative sessions. Of this number, 39 adjourned, and three recessed.

Highway Legislation

Control of highway access legislation was considered in at least 18 states. Minnesota, New Mexico and North Carolina approved legislation providing for comprehensive controlled-access laws. Major amendments to access laws were made in Illinois, Montana, Nevada, Texas, and Washington. Legislation to deny the use of controlled-access highway rights-of-way for the establishment of service facilities or other commercial facilities was approved in five states—Colorado, Michigan, New Mexico, North Carolina, and Tennessee. Similar laws are pending in two states—Delaware and Massachusetts.

Credit financing of highways was considered in at least 10 states. It would provide or continue accelerated highway construction programs and, in some cases, increase available federal-aid matching money. States approving such legislation are: Delaware, Maine, Maryland, Ore-

Highway Legislation at the State Level

A legislative summary of new state highway regulations, including funds, taxes, fees, safety equipment, size and weight limits, etc.

gon, Tennessee, Texas, Vermont, and Washington. Legislation still is pending in Alabama and New Hampshire.

Toll road enabling legislation was repealed in Iowa and Washington. A proposal to repeal the existing authority is pending in Alabama. A toll road extension has been authorized in Kansas.

Changes in highway administration powers and procedures were considered in 30 states. Proposals were enacted in 16 states making administrative changes, and still are pending in two states. North Carolina, Utah, and West Virginia enacted legislation reorganizing their state highway departments.

Modernization of highway right-of-way acquisition laws and procedures was considered in at least 27 states and enacted in 15. Among proposals to accomplish this objective are bills to authorize highway authorities to acquire land for future use, establish revolving funds to finance such acquisitions, acquire fee-simple title to property for highway use, improve the condemnation procedures, and authorize the acquisition of more land than actually is

needed for the highway right-of-way proper.

Highway Funds Protection

Major diversion proposals were put forth this year in California (rapid transit financing—died), Illinois (rapid transit and mental hospital financing—died), Maryland (budget balancing—died), New Jersey (veterans' bonus financing), and Oklahoma, (relief commodities distribution — enacted). Other diversions or quasi-diversions were proposed and died in Idaho, Iowa, North Dakota, Tennessee, and Texas. New Mexico enacted a diversion law.

Legislation that would shift the cost of utility relocation to the highway users was considered in 39 states. It was defeated in 21, enacted in 16, and is pending in two states. The extent of reimbursement requested in the new laws varies from payment of the relocation costs on all the federal-aid systems in three states to payment only on the Interstate System in 10 states.

Constitutional amendments to help insure the expenditure of highway user tax revenues for

(Please Turn to Page 110)

Piggy-Back Service

Rapid door-to-door shipment is being made possible in France by the piggy-back system. Special 24-ft road trailers, which can be hauled by standard tractors are used. They are fitted with auxiliary flanged dolly wheels that run on rails along the edges of flat cars. When loaded on the flat-cars they are held by shock absorbing clamps at each dolly wheel

Fork lift truck is used to carry unitised load of lumber at depot of French railroad. About 5500 of 6600 important stations are equipped for palletised loads.

'Palette' Puts New Traffic

Railroad's pallet pool provides shipper with empty pallets as soon as his shipment is accepted then collects from consignee

GAING new traffic is a problem the French Railways (S.N.C.F.) have been tackling vigorously in recent years—and with some success.

Among the methods being used to provide a rapid and competitive freight service, with door-to-door deliveries in many cases, have been the pallet system and piggy-back service.

In 1954, some 3,500,000 tons of small parcels traffic was carried by the French Railways. Of this, it was considered that 30 to 40 per cent could be palletised. Before this could be achieved on an extensive scale, however, it was necessary to install the requisite equipment at a large number of depots. Development along these lines had to be limited to those centres where the traffic justified the expense involved. At present, 5500 of the 6600 stations of any

importance accept palletised freight traffic. They are equipped either with a "transpalette" or a fork lift truck.

Palletised shipments are accepted only by and for those stations so equipped. By way of trial, however, pallet-box shipments are being accepted which are destined for all stations in certain test regions.

At the stations which are not supplied with pallet-handling equipment, the off-loading of the pallet-boxes is effected by means of a transpalette "baladeur" which travels with the train.

Used on Train, Dock

Weighing only 85 kg., the transpalette is a light-weight hand-operated low-lift truck. It can be used either on the flat deck of the road or rail vehicle and on the floor of the platform or ware-

house. It is capable of supporting a weight of one ton and is furnished with four iron rings for lifting by crane. The guiding handle comes automatically into a vertical position when not in use.

Operating in conjunction with this transpalette is a swan's neck, light-weight crane, capable of lifting 1000 kg. Fitted onto a corner of the railway freight car deck, it can revolve through 360 deg. Fitted with a crossbar from which can be slung the combined pallet and transpalette, the crane uses lines and pulleys. It is operated by a hand-operated winch installed under the car deck at the centre. A jack placed under the crane helps to support the load of the pallet as it is lowered to the ground.

Certain stations of the S.N.C.F. have been equipped with a crane with a swing-tree which is per-

A swan's neck crane is used for loading or off-loading pallet boxes from railroad cars in France. Hand truck stays with box

A small fork truck is used for handling pallets in boxcars. Only big stations are so equipped. Trains in several regions carry transpalettes

on Rails

By John Grindrod
DA European Correspondent

manently fixed to one of their trucks. By means of this, the transpalette, loaded with a pallet or pallet-box can be transferred from the train to a truck or the ground. When placed on the ground, the transpalette can take the load to a shed or warehouse. The crane also will pick up a loaded transpalette with freight being loaded on the train.

Costing about fcs. 70,000 (\$196), the crane can be fixed on all kinds of vehicles. It has many other advantages: maintenance charges are practically nil, off-loading is rapid and effective.

Palletised Parcels

The small-parcel pallet loads made up by S.N.C.F. at the stations of despatch or transhipment come under three categories. One category comprises transhipment pallets. These comprise consign-

Two men working with a transpalette put a palletised load into freight car. This low-lift truck travels with the train for use either in car or on the dock

ments travelling over the same ground as far as a transhipment centre, whence they are despatched to their different destinations unpalleted. These pallets are sent to the most distant transhipment centre possible without being disturbed; they must "jump" at least one centre, where, in the ordinary course of despatch, unpalleted goods would be

subject to a transhipment. Another category comprises pallet loads destined for the same locality. The third comprises a single important consignment for the same consignee in a locality where there is a road truck service equipped for delivery of domiciled pallets.

A number of regular shippers,
(Please Turn to Page 116)

Reporting Traffic Functions to Top Management

Regular reports of traffic department activities should be directed to the proper management level, should be properly executed, should have a worthwhile purpose, and should observe certain basic considerations

THREE is little doubt that reporting to management is one of the more important phases of the traffic function. There is little doubt, also, that it is an often neglected phase.

The need is apparent. The type of report, frequency of issue, style and content, etc., must be dictated by the operation. To be effective, however, all such reports should:

1. Be directed to the proper management level;
2. Be properly executed.

If management understands the importance of traffic management in its relation to other aspects of the business, the traffic head will be asked to report to the proper management level. Management also must be aware of the need for a changing transportation system to meet changing transport conditions.

The kind of reporting done must be determined, in part, by the

traffic man's place in the management structure.

I recently completed a survey of traffic functions in 27 large companies. Most of the traffic men involved reported their jobs at the staff executive level. It should be re-emphasized, however, that only extremely large firms were surveyed. We know that the same condition does not exist in smaller firms.

A surprising number of the traffic men surveyed said that they report directly to the company president or chief executive officer. Most of the remainder report to management's second echelon—usually a vice president-operations, or a super office manager. In these cases the same management person usually receives reports of purchasing, accounting, budgeting, industrial relations, and perhaps quality control.

Where traffic is subordinate to

one of the latter functions, the traffic man generally makes his report to purchasing.

Staff and Line

In smaller companies there is little distinction between staff and line functions in traffic management. The box on the opposite page makes this breakdown.

Traffic department reports to a chief or staff level executive should be related to staff functions rather than line functions. Where there are branch traffic managers in subsidiary plants, or where the traffic manager reports directly to a line executive—typically, a production manager—the report should cover line activities principally. (The survey indicated that most branch traffic managers report to a plant official rather than to company headquarters.)

It would be difficult for a "line" traffic man to report in "staff" terms. Also, "line" reports will have little impact on the staff executive who is accustomed to writing and receiving "staff" reports.

Of course this does not solve the problem in smaller companies, where line and staff functions are not segregated. In such a case the traffic man must consider himself a dual personality, "wearing a different hat" at different times of the day or the month as the situation demands.

Too High vs Too Low

"In the long run, it would be just as ineffective to have transportation report too high in the management structure as to have it report to too low an executive. If a man believes that his capabilities for a share in management are greater than those given him as the manager of transportation, the answer may well be for him to step up into an area of greater responsibility."—The Author

By Arthur W. Todd

*Director of Purchase Engineering
Lincoln Electric Co.
Cleveland, Ohio*

Mr. Todd for a number of years served as director of the Lincoln Electric Co. Traffic Department. He has been active in the affairs of various transportation groups and for some time edited the Ohio State Industrial Traffic League Bulletin.

The author originally spoke on this subject at the recent Fourth Annual Michigan Traffic and Transportation Conference. Because of the importance of Mr. Todd's remarks, and because of the length of his original presentation, the material has been divided into two sections. Part II will appear in the next issue of *DISTRIBUTION AGE*.

In the smaller, as in the larger, single traffic departments, the organization should separate line and staff functions. Line employees should route shipments, check freight bills, and perform similar day-to-day tasks. The staff—be it called analytical, research, methods analysis, methods research, planning, or development—would lay the basis for staff reports by the chief traffic executive.

Function and Job

Whatever the organization pattern, the traffic head is entitled to a clear understanding of the traffic function in relation to other company departments. He also needs a clear description of his particular job.

In one of the surveyed companies, functions of the general traffic department were summarized as follows:

1. Advice and assistance to corporate management.
2. Staff services.
 - a. Advice and counsel to line—when and how.
 - b. Assistance to line—when and how.
3. Assigned responsibilities.
 - a. Procedures.
 - b. Rate proposals.
 - c. Special transportation services—transit, stop-off, etc.
 - d. Traffic service to general headquarters.

(Some of the job descriptions

Staff and Line Functions in Traffic Management

STAFF

1. Set traffic policies.
2. Prepare traffic operations manuals.
3. Select types of equipment.
4. Select types of (but not particular) carriers.
5. Recommend kinds of warehouse facilities.
6. Set standards of personnel and equipment output.
7. Set standards of extent of movement of material.
8. Set cost standards.
9. Set equipment standards.
10. Study and act on comparisons between standard and actual.
11. Train and educate personnel.
12. Evaluate and promote personnel.
13. Recommend packaging and palletization procedures.
14. Maintain specialized library of tariffs, cases, books.
15. Prepare evidence for rate cases.
16. Process Commission and legal cases and other appearances.
17. Make field trips to local operations.
18. Arrange for outside audits.
19. Police prompt and accurate payment of freight bills and claims.
20. Supervise company operated transportation, household goods movements, and other company-wide transportation functions.
21. Set up transit, stop-off, and similar multi-shipment, multi-point operations.
22. Make location traffic surveys.
23. Advise management as to technical, legal, and economic developments in transportation.
24. Assist in sales to transportation companies.
25. Provide information to salesmen, customers, suppliers and the public on company traffic operations.
26. Represent company in national transportation groups and conferences.
27. Make studies and prepare information on traffic status of competing companies.

28. Make engineering studies seeking improvement in any aspect of company transportation problems.
29. Perform internal audit of branch traffic operations.
30. Handle insurance and tax factors of above operations.

LINE

1. Determine classification and proper descriptions.
2. Prepare shipping documents.
3. Select specific carriers and routings.
4. Maintain and schedule supply of vehicles.
5. Police detentions and demurrage.
6. Arrange for permits or reroutings for embargoes and strikes.
7. Consolidate and pool small shipments.
8. Divert and reconsign shipments as needed.
9. Trace and expedite shipments.
10. Prepare loss, damage and overcharge claims and collect amounts.
11. Maintain local tariffs or rates.
12. Pay freight bills.
13. Perform initial audit of freight bills and assign charges.
14. Quote rates and costs of premium service for special service for customers, purchasing department and others.
15. Provide for passenger transportation services.
16. Make special arrangements for import and export shipments.
17. Supervise packing, marking and weighing.
18. Supervise shipping.
19. Supervise receiving.
20. Supervise internal handling equipment and movements.
21. Supervise local cartage and plant-operated over-the-road or other transportation equipment and personnel and costs.
22. Handle freight solicitors, inspectors, loss and damage prevention engineers, and similar visitors.
23. Manage local warehouse operation.

turned up in the survey will be discussed next month in the second installment of this article.)

Outside Reports

It must be remembered that the traffic department is not the only department reporting on traffic activities. Other department reports often include reference to traffic activities. Such reports come from the accounting department, internal auditors, certified public accountants, budget and methods departments, suppliers, customers, and, in some firms, the general public.

Not all of these reports may be

favorable. Some may even lack essential facts. They do, however, serve as an "outside look" or a "check and balance."

Even if the traffic department keeps its own detailed accounting ledger, the total figures should be reflected in the company's general books. Any reports submitted should be integrated with, and should not duplicate, similar work done by other departments.

For comparison with reports by outsiders, direct traffic reports always should be clear and factual. They also should be presented in proper proportion.

(Please Turn to Page 120)

A roofed-over, all-weather truck dock at the terminal can accommodate up to 71 trucks and trailers at a time

Creased Concrete Roof Spans New Truck

Truck company centralizes its Denver facilities and home office at one location near major transcontinental highways and main arteries to downtown area

THREE'S no place like home for the Denver-Chicago Trucking Co., Inc.—especially since home is a new \$1,500,000 headquarters and terminal in Denver.

The new structures consolidate all of the facilities which were spread over a series of downtown Denver locations in a single center.

New Facilities

Featured in the new facilities are: A three-story, air-conditioned office building; a modern 33,000 sq ft terminal; a 52,000 sq ft maintenance shop; and a 15-acre site near major transcontinental highways.

Modern architectural design has contributed generously to improved operations. All of the buildings are of reinforced concrete, glass, steel and brick construction.

They have roofs made with pre-stressed concrete slabs $3\frac{1}{2}$ in. thick. Erected in a pleated design, the

roofs are supported primarily by the outer walls without interior pillars and partitions. Maximum flexibility of layout and good lighting thus have been achieved.

The terminal can accommodate 71 trucks at roofed-over, all-weather docks. A 672-ft. in-floor drag line speeds sorting and loading of shipments to provide fast coast-to-coast service.

Radiant heat is used throughout the building. The thousands of feet of piping through the concrete floor are fed with hot water from a gas-fired boiler. Oil-fired burners also are maintained for emergency service.

Service System

The new shop is maintenance headquarters for the company's 1800-vehicle fleet. In addition to its own fleet, Denver-Chicago services the tractors and tank

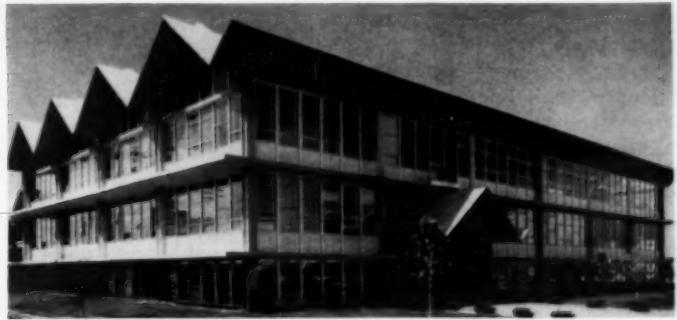

An in-floor drag line speeds the sorting and loading of shipments in the modern 33,000 sq ft terminal area

From the office on the balcony (right) supervisors can see most locations in the 52,000-sq ft service shop

Terminal

Pre-stressed concrete roof of office building uses same creased design as terminal and shop roofs. Executive offices are here

Tractor bays, situated on the east side of the shop, have an overhead exhaust system. Mezzanine office is shown at left (over parts storage)

trailers of R. B. "Dick" Wilson, Inc., a wholly-owned subsidiary.

Routine servicing is carried out on a flow-through system while separate departments carry out rebuilding and overhauling of tractors and trailers.

In the center of the building is the parts department. Above this is a mezzanine which houses wash-rooms, locker space, and the large shop offices. It also includes a consultation room and a library of parts manuals, catalogs and other literature.

This mezzanine, over 3000 sq ft in area, is glass enclosed on all sides to give a clear view of most of the shop.

From the air-conditioned, attractively-decorated headquarters building, company executives operate a

coast-to-coast service involving 7600 miles of highway and 14 other major terminals.

In selecting its new L-shaped site at 45th Ave. and Jackson St., Denver-Chicago picked a location within an important industrial area that is close to arterial highways. Via these, good access is provided to the downtown business district.

In addition to the natural advantages of the improved location, the new terminal is expected to reap "plus" benefits through consolidation of all phases of the operation. Communication between widely separated departments was a problem under the old system. By regrouping all departments under a single roof, this problem has been eliminated. *

Motor Carrier Consolidations—the Whys and the Hows

MOTOR common carrier mergers are, for the moment at least, one of the transportation industry's "hottest" issues. The merger trend seems to have generated a heated feud over the handling of merger applications by the Interstate Commerce Commission.

The controversy centers on a Senate Small Business Committee report on the ICC merger policy. The report, which has been published but as yet has not been approved by the Committee, attacks ICC decisions in recent merger applications.

It accuses the Commission of showing favoritism in merger cases. Large trucking companies, according to the report, get preferential treatment—to the detriment of small companies.

At one point the report says, "The Commission, according to some witnesses, seemed to condone mergers and acquisitions by the big, while stifling growth and expansion by the small."

ICC Rebuttal

The ICC has been quick to deny these charges. Testifying before the Committee this summer, ICC Chairman Owen Clarke said that the report "contains contradictory terms and reaches mistaken conclusions." At the August MCA meeting, Commissioner Mitchell (see box on opposite page) said, "Hundreds of wild statements were put into the report to create the impression that regulation isn't needed, and that the public interest isn't being served."

The report and debate aside, mergers do have an important impact on our transportation network. They affect the carriers involved, competing carriers, and the shippers.

While the ICC and the Senate Small Business Committee feud over the handling of carrier mergers, the merger trend continues—here is a cause and effect look at the situation

By Charles A. Taff
Professor of Transportation, University of Maryland

Many proposed motor carrier consolidations technically are mergers. In a merger one company absorbs the assets of another without the formation of a new corporation. As used in corporate finance and law, consolidation is a combination in which two or more corporations unite to form an entirely new corporate entity. The new corporation holds the assets and properties of the constituents. Since most motor carrier mergers popularly are referred to as consolidations, that term is used herein.

Types of Consolidations

Based on geographical aspects, there are several types of motor carrier consolidations. These are: The acquisition of overlapping routes; end-to-end; tentacular; area. All consolidations fall in one or more of these classes.

Overlapping consolidations often embrace parallel routes with service to some common points.

Overlapping may be confined to larger points.

A common type of consolidation is end-to-end. Typical **end-to-end** consolidation involves uniting of connecting carriers. These consolidations often involve carriers which have been interlining freight. Previous interlining is not necessary, however.

Tentacular consolidations sometimes are referred to as the right-angle type. In this the acquired lines extend outward like tentacles from the main route.

A motor carrier may be acquired which has a large number of regular routes and points concentrated in a relatively small area of two or three states. This is an **area consolidation**.

Reasons for Consolidations

There are a number of motivating factors in motor carriers' combining. Expansion through the acquisition of operating rights of other carriers, for example, may

ICC Commissioner Mitchell addressing Movers Conference on mergers

ICC Commissioner Richard F. Mitchell in August leveled a blistering attack on the Senate Small Business Committee report on trucking industry mergers. Commissioner Mitchell spoke on the subject at the Annual Assembly of the Movers Conference.

The commissioner labeled the SSBC report "ridiculous, entirely unfair, and without foundation." Stating that his views were his own and not those of the Commission, he concluded with these remarks:

"No merger should be permitted solely for the purpose of eliminating a competitor; but, as this nation grows, the demand for transportation increases, and so that the trucking industry may render better service, mergers to a limited degree should be approved . . .

"Where the record clearly shows the merger is in the interest of better transportation for the communities to be served, that it does not eliminate competition, and the price paid is a fair and reasonable one, then consideration should be given to the merger."

be less difficult than securing a new grant of authority from the ICC.

Pacific Intermountain Express advanced another reason when it attempted to purchase the Keeshin system in 1950. PIE emphasized the possible savings. It was pointed out that added costs of multiple freight handling and documentation would be eliminated or reduced substantially. Closely related to this is the reduction in the division of revenues through the elimination of interlining and interchange.

Another reason may be to acquire a new route or area with additional traffic. The additional route may enhance the competitive position of the acquiring carrier if the carrier can emphasize to shippers the benefits of a single-line service. Further, competition with other modes of transportation and other motor carriers can be altered favorably.

In addition to competitive rea-

sons, some motor carriers have consolidated to diversify. Consolidated Freightways, Inc., in 1955 and 1956, in seeking Commission approval to purchase certain motor carriers operating in the East, stated that this would tend to offset economic reversal in the West or vice versa.

Often carriers will seek to diversify through purchase of a carrier with specific commodity authority, such as a petroleum or chemical transporter. Others will purchase a carrier authorized to haul different commodities from those which the purchasing carrier transports. This is done so that a carrier will not have "all of his eggs in one basket."

The acquisition of another carrier may increase the average length of haul. This often results in operating economies. Conversely, a carrier may have a long average haul and want to add intermediate points to increase tonnage through principal terminals.

The fact that future investment capital may be secured on more favorable terms by the purchasing carrier sometimes is a motivating factor. This may occur when the acquisition improves the financial well being and potential of the carrier.

The purchasing status of a carrier also may be favorably changed. The combined fleet and equipment requirements may improve the bargaining position with suppliers. The possibility, also of greater standardization of equipment, thus minimizing the investment in spare parts inventory and facilitating maintenance, is a factor often considered. In addition, internal operating improvements through better scheduling and greater utilization of equipment may result.

Many motor carriers are first-generation companies, with the founders still active. Some of these individuals are reaching the age of retirement. Through the capital gains tax they find it advantageous to sell their property. The sale also may solve an estate-tax problem. Such taxes have to be paid within a specified time after death, and forced sales often are sacrifice sales.

There are a number of motor carriers whose stock is publicly held and therefore quickly marketable. A small carrier can exchange its stock for that of such a carrier, effecting a tax free exchange. They thus acquire stock which is quoted publicly. The death of a founder also may be a motivating factor, if the heirs do not wish to continue the operation.

The desire of motor carrier management to become larger and to obtain the status of a "giant of industry" becomes the driving force for some companies.

The How of Consolidation

The consolidation of regulated motor carriers can be effected only under specified conditions. Part II of the Interstate Commerce Act provides, among other things, for consolidation of motor carriers involving not more than 20 vehicles without special application to the Commission. This is accomplished under Section

(Please Turn to Page 119)

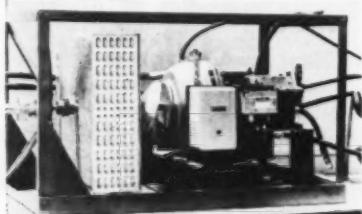

PRODUCTS

... FOR FURTHER INFORMATION

Trailer Refrigeration

A hydraulic-driven refrigeration unit for trailers with the pump driven on the rear axle has been introduced

by the **Aluminum Body Corp.** It eliminates the need for a gasoline auxiliary engine and operates at greatly reduced costs.

Circle 40 on Card Facing Page 51

Portable Freezer Van

Bailey Refrigeration Co., Inc., is the manufacturer of a new steel refrigerated cargo van which operates

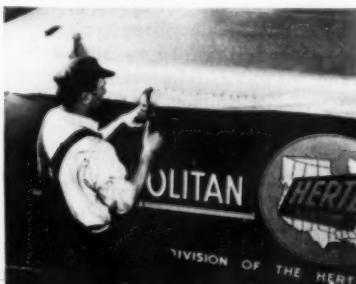

on electric current supplied by the ship. The portable freezer measures 15 ft x 10 ft x 6 ft 10 1/2 in. and maintains a temperature of 0-10 deg. An air-cooled condensing unit is used. Lugs welded to all corners facilitate hoisting of the van or securing it on or below deck. It is completely insulated with a wall of 8 in. fibreglas. Each van will store 400 cu ft of refrigerated cargo. Vans are available on either a rental or purchase basis.

Circle 41 on Card Facing Page 51

Truck Roofing Material

The **Bakelite Co., Div. of Union Carbide Corp.**, has announced a new truck roofing material made of vinyl film laminated to both sides of a nylon fabric interlayer. It can be in-

stalled in a few hours so that a truck can be returned to service the same day. The new roof covering is durable and highly resistant to moisture penetration. Calking is optional since the plastic film is highly resistant to mildew and damp rot. Silver in color, the laminate is neat in appearance and reflects heat and light.

Circle 42 on Card Facing Page 51

Three-Way Conveyor Switch

A three-way switch for automatic sorting of packages according to size, weight, or classification has been introduced by the **E. W. Buschman Co.**

It provides a quick, positive means of dispatching packages into side aisles or sending them straight through. The switch may be controlled by remote push buttons, limit switches, photoelectric cells and other electrical means. Limit switches classify packages by heights while a scale control can divert underweight or overweight packages.

Circle 43 on Card Facing Page 51

Powered Tape Dispenser

An efficient, powered tape dispenser with electronically controlled feeding, measuring, and moistening is offered by **Better Packages, Inc.** The machine is designed for a variety of

duties such as use on packing or conveyor lines. A preset key provides the correct length of tape for the package, eliminating waste. Moistening is uniform from end to end and edge to edge. Installations may be custom tailored to suit the individual taping operation. Shippers have a choice of a number of different controls for installation on shipping tables or conveyor lines.

Circle 44 on Card Facing Page 51

Portable Screw Conveyor

Baughman Mfg. Co. is producing a portable screw conveyor that will deliver up to a ton a minute. The conveyor can be put into operation on any site in a matter of minutes.

Trucks can tow it between job sites. When unloading freight cars, there is no need for pits or removing ties because it fits easily between the ties. Power can be supplied either by electric or gasoline motor. It is 15 ft long and can be raised or lowered easily by a simple hand crank.

Circle 45 on Card Facing Page 51

→ and EQUIPMENT

PLEASE USE THE READERS' SERVICE CARD • • PAGE 51

Truck Splash Guards

A new series of extra-durable splash guards for trucks of all types is produced by Acme Rubber Mfg. Co. Div., Acme-Hamilton Mfg. Corp. They may be personalized by adding

the name of the fleet owner in embossed white rubber letters. They are made with overlaid strips of heavy conveyor-belt duck sandwiched lengthwise between two layers of ground tire cord rubber composition.

Circle 46 on Card Facing Page 51

Permanently Sealed Caster

Albion Industries, Inc., has developed a permanently sealed caster which employs precision-moulded

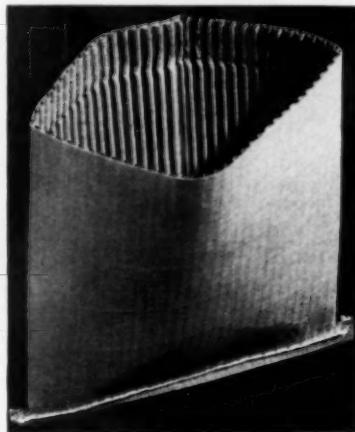

ring seals and a formed steel retainer cup to insure the retaining of grease. The seal is inserted into a machined groove around the load race. The thrust race is sealed with a 20-gage formed steel cup. Sealed casters are available in rigid and swivel models with a variety of sizes and capacities.

Circle 47 on Card Facing Page 51

Cushioned Shipping Bag

An all-purpose cushioned shipping bag now is available from the Sherman Paper Products Corp. This light-weight, economical bag consists of a single-wall corrugated sheet, of-

fering resilient cushioning on the inside and tough protection on the outside. A range of standard sizes are offered.

Circle 48 on Card Facing Page 51

Front-End Loader

First in a new series of wheel tractors, designed for heavy-duty industrial use, is a new Model 320 introduced recently by J. I. Case Co. The tractor is powered by a high-torque 148-cu in. engine. Power steering and

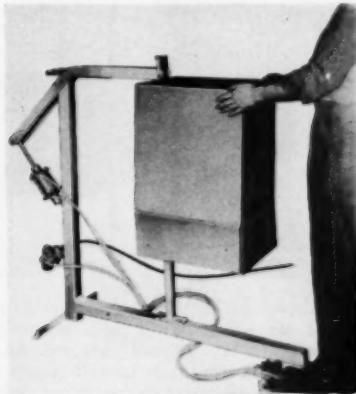

a new high-speed shuttle transmission also are available. An extra-large pump furnishes hydraulic power for both tools. The 1/2-cu yd. loader bucket features automatic power leveling, 26-deg break-out angle, and 60-deg grading angle with twin-cylinder hydraulic control.

Circle 49 on Card Facing Page 51

Air-Operated Stapler

A new air-operated stapler designed for setting up regular and end-slotted containers has been introduced by the Container Stapling Corp. It may be purchased as a combination of

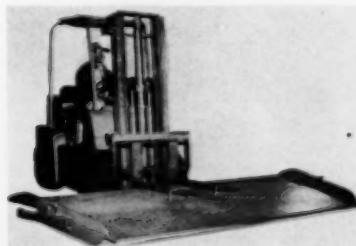

post and arm, with a post only, or with an arm only. Other applications of the stapler are erecting telescope boxes, closing bags, and setting up flat pieces of interior packaging.

Circle 50 on Card Facing Page 51

Heavy-Duty Dockboard

An extra heavy-duty all-steel welded dockboard now is available from Roll Rite Corp. It will carry up to 22,000 lb axle load capacity. The new ramp is designed to carry larger unit loads and heavier equipment over the gap between the car and dock. The board is 9-ft wide at the car door and 13-ft wide at the dock. It is 5 ft long and is equipped

with positive ratchet locking devices, dual lifting stirrups, channel understructure, and an exclusive tensioned curved crown.

Circle 51 on Card Facing Page 51

DA NEW PRODUCTS and EQUIPMENT

CONTINUED FROM PREVIOUS PAGE

Wire-Mesh Partitions

Standard wire-mesh partitions are being fabricated through mass production by **Wire and Iron Products, Inc.** Each panel is a complete unit, interchangeable and moveable. It can

be assembled quickly and installed by plant workmen. They are reusable when plant layouts are changed. Accessories in the line include hinged doors, sliding doors, dutch doors, and service windows.

Circle 52 on Card Facing Page 51

Machinery Moving Kit

For machinery and equipment weighing up to 6000 lb, **Stokvis-Edera & Co.** has developed a new moving kit. Designed to handle loads of every shape and dimension, the kit fits into

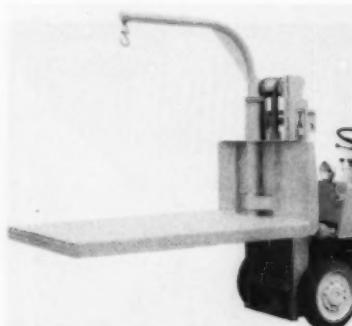

a steel case, occupying only 13 1/2 in. of shelf space. It provides an inexpensive, in-plant answer to the problem of moving bulky items in warehouses, factories, and on shipping docks. The kit consists of four roller dollies equipped with swivel heads, a cast-aluminum arm for turning the dolly, and two tandem connectors.

Circle 53 on Card Facing Page 51

Maintenance Platform

The **Yale Materials Handling Div., The Yale and Towne Mfg. Co.**, has developed a workman's platform and boom attachment for industrial lift

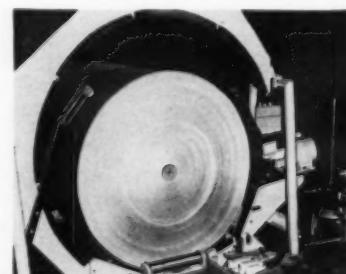

truck. It is particularly suited to maintenance work involving bulky or heavy pieces of plant equipment. The platform has 24 sq ft of working area and can be fitted with a removable guard rail for safety. The attachment's removable boom has a capacity of 300 lb and slews through 180 deg. The boom outreach is 48 in.

Circle 54 on Card Facing Page 51

Roll-End Binding Machine

The **Signode Steel Strapping Co.** Model M20-RB Roll-End Binding Machine, together with a minimum of two 15-ft sections of power conveyor and electrical controls, provides a

completely automatic strapping operation for the ends of large paper rolls. The machine can handle up to 70 rolls an hour, depending on the average diameter of the rolls and the nature of the conveyor equipment used. The rolls can be 32 to 60 in. in diameter and any width that can be handled by the conveyor.

Circle 55 on Card Facing Page 51

Rubber Batten Doors

A new line of all rubber, tear-resistant batten doors developed by **Jamison Cold Storage Door Co.** permits faster mechanized handling of goods in warehouse operations. The new doors are built to withstand the constant battering of trucks and pallets moving at high speeds. They pro-

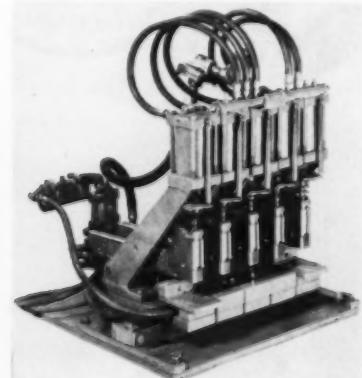

vide a tight seal for maintaining desired temperatures during loading and unloading in heated or refrigerated rooms. Wider pallet loads will pass through doorways equipped with these self-closing doors. The doors can withstand repeated abuse from off-center impact and corner cutting of power operated equipment.

Circle 56 on Card Facing Page 51

All-Purpose Stapler

A new, air-operated, all-purpose stapler available in either multiple head or single units has been announced by **Fastener Corp.** Multiple head units drive a number of staples

simultaneously and automatically. Single units are suitable for mounting on workbenches as convenient bench staplers. Both single and multiple unit staplers utilize a single-unit frame which is mass-produced without a stapling head.

Circle 57 on Card Facing Page 51

Lift Attachment and Rack

Handling normally palletized goods without using pallets is possible with a new attachment developed by Lewis-Shepard Products, Inc. The attachment consists of multiple forks, a side-shifter, and a push-off device. These are used with special racks also made up of multiple forks.

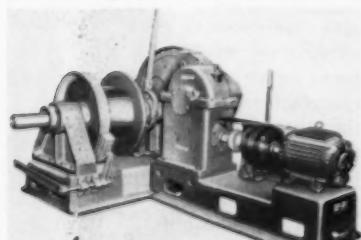

Packages placed on the racks are picked up by passing the multiple forks through the intervals in the rack shelving. It is especially effective where complete selectivity of each unit is desired and when individual unit loads are moved directly from storage to the outbound highway trailer. The push-off device is used for unloading. A remote control button on the left side of the truck's mast permits the driver to operate the lift from beside the rack.

Circle 58 on Card Facing Page 51

Freight Car Puller

The J. B. Ehrsam & Sons Mfg. Co. is manufacturing a new two-section car puller which will spot all types of freight cars on railway spurs and sidings.

Completely assembled and aligned at the factory, the machine is shipped in two pieces. A few bolts join the

sections together for installation. Other features include a torque converter mounted directly on the motor shaft. The output torque is controlled by a shifting lever. This control may be manual where location permits or may be controlled remotely by air cylinders.

The converter has a range of torque from 10 to 100 per cent rated lead. Therefore a 50-hp installation can be varied to pull from 5 to 50 hp.

Circle 59 on Card Facing Page 51

Conveyor Turntable

Available for handling of various width skids and platforms is an improved turntable produced by the Sage Equipment Co., Inc. Easily adjusted wheel rails on the top of the turntable can be changed to suit the width of skids. In addition to diverter applications, the table can be used in

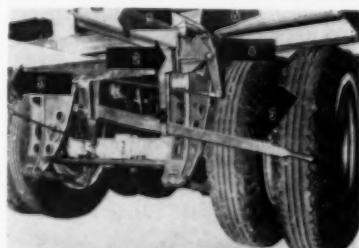

banding skids and boxes, the straps being passed between the wheels. The table is 40 in. in diameter and 36 in. high.

Circle 60 on Card Facing Page 51

Tandem Underconstruction

Freightliner Corp. has developed an improved tandem underconstruction for both fixed and sliding type units. Lighter and stronger than earlier tandems, the underconstruction

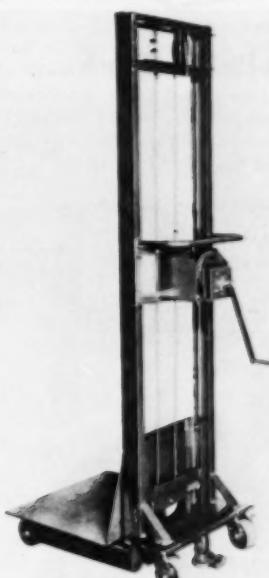

includes better brake geometry, absence of lubrication fittings, adjustable radius rod on one side with one-piece radius rods on the other, bonded metal mountings, and improved spring location. The illustration shows a sliding tandem which utilizes an adjustable axle position for meeting varying length and load laws. Arrows 1 and 2 indicate the two spring loaded locking pins that lock the suspension directly to both of the hat-shaped suspension support members. Arrow 3 shows the locking handle in a depressed position. The spring loaded locking pins (4) are designed to remain engaged even if the actuating mechanism is sheared off in an accident. Arrow 5 indicates the hat-shaped supporting members while Arrow 6 indicates one of the four heavy-duty clamps which anchor the suspension to the supporting members.

Circle 61 on Card Facing Page 51

Hand-Operated Lift

A mechanical lifter, raised or lowered by cranking, is being offered by the Colson Corp. It features a positive-acting safety device and will lift up to half a ton. Dimensions are: vertical lift from floor level, 69 in.; lowered height, 4 1/2 in.; overall height, 79 1/2 in.; platform, 24-in. square;

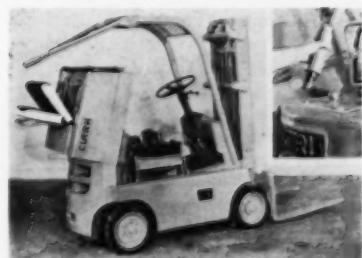

overall working depth, 38 in.; storage depth, 34 in. width of base, 22 in. Lift speed is 1 1/2 in. per crank revolution. Handle effort is 34 lb.

Circle 62 on Card Facing Page 51

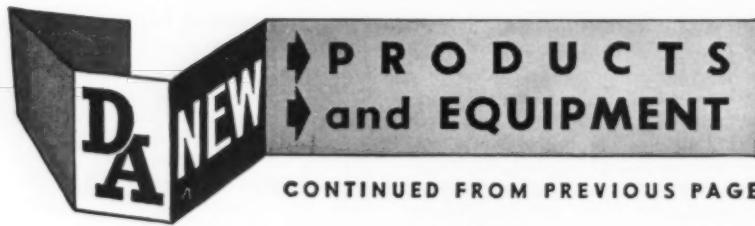

Overhead Guard

Quick access to the engine is permitted by a spring-loaded overhead guard introduced by Clark Equipment Co.'s Industrial Truck Division for its Clarklift line of fork trucks. Rear

support of the guard is a spring-loaded strut that swings up and out of the way, providing room for the hood to be tilted back during engine maintenance. Easy removal of the Clarklift hook-type counterweight also is provided. Front supports are bolted to the fork truck chassis. Low overall height permits clearance through a standard seven foot door opening, yet retains headroom.

Circle 63 on Card Facing Page 51
(Please Turn Page)

CONTINUED FROM PREVIOUS PAGE

Stock-Picking Truck

Ideal as a tool table, a stock-picking truck, or a semi-live storage rack is a new truck manufactured by the Lansing Co. Stock can either be piled

on its shelves or moved in tote pans.

Circle 64 on Card Facing Page 51

One-Man Truck Crane

A one-man hydraulic crane for use on trucks is being distributed by Stanco Mfrs. and Sales, Inc. The new crane requires only 15 in. of space between the cab and truck bed, leaving the entire truck bed open for

loads. A range of lifting capacities from 2500 lb on the full boom of 13 ft to 6000 lb on the shortened boom of 5 ft is offered. It will lift up to 20 ft above ground level at a maximum speed of 20 in. per second. Control is from either side of the truck cab. The crane swings in a 360 deg arc.

Circle 65 on Card Facing Page 51

Powered Dock Ramp

Lit-Line Metal Industries Div. of Copperloy Corp. is introducing a powered dock ramp designed for low docks—under 48-in. high—found in

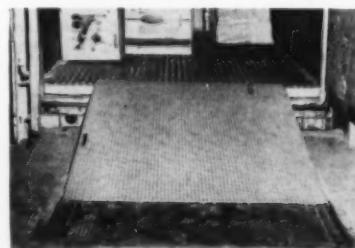

older buildings. It does not require excavation or alterations to the dock for installation. It is simply bolted to the dock surface, an operation taking about 30 minutes. Because it is mounted on the dock, vehicles do not have to be spaced away from the present dock edge. Thus interference with traffic on the sidewalk or street is avoided. It can be raised to accommodate truck beds up to 14 in. higher than the dock. A 15-in. horizontal travel motion permits it to retract behind the edge of the dock or project into the truck. The standard model is 5 x 10 ft.

Circle 66 on Card Facing Page 51

Manual Dockboard

A manually operated dock board that can be raised, lowered, or moved forward to close the gap between a truck and the dock has been intro-

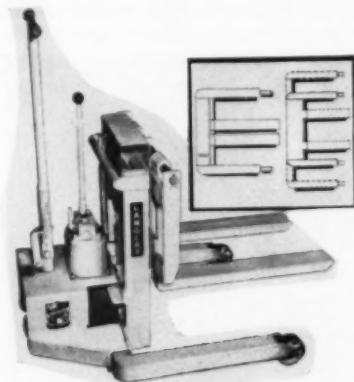

duced by Bloomer Industries, Inc. One man can operate the installation easily and safely. Its fully mechanical system requires little maintenance other than greasing.

Circle 67 on Card Facing Page 51

Hand-Operated Transporter

A new straddle lift truck that combines into one unit the ability to perform three operations has been introduced by Langley Manufacturing Co. The hand operated transportor handles skids, pallets and rolls, as well as

machines and reels, accommodating various size pallets and skids. Base straddle members adjust to provide inside straddle member clearance of from 33 to 49 in.

Circle 68 on Card Facing Page 51

Truck Transmission Jack

A hydraulic, heavy-duty truck transmission jack is now being distributed by the Blackhawk Mfg. Co. Designed to support, position, and hold securely all types and sizes of truck transmissions and differentials, it also is an aid in changing clutches. The need for more than one man in this type of operation is eliminated.

Circle 69 on Card Facing Page 51

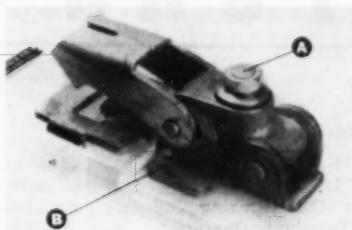

Improved Barrel Truck

Several unique features have been incorporated into the new barrel truck manufactured by the Dico Co. A new finger tip control quickly locks the truck in a safe standing position. A new chime hook permits the efficient handling of all types of barrels and fibre drums. Less load is put on the handles when the truck is empty, reducing operator fatigue. A dust seal on the inside and a dust cap outside have been added to the roller-bearing wheels. The wheels never leave the floor in any part of the operation.

Circle 70 on Card Facing Page 51

Worm-Gear Container Clamp

The Specialty Hardware Dept. of the Bassick Co. is producing a new worm-gear-actuated clamp for heavy-

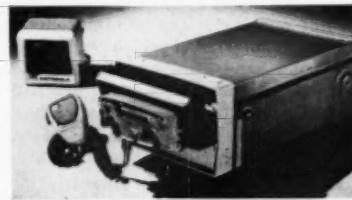

duty containers. The new lock is capable of providing an air-tight, moisture-tight seal in steel, aluminum or plastic.

Circle 71 on Card Facing Page 51

Mobile Radios

Using all-electronic power supplies, a new line of mobile radio units recently announced by Motorola elimi-

nates vibrator replacement problems. Called the "T-Power" radiophones, the new two-way radio units incorporate a transistorized switching circuit in the power supply in place of the conventional vibrator.

Circle 72 on Card Facing Page 51

Mastless Fork Lift

The Automatic Transportation Co. has designed a fork lift truck without a mast. It will lift up to 10 ft. A heavy-duty truck, it has lifting capacities ranging from 12,000 to 20,000

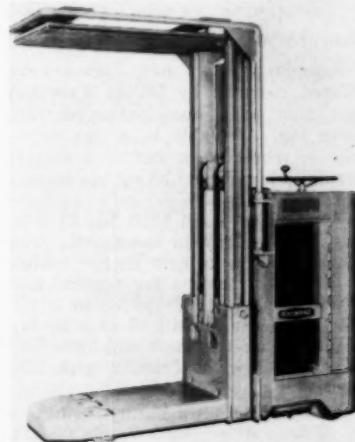

lb. Eliminating the mast assembly has reduced the overall weight and increased the operator's visibility. In order to facilitate tiering, the new truck offers a 10-deg back and 5-deg forward tilt. The driver is well protected on the sides by the counterweight and in the rear by a heel plate. The operator's platform is mounted from the rear. Overall width is 48 in.

Circle 73 on Card Facing Page 51

Load Stabilizer

A special load stabilizer attachment has been designed by The Raymond Corp. for use on its narrow-aisle platform trucks to permit speedy and safe lateral movement of tall unstable loads. The stabilizer frame is made of tubular steel. A flat pres-

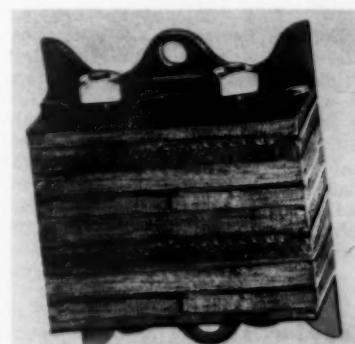

sure plate which contacts the top of a load is rubber faced and is supported by a spring arrangement at each corner. Loads of any height can be handled with this attachment. The platform of the truck elevates a load until the top of the load touches the pressure plate. A limit switch automatically shuts off the lift pump when enough pressure is exerted against the plate to hold the load securely.

Circle 74 on Card Facing Page 51

Rubber Dock Bumpers

Rubber-coated fabric truck bumpers, designed for mounting anywhere on a truck body to prevent damage to trucks, buildings and loads, are being manufactured by Bumpers, Inc.

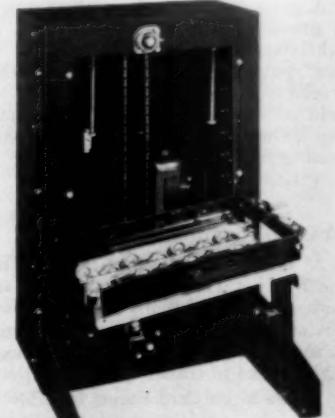

Known as Flex-O-Rubber Truck Bumpers, they act as a cushion by taking the impact and absorbing it. Construction allows for reversing the fabric so that life of the bumper can be doubled.

Circle 75 on Card Facing Page 51

Vertical Transfer Unit

Changing the direction of a conveyor system flow in minimum space is possible with a new vertical transfer unit developed by The Rapids-Standard Co., Inc. Eliminating the need for a 180-deg curve, the mechanism accomplished the direction change by a vertical lift which operates as a self-supported, automatic unit. The vertical transfer is placed at the end of two conveyor lines located in a direct vertical plane.

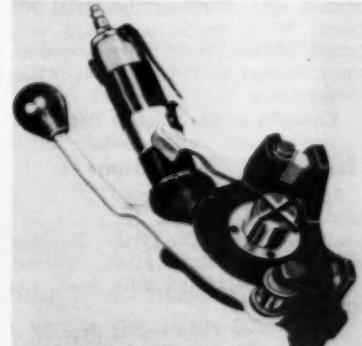

Cartons coming off the upper track of the conveyor flow onto a wheel conveyor section mounted on the lift platform. The carton trips a starting switch starting the mechanism. The platform drops to the lower track, automatically tilting to start the carton away from the unit.

Circle 76 on Card Facing Page 51

Air-Powered Strapping Tool

A new air powered tool for heavy duty strapping has been announced by Brainard Steel Div., Sharon Steel Corp. Specially designed for heavy-duty strapping on pallets, skids, car-

bracing, and large bundles, the new tool, known as "PNC," weighs only 12 lb. Despite its light weight, the PNC, because it is air powered, achieves a high degree of tensional uniformity on steel band.

LITERATURE

Cargo Securing System

A quick, sure way to control cargo is presented by General Logistics, a subsidiary of Aeroquip Corp., in a new publication. The system uses tracks mounted on the carrier wall to hold rolled steel beams. These beams can be used as a base for an extra loading floor or as shoring bars.

Circle 85 on Card Facing Page 51

Trailer-Towline Catalog

A three-color, 12-page catalog of the Nutting Truck and Caster Co. illustrates the company's trailer-towline order picking system. In addition, it shows the application of balance-style trucks to trailer-train operation.

Circle 86 on Card Facing Page 51

New 300-Gal. Liquid Tank

A publication by Tote System, Inc., introduces a new 300-gal container for industries interested in liquid containers larger than drums. The tanks are equipped with a standard drum closure at the top, permitting easy access to the interior for filling, cleaning, and inspection.

Circle 87 on Card Facing Page 51

Hydraulic Accumulator

Yale Materials Handling Div., The Yale and Towne Mfg. Co. has published a bulletin describing the functions of an accumulator in the hydraulic system of an industrial lift truck. When trucks are used over rough terrain, these devices reduce shock impact to the load and lifting mechanism.

Circle 88 on Card Facing Page 51

Lift Truck Specifications

Specifications on Model FT-20, a 2000-lb capacity fork lift truck, are available from The Baker-Raulang Co. The new truck is battery powered, operates at 5.2 mph with load, and weighs 4600 lb.

Circle 89 on Card Facing Page 51

Wooden Pallet Folder

Atlas Pallet and Lumber Sales, Inc., illustrates its eight types of wooden pallets in a new folder. In addition, the nationwide pallet producer lists other services which it offers.

Circle 90 on Card Facing Page 51

Samples of Two Forms

Samples of two new forms were offered recently by Milbin Printing, Inc. One is a combination drivers daily log. Available in either duplicate or triplicate, it combines a drivers daily log, report of vehicle inspection, and a ton-mile gas mile tax form on one sheet. Each book has 31 sets, one for each day in the month. The other form is a new motor vehicle lease and agreement for common and contract carriers. Prepared in triplicate, the lease is utilized as a 30-day or more lease-trip lease and household goods lease, in conformity with ICC regulations.

Circle 91 on Card Facing Page 51

Adjustable Steel Shelving

Adjustable steel shelving for warehouse use is described in a bulletin by the Penco Metal Products Div., Alan Wood Steel Co. The six-page bulletin illustrates the company's six basic types of shelving and their construction features.

Circle 92 on Card Facing Page 51

Engineered Packaging Plant

AACON Contracting Co., Inc., engineer and builder of packaging for overseas shipping, presents its facilities in an easy-to-read, 38-page booklet. Illustrated are both indoor and outdoor facilities of the firm.

Circle 93 on Card Facing Page 51

Pallet Load Unloader

Builders Equipment Co. is offering literature on its Superlite Unloader. Primarily designed for the handling of masonry products, it can be used to handle anything that can be palletized and which will conform to the inside dimensions of the unit. The unloader can be installed on any standard flat bed truck. It can be transferred from one vehicle to another by a fork lift.

Circle 94 on Card Facing Page 51

Container Catalog

A 16-page catalog prepared by the Continental-Diamond Fibre Corp. describes the company's complete line of materials handling containers. Details are given on vulcanized fibre trucks, trays, boxes, baskets, seamless roving cans, and barrels.

Circle 95 on Card Facing Page 51

Radio for Trucking

General Electric Co. has published a 12-page brochure on two-way radio in the trucking industry. Entitled "Terminal Operation," the bulletin shows how radio communications contribute to reduced terminal costs, increased capacity, faster service, and greater sales. It also describes GE's new Progress Line mobile radio equipment.

Circle 96 on Card Facing Page 51

Strapping Problems Discussed

Answers to modern strapping problems are contained in a new manual prepared by A. J. Gerrard and Co. The company is producing a complete line of automatic and semi-automatic strapping machines which will apply flat steel band, oval and round wire, and glass filament reinforced pressure sensitive tape.

Circle 97 on Card Facing Page 51

Corrugated Box for Liquids

Producers of dairy products, putty, mastic, animal foods and other liquid and semi-liquid products can now ship in light-weight, expendable containers. These containers, consisting of a plastic bag in a corrugated box, has recently been studied by the Fibre Box Assn. As a result of its studies, the group has prepared a guide for potential users of this type of container.

Circle 98 on Card Facing Page 51

Containers for Dry Chemicals

Savings made possible by shipping chemicals in corrugated bulk containers are covered in a four-page brochure published by Gaylord Container Corp. Div. of Crown Zellerbach Corp. Case histories illustrating various types of corrugated boxes which have been used successfully in the chemical industry are included.

Circle 99 on Card Facing Page 51

One Man Crew Handling

A new circular describing the One Man Crew handling system is available from Lewis-Shepard Products, Inc. The One Man Crew is a system where each employee works alone, serving simultaneously as a stripper, checker, and loader. He is not dependent on fellow employees to provide him with work. This eliminates costly waiting time.

Circle 100 on Card Facing Page 51

Accordion Gravity Conveyor

Food Machinery and Chemical Corp. describes and gives specifications for its line of accordion gravity conveyors in a new leaflet. The flexibility of these conveyors makes them adaptable to a wide variety of uses. They can be adjusted both as to length and heights. Connected with fixed sections of roller or belt conveyors, they can be used for loading and unloading of transportation vehicles. They are fully portable and can be used for temporary diversions of material flow.

Circle 101 on Card Facing Page 51

Van Lines Booklet

As a service to the moving public, Allied Van Lines is distributing a booklet that tells parents how to help their children over the emotional bumps of a change of address. Called "When Families Move," it was prepared in collaboration with the Child Study Assn. of America.

Circle 102 on Card Facing Page 51

Preventive Maintenance Plan

A 20-page manual prepared by Berg Mfg. and Sales Co. describes a simple truck-trailer preventive maintenance program. This plan was drawn up by the Truck-Trailer Mfrs. Assn. to meet the basic requirements of all trailer operators.

Circle 103 on Card Facing Page 51

Ship Services Directory

The Port of New York Authority has recently completed its 1957 edition of the "Port of New York Steamship Services Directory." It lists the names, addresses and pier locations of 200 steamship lines and agents offering regularly scheduled services at the port. It also lists foreign, inter-coastal, and coastwise steamship services available via the Port of New York and over 300 points reached by these lines.

Circle 104 on Card Facing Page 51

Filing System Organizer

Tools and techniques that assist the American secretary are the subject of a booklet recently prepared by Remington Rand Div. of Sperry Rand Corp. In its 16 pages, the brochure tells how a properly organized filing system can save time. Filing equipment also is discussed as well as a list of rules of progressive filing.

Circle 105 on Card Facing Page 51

Packaging Heavy Goods

How to cut costs, simplify packing and improve efficiency in the packaging of heavy products are subjects discussed in a new edition of "How to Ship Heavy Products in Corrugated Boxes," published by Hinde & Dauch. The 28-page booklet offers a dozen illustrated case studies.

Circle 106 on Card Facing Page 51

Battery Users Manual

The complete scope of motive-power battery maintenance and repair is described in a revised edition of the "Battery Users Manual," just issued by the Industrial Div. of Gould-National Batteries, Inc. Developed as a result of in-plant training courses, the 44-page book has been designed to enable plant engineers, superintendents and foremen to conduct an organized training course in their own plant. The manual includes over 60 photographs, diagrams and tables to review battery theory and construction, demonstrate proper selection, illustrate charging method and equipment, and demonstrate testing.

BOOKS

Business Finance

"Financing Goods," a new textbook written by Albert G. Sweetser, associate professor of economics, Wisconsin State College, takes as its central theme the financing of goods from the time they are grown or extracted until they are bought by a consumer. Emphasis is placed on transactions and relationships which constitute the essence of business activity, on documents by which they are represented, and on laws by which they are governed.

Supporting information is introduced about the lending operations of commercial banks and other financial institutions; marketing systems; public warehousing; and pertinent legal procedures and instruments.

The author uses seven chapters to explain public warehousing and its role in financing business.

"Financing Goods," featuring 624 pages and 286 illustrations, is available in a cloth binding at \$8. Orders can be placed with Albert G. Sweetser, 160 Lincoln St., Newton Highlands 61, Mass.

Catalog of Reports

A catalog of 118 technical reports in the field of packaging and materials handling in the collection of the Office of Technical Services, U. S. Dept. of Commerce, has been published recently.

Some of the reports are the results of research by government laboratories or by other facilities under contract to Federal agencies. Others are German documents captured by the Allies in World War II.

This catalog, CTR-72, "Packaging and Materials Handling, 1941-1957," is offered for 10 cents. Orders can be placed with the Office of Technical Services, U. S. Dept. of Commerce, Washington 25, D. C.

Outdoor Fork-Lift Truck

A four-page publication describing the features, specifications and operating characteristics of a new 6000-lb capacity fork truck for outside handling is available from the Industrial Truck Div., Clark Equipment Co. Specifications include weight, length, width, wheel base, underclearance, turning radius and tire size. Charts indicate tractive effort and gradeability in both high and low range.

Circle 108 on Card Facing Page 51

Freight Car Bracing Method

Signode Steel Strapping Co., in a four-page folder, describes five basic methods of securing rail shipments with steel strapping. They help prevent damage and facilitate fast, safe, easy unloading. Photographs and diagrams illustrate the floating load, controlled-floating load, wall-anchored load, open-top load, and car-door bracing.

Circle 109 on Card Facing Page 51

Electric Fork-Lift Truck

A 2000-lb capacity fork truck featuring fast lift and travel speeds has just been published by the Elwell-Parker Electric Co. This truck is actually a radically re-designed version of the company's Cargo Scout. Its maximum lift speed is 72 fpm while top travel speed is 6½ mph. A short turning radius and 360-deg steering for maximum maneuverability is reported.

Circle 110 on Card Facing Page 51

Materials Handling Booklet

Lower dock costs and greater freight handling efficiency are described in a new booklet, "One Man Crew," offered by Lewis-Shepard Products, Inc. This handling system breaks dock operations into three basic methods and illustrates how costs can be cut on each.

Circle 111 on Card Facing Page 51

Industrial Marking Equipment

Industrial Marking Equipment Co., Inc., announces publication of a new catalog, covering its entire line of marking, dating, and coding machines. The catalog gives detailed technical data on the Whippet Marker, No. 7 Autoprinter, Rainbow Coder, and other standard units.

Circle 112 on Card Facing Page 51

Rubber Truck Bumpers

A new catalog sheet, illustrating and describing its line of Flex-O Rubber Truck Bumpers, has been released by Bumpers, Inc. The bumpers are engineered to prevent damage to truck bodies, reduce dock damage, and protect fragile freight by absorbing impact shock caused by trucks backing into docks or other obstacles.

Know Your "MARKS"?

How good are your powers of visual recognition? Shown below are 12 familiar common carrier trade marks. Most of us have seen each of these marks literally hundreds of times—yet how well do we know them?

Most of the marks have been altered in some respect—some more than others. The object of this quiz is to determine which have been changed, and in what manner. Then try the quiz on your friends.

This power track ballaster spreads new stone ballast evenly—speeds maintenance!

Ties get regular cleaning and resurfacing with this power surfacer. More savings!

Mammoth blades of the combination spreader-ditcher are raised and lowered hydraulically.

CUTTING A BIG SWATH

Modern maintenance methods on the Monon pay off in more dependable, efficient service to shippers, as mammoth machines like these replace old road gangs!

More evidence of the modern Monon's determination to utilize the latest equipment in maintenance, communications and operations to cut costs to shippers. This combination spreader and ditcher with the locomotive behind it takes the place of a track crew—and does a better job faster. The result pays off in more efficient operation—dependable deliveries—savings for shippers.

By the way—can you tell just when every shipment you make will reach its destination? Do you know where every shipment is—right now? You'd know with the Monon—or could find out *fast*. Just another reason it pays to ship on the Monon.

MCA to Conduct Study Of Taxes Standards

**ICC official calls on carriers to exercise
greater control over their agents. Holder
of certificate is responsible to the public**

VIRGIL E. FREEMAN, vice president of North American Van Lines, Inc., was elected to the newly created position of president of the Movers Conference of America at a recent national convention in St. Louis.

Freeman succeeds Russell E. Garrett, general manager of the John F. Ivory Co., Detroit, as chief executive of the Conference. In a realignment of its officer structure, the Conference redesignated the top executive post "president" instead of "chairman." It also created the position of chairman of the board, to which Garrett was elected, and four vice presidents at large.

The following vice presidents were elected: James O. Delcher, Jacksonville, Fla.; Otto Offenborn, Palisades Park, N. J.; John J. Rapp, Chicago; and Dilworth S. Woolley, Salt Lake City.

Harold J. Blaine, of Los Angeles, was re-elected secretary,

and Lee J. Sloan, St. Louis, was returned to the office of treasurer.

Nine members were elected to the 18-man Conference Advisory Board. They are Herman Bader, Brooklyn, N. Y.; L. R. Burnham, Columbus, Ga.; Emmett Flavin, Chicago; John W. Geipe, Baltimore; Charles R. Israel, Indianapolis; Herbert C. Neal, Cleveland; Kenneth Nelson, Chicago; Carl Weber, Baltimore, and W. W. Warren, Oklahoma City.

Three Projects

During the meetings, three major projects were advanced. Funds were authorized to implement the work of the Tax Study Committee; action was taken to establish a Bureau of Standards to determine bases of fair competition and standards of service; and a public relations program was launched to tell the movers' story to the public.

The Bureau of Standards, the

Conference explained, is to formulate basic principles governing the quality of service to the public and principles of fair competition between carriers. These principles will be translated into definite standards which can be made effective through certain machinery to be set up. It is proposed that the industry have a "Seal of Approval" for carriers adhering to the standards.

The Tax Study Committee, headed by Vice President Woolley, will attempt to develop a fair, simple and easily enforced method of highway use taxation for movers and a policy for handling immediately specific tax cases.

The public information program has been planned by a committee headed by James R. Jolley. Telling the movers' story to the public will mean seeking and coordinating information on newsworthy accomplishments, setting up a library of information and photographs for writers, and stockpiling human interest stories suitable for articles dealing with movers' problems.

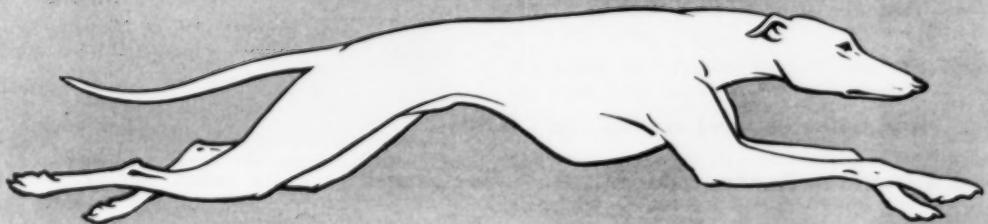

Long-range objectives include scholarships, fellowships, a library of movies and still pictures, and expansion of the speakers bureau.

Control of Agents

W. Y. Blanning, director, Bureau of Motor Carriers, ICC, told the Assembly that carriers must exercise greater control over their agents if they are to avoid more restrictive regulations.

"A carrier holding a certificate is responsible to the public and

Sliced-Up Tank Car Expedites Handling

Aluminum tanks on steel cradles carry hardened oil
from Toronto to Newfoundland by train, boat, truck

By M. M. Gutwillig

WHAT do you do when you're shipping bulk liquid in tank-car volume but your consignee doesn't have a railway siding? One answer is use conventional drums.

Lever Brothers Ltd., Toronto, wasn't ready for any "small container compromise" in solving such a problem recently. Hence, for bulk shipments of refined, hardened, and blended vegetable oils to their margarine plant (Newfoundland Margarine Co., Ltd.) at St. John's, Newfoundland, they conceived a totally new container-in-pallet.

When loaded five to a railway flat car, it belongs more to the

genus tank than to the drum family. In fact, these containers may be looked upon as a tank car in five sections. Each tank can be transferred from a railway car to a steamship deck, back to a railway car and then handled by special truck from the car to the St. John's plant.

Holds 12,000 Lb

The aluminum shipping tank holds 12,000 lb of oils in contrast to the 400-lb returnable drums formerly used. Over-all height, taking in the aluminum-painted steel cradle is 8 ft 11 in. up to the filling dome. Over-all weight is

about 14,400 lb. Diameter of the tank is 7 ft 8 in.

Lever sees these economies: Less labor cost at Toronto through less handling, filling, washing and reconditioning of drums. At Newfoundland, physical handling required for drums will be sharply trimmed; the new containers will cost less in the long run than the large quantity of drums required.

Problems Solved

Problems in bringing oils to the Newfoundland plant were: lack of a railway siding; the Newfoundland Railway operates on a different gage track than the mainland lines; and there was no car ferry service from Nova Scotia to Newfoundland.

In sizing up their needs, Lever Brothers saw a container which could be delivered by a Load Lagger in St. John's. It needed steam coils for melting the oil. It had to be adaptable to firm securing on a flat car without involving heavy outlay for special fastening equipment.

The basic idea was generated by Lever's Traffic Department and, working with the Canadian National Railway's Mechanical Division and two metal fabricating firms, Lever's Engineering Department designed the container. Lever owns them. About 30 will be needed if a full 50-week shipping schedule is evolved. For such a program, the

Only New HALLOWELL ERECTOMATIC® Steel Shelving

STRAIGHT-IN, STRAIGHT-OUT SHELF CHANGE. No tilting. No dismantling. No interference with any other shelf.

INDEPENDENT SHELF POSITIONING. Each shelf can be repositioned individually in seconds.

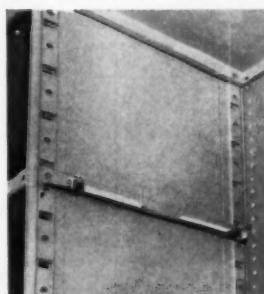

FULL USE OF SHELF AREA. No tees or angles, and beaded posts save valuable space.

COMMON SIDE PANELS AND POSTS save material between adjacent units in a rack. Back and side panels are one-piece.

BEADED POSTS AND FLANGED SHELVES prevent snagging of clothing or stored goods, protect workers.

FULL DEPTH SHELF SUPPORT. No buckling possible. Reinforcements can be added when required.

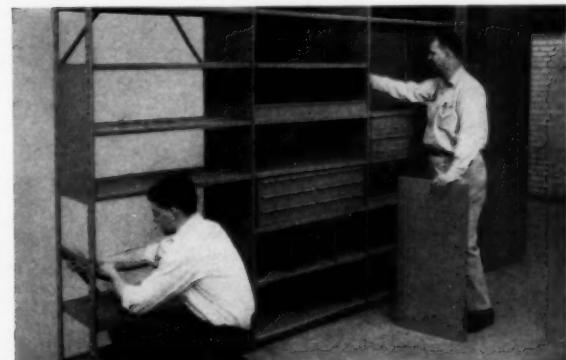

4 CLASSES OF SHELVES. Regular, medium, heavy and extra-heavy construction meets all load requirements.

Circle No. 15 on Card, Facing Page 51, for more information

**cuts assembly time,
permits fast repositioning of shelves
—gives you these plus features**

No matter what type of shelving you need—open, closed, bin units, ledge units, counters or cabinets—new Hallowell ERECTOMATIC® steel shelving makes the job easy. The unique built-in locking device*—developed by SPS—speeds assembly and rearrangement of shelves. To position a shelf, slide it into place on the shelf supports, press the locks, and the shelf is locked. To reposition a shelf, release the locks, pull the shelf straight out, slide it straight in on its supports at the new location, and press the locks. It takes only seconds to do the complete job. Made of prime steel, phosphate coated, and finished in SPS green baked-on enamel—other colors are available. Hallowell ERECTOMATIC steel shelving is stocked by leading industrial distributors and shop equipment dealers. For complete information, see the one nearest you. Or write Hallowell Shop Equipment Division, STANDARD PRESSED STEEL CO., Jenkintown 77, Pa.

*Patent applied for

TWO MEN ASSEMBLED new Hallowell ERECTOMATIC steel shelving in just over 10 minutes. Closed unit was 36 in. wide, 18 in. deep, 7 ft. 3 in. high, complete with seven shelves. Standard models of other design required 13-55 min. Table shows test results.

Delaware & Hudson, Lehigh & Hudson River, New York, Ontario & Western, and Pittsburgh & West Virginia participate in this traffic as intermediate carriers.

THE RAPID growth of trailer-on-flat-car service has, in a little over two years, ended the need for the DA Piggy-Back Routing Guide, a directory of points receiving this type of service.

DISTRIBUTION AGE, in September, 1955, pioneered in bringing its readers this directory. At that time it included 37 railroads covering 157 major and several minor points. The response to this first Guide was overwhelming.

To keep up with expansion of Piggy-Back Service, DA revised the Guide in April, 1956, listing at that time more than 1200 points in the United States and Canada. In January of this year, the Guide was revised. Service then reached about 2000 points via 50 carriers.

Most Points Served

A survey was made recently in preparation for another revision. Information obtained from this survey indicates that most of the rail lines are providing Piggy-Back Service to the majority of points in the U. S.

The extent of this service is widely publicized by the railroads. Routing information on interterritorial traffic now is contained in the various agency tariffs.

In view of this, the Guide could no longer serve its original purpose. While DISTRIBUTION AGE is proud of its achievement in initiating the Guide, there is no practical reason to continue it.

However, among the lines offering TOFC service, there are variations which the shipper needs to know. These services, in chart form, are listed on the left side of this page.

A "yes" marking (Y) in the first column indicates that when a shipper's trailer is used an allowance is made for the time that it is in the railroad's possession.

Some lines, in addition to carrying their own trailers, carry the trailers of motor common carriers. These are shown in the second column.

The refrigerated service listed is dry ice. In addition to this, some lines provide electrical connection.

Mud Guard Requirements

Mud guard provisions are included in the motor vehicle requirements of 25 states. States and their requirements are charted below.

In general, the basic requirement is that rear wheels must be protected at the top and rear by the vehicle's body or by metal protectors, flexible

flaps, or some other protective means which will minimize spray or splash to the rear, and which are at least as wide as the tires they protect.

These general requirements are referred to in the chart as "Basic." Additional requirements are listed in

the footnotes. It should be noted that there are some minor variations even in the basic requirements from state to state.

Under the heading "Vehicles Affected," the word "All" includes trucks, tractors, trailers, semi-trailers, pole trailers and buses.

State	Vehicles Affected	Requirements	Exemptions	State	Vehicles Affected	Requirements	Exemptions
Cal.	All over 1500 lb net weight	Basic	None	N. Y.	All	Basic. See Note 12.	None
Conn.	All over 3 tons GVW	Basic	Farm Vehicles. Others requiring complete wheel freedom.	Ohio	All over 3-tons GVW	Basic. See Note 4.	None
Ga.	All	Basic. See Note 1.	None	Okl.	All	Basic	Animal-drawn vehicles and farm tractors
Idaho	All	Basic. See Note 6.	None	Ore.	All	Basic. See Note 6.	Truck chassis not equipped for hauling a load. Truck, trailer or semi-trailer equipped with bunks
Ill.	Trucks, trailers, semis	Basic. See Note 2.	See Note 2.	Pa.	All commercial vehicles	Basic. See Note 7.	None
Maine	Trucks, trailers, semis	Basic	Trucks under 7-ton GVW, dump trucks, truck-tractors	R. I.	All	Basic	Vehicles requiring complete wheel freedom
Mass.	All	Basic	None	Tenn.	All with carrying capacity of over 3000 lb	Basic, as approved	Farm vehicles. Vehicles used exclusively for hauling logs
Mich.	Trucks, trailers, semis	Basic. See Note 3.	None	Texas	Vehicles with 4 or more tires on rear axle operated on wet highways	Basic. See Note 9.	Pole trailers
Minn.	Trucks, trailers, semis	Basic. See Note 4.	Pole trailers. Rear end dump trucks	Utah	All commercial vehicles	Basic. See Note 10.	Buses
Miss.	All over 10-tons GVW	Basic. See Note 5.	Pole trailers, dump trucks and trucks carrying an "F" license	Va.	All with carrying capacity over 22,500 lb	Basic, as approved	Vehicles used exclusively for hauling logs
Nebr.	All new vehicles purchased after Jan. 1, 1956	Basic	None	Wash.	All	Basic	None
N. H.	All	Basic, as approved	None	Wisc.	Truck-tractors and inter-city trucks and semi-trailers	Basic. See Note 11.	Vehicles equipped with dump bodies
N. J.	All over 3 tons, gross	Basic, as approved	Pole trailers, dump trucks, tanks, and vehicles requiring complete wheel freedom				

REFERENCE NOTES

1. Ground clearance under any loading conditions must not be more than 1/5 of the distance from center of rearmost axle to center of flaps.

2. Ground clearance must be 10 in. when loaded to maximum legal capacity. Flaps may be of flexible or rigid material; must parallel tread surface through top rear quarter of tires (or to within 2 in. of body if clearance between body and tires is less than 5 in.); must be as wide as tires, and must be mounted within 6 in. of tire (when fully loaded), and have lip or flange on outside edge extending at least 2 in. below flap bottom surface. Flaps on vehicle purchased before Aug. 1, 1957, must meet specifications after Jan. 1, 1958. Exemptions include intrastate vehicles capable only of using temporary splash guards approved by state police, 2-axle farm vehicles, pole trailers, dump trucks, cement mixer trucks, grain trucks, construction and drilling equipment, and vehicles operated mainly within municipalities or adjacent areas. Department of Public Safety may require non-contour flaps on exempted vehicles.

3. Guards must bar water or other road surface substances thrown from the rear wheels at tangents exceeding 22½ deg measured from the road surface. If flap type device is used, it must not have attached any type of lamp, reflective material or reflecting buttons, nor can the device extend beyond the maximum width limit of the vehicle.

4. Ground clearance cannot be more than 1/5

of the horizontal distance from the center of the rearmost axle to the flap under any conditions of loading or operation and must be at least as wide as the tires. If rear wheels are not covered at the top by fenders, protective means must extend at least to the center of the rearmost axle.

5. Ground clearance cannot be more than 1/5 of the distance from the center of the rearmost axle to the center of the flaps under any conditions of loading. Commissioner of Public Safety may exempt vehicles whose design and construction are such that the purposes of the act cannot be met. If rear wheels are not covered at top, flaps must extend to a point directly above the rearmost axle. Lamp or wiring must not be attached to protectors or flaps.

6. Trucks equipped with a body and buses, bus trailers, semitrailers and trailers must have the rear wheels guarded from a point above and forward of the center of the tire over and to the rear of the wheel to a point not more than 10 in. above the highway surface when the vehicle is empty. Trucks not equipped with bodies must have guards behind the rear wheels downward from a point not lower than halfway between the center of the wheels and the top of the tires on such wheels to a point not more than 10 in. from the highway surface when the vehicle is empty. All other motor vehicles must have guards behind all wheels, from a point above and forward of the center of the tire over and to the rear of the wheel to a point not more than 20 in. above the highway surface.

7. Device must bar water and other road sur-

face substances thrown from the rear wheels at tangents exceeding 22½ deg measured from the road surface and passing in a straight line to the rear of the vehicle.

8. Ground clearance cannot be greater than 1/5 the horizontal distance from the center of the axle to the flap. Devices must be of a type approved by the Commissioner of Safety. Lamps, wiring or reflectorized material must not be attached to the flaps.

9. Guards or flaps must extend to within 6 in. of the highway surface and must be of approved type.

10. Ground clearance cannot be more than 1/2 of the diameter of the rear axle wheel or not more than 1/5 of the distance from the center of the axle to the flap under any condition of loading. If rear wheels are not covered at the top, the protective means must extend to at least the center line of the rearmost axle.

11. Ground clearance cannot be more than 1/3 of the horizontal distance from the center of the rearmost axle to the flap under any conditions of loading or operation; and must be at least as wide as the tires. If rear wheels are not covered at top by fenders, protective means must extend at least to the center of the rearmost axle.

12. Must be substantial and reasonably flexible. Ground clearance may not exceed 1/3 of horizontal distance from flap to point of contact of wheel with ground.

SAFETY EQUIPMENT REQUIREMENTS

... Required and permitted on trucks, truck-tractors, trailers and buses as specified in ICC safety rules and regulations, state motor vehicle laws and official rulings . . . Compiled by National Highway Users Conference

TABULATION OF SAFETY REQUIREMENTS ON PAGES 64 & 65

EXPLANATION OF ICC REFERENCES

‡—The I.C.C. Motor Carrier Safety Regulations apply to "Automotive Safety Equipment" on vehicles operated by common and contract carriers ("for hire" carriers) of persons or property and by private carriers of property, when operated regularly in interstate or foreign commerce except when operated wholly within a municipality, between contiguous municipalities, or within a zone adjacent to and commercially a part of any such municipality or municipalities. When vehicles of common, contract or private carriers are transporting explosives or other dangerous articles the last-mentioned exception does not apply.

†—Requires "a device or other means of preventing or removing ice or frost" from windshield.

*—I.C.C. neither approves nor disapproves any individual required item. Its Motor Carrier Safety Regulations, however, set forth certain constructional details or performance standards to which certain items must conform. Reference should be made to the Motor Carrier Safety Rules for complete details.

COLOR AND REQUIREMENT SYMBOLS

A—Amber
G—Green
R—Red
N—No
NP—Not Permitted
NR—Not Required
NS—Not Specified

NSM—Not Specifically Mentioned
Y—Yes
Ye—Yellow
W—White
/—when used between two letters or numbers means "or."
Example—2/4 means "2 or 4."

GENERAL FOOTNOTES

a—Prohibits red light visible from in front of vehicle.
b—Prohibits red or green light visible from in front of vehicle.
c—Tail lamp or separate lamp shall illuminate rear license plate with white light.
d—Must be located and constructed so as to illuminate rear license plate with white light.
e—May be incorporated in tail lamp.
f—Semaphores required on school buses.
g—One or both may be incorporated in tail lamp or lamps.
h—Number plate must be illuminated with white light.
i—Reciprocity on commercial vehicle lighting equipment exists between New York and a majority of the states.
j—Also two yellow or amber reflectors on front of vehicle.
k—One may be part of tail lamp.
l—Permitted on commercial vehicles over 80 in. wide.
m—Reflectors may be substituted.
n—Reflectors may be used when vehicle has acetylene lamps.
o—Two required on new vehicles first registered after Jan. 1, 1958.
p—White, green or amber. Where green originally used, may be continued till replacements are necessary.
q—Signal lamps are specified. (Colo., Utah and Wisc. (new vehicles) effective Jan. 1, 1958.)
r—Yellow or orange flags required.
s—On vehicles over 45 feet long, rear clearance and marker lamps shall be in combination.
t—One green marker lamp every 10 feet on combinations over 33 feet long.
u—New vehicles shall have double wipers.

v—2 on new vehicles other than truck tractors. No exception for truck tractors in Pennsylvania.
w—New vehicles.
x—Or rear clearance lights required by I.C.C.
y—Trailer and semi-trailers shall have one lamp on front visible from both sides.
z—Clearance and marker lamps may be in combination.
aa—Every vehicle 72 in., or more wide must have 2 amber or clear front, and 2 amber, clear or red rear reflectors. Clearance lamps may be substituted. Reflectors must be approved. Clearance lamps need not be approved.
bb—Plus two auxiliary passing lamps (Calif.—effective Sept. 11, 1957; Colo.—effective Jan. 1, 1958).
cc—Effective Jan. 1, 1958.
dd—On interstate buses—green lights adjacent to destination sign or near upper corners;
On intrastate buses—purple lights in same locations.
ee—Double wipers required on all school buses.
ff—Two yellow stop lamps required on all buses.
gg—If originally equipped with two, both must be operative.
hh—Two reflectors also required on front—reflectorized material extending breadth of vehicle may be substituted.
ii—Clearance and marker lamps may be in combination. When in combination there must be one such lamp on each side, midway of vehicle.
kk—Permits tinted other than red.
xx—Fog lamps are included within the term "Auxiliary Driving Lamps" and are treated accordingly.
zz—Plus 1 auxiliary passing lamp.

Data Revised to September 15, 1957

*—See Note at right.

Table—There is a table of axle weight based upon tire widths.

—X—Vehicles over 35-ft length must have 4 axles.

—Plus weight on front axle of vehicle.

—With power brakes.

—104 in. for urban uses.

—60 in. buses permitted subject to certain restrictions.

—40-ft 2-axle vehicle permitted on designated highways.

—60 ft on enumerated highways (major interstate routes).

—Vehicles registered after March 1, 1956.

—Except on 3-axle single units.

—47.5 if drive on both rear axles.

—Buses permitted 40 ft in Va.; 42 ft in Del.; 45 ft in Okla.

—45 ft in Ga.

—Auto transporters allowed 13 1/2 ft (also covered vans in Wash., baled hay or straw carriers in Md., hay, straw or small boat carriers in Mich.).

—Tolerance permitted.

—Graduated according to tire width.

—Mich.—32,000 lbs on one set of tandem axles in a combination on designated highways; Miss.

—32,000 lbs. on designated highways; Ohio—31,500 lbs. on axles spaced over 8 ft but less than 8 ft apart.

—50 ft for auto transports.

—50 in. tolerance permitted auto transport semi-trailers.

—Buses permitted 40 ft on designated highways.

—10 ft for auto transports and moving vans.

—In designated highways.

—Va.—Vehicles over 35 ft with lengths up to 60 ft permitted on State Highway Route Nos. 86 and 242.

—All consecutive axles of 5-axle combination may not exceed 60,000 lbs.

—On "Class A" highways.

—On "Class B" highways.

—Axles less than 10 ft apart limited to 16,000 lbs per axle.

—Maximum shown. In practice, permissible gross weight de-

NOTE ON "W" AND ASTERISK

Except when shown by asterisk or when followed by the letter "W," the above gross weight limits are the limits fixed by state law.

When shown by asterisk the above limits are computations made by the National Highway Users Conference to show what it considers to be practical gross weights where gross weights are arrived at by application of one of the formulae shown below under Footnote "X." In making these computations, when the maximum weight of the vehicle is less than the total over-haul weight, front and rear from permissible overall length of unit or combination, tandem axles are considered to be a minimum permissible distance apart. When actual over-haul is less than 8 ft, additional gross weight will be possible.

When followed by the letter "W," the limits shown are maximum possible weights where gross weight is determined by permissible axle weight. These limits are possible only when each axle carries a gross weight equal to the permissible axle limit as shown.

—Depends on class.

—Permissible on balloon tires.

—Other than balloon tires.

—2-axle buses permitted 23,625 lbs. The maximum net weight; 2-3-axle bus, 31,500 lbs.

—NP—Not permitted.

—NR—No specified.

—NS—Not specified.

—S—See notes.

—T—with the following exceptions full trailers are permitted the same gross weight as other single units.

—Ala., Conn., Iowa, Ky.,—Full trailers prohibited.

—Mass.—Trailer and load limited to 3,000 lbs.

—Tenn.—Trailer and load limited to 3,500 lbs.

—Va.—Semi-trailers prohibited.

—X—States where gross weight is determined by formula. (See "Bridge Formula" below.)

—Y—States where gross weight is determined by formula. (See "Bridge Formula" below.)

—Z—See "Restrictions Peculiar to Certain States" on next page.

AXLE SPACING

Ala.—Gross weights graduated from 32,000 lbs if axle spacing is 4 ft to 50,000 lbs if spacing is 35 ft or more.

—25 ft or more for 3-axle combinations and to 66,000 lbs if spacing is 45 ft or more.

Ariz. & Calif.—Gross weights graduated from 32,000 lbs if axle spacing is 4 ft to 60,000 lbs if spacing is 4 ft to 76,800 lbs if spacing is 35 ft or more.

Mass.—Gross weights graduated from 32,000 lbs if axle spacing is 4 ft to 60,000 lbs if spacing is 4 ft to 76,800 lbs if spacing is 35 ft or more.

—4 ft to 88,000 lbs if spacing is 56 ft or more.

Oklahoma—Gross weights graduated from 32,000 lbs if axle spacing is 4 ft to 65,000 lbs if spacing is 4 ft to 66,000 lbs if spacing is 38 ft or more.

—4 ft to 76,800 lbs if spacing is 56 ft or more.

—4 ft to 88,000 lbs if spacing is 56 ft or more.

—4 ft to 92,000 lbs if spacing is 56 ft or more.

—4 ft to 96,000 lbs if spacing is 56 ft or more.

—4 ft to 100,000 lbs if spacing is 56 ft or more.

—4 ft to 104,000 lbs if spacing is 56 ft or more.

—4 ft to 112,000 lbs if spacing is 56 ft or more.

—4 ft to 120,000 lbs if spacing is 56 ft or more.

—4 ft to 128,000 lbs if spacing is 56 ft or more.

—4 ft to 136,000 lbs if spacing is 56 ft or more.

—4 ft to 144,000 lbs if spacing is 56 ft or more.

—4 ft to 152,000 lbs if spacing is 56 ft or more.

—4 ft to 160,000 lbs if spacing is 56 ft or more.

—4 ft to 168,000 lbs if spacing is 56 ft or more.

—4 ft to 176,000 lbs if spacing is 56 ft or more.

—4 ft to 184,000 lbs if spacing is 56 ft or more.

—4 ft to 192,000 lbs if spacing is 56 ft or more.

—4 ft to 200,000 lbs if spacing is 56 ft or more.

—4 ft to 208,000 lbs if spacing is 56 ft or more.

—4 ft to 216,000 lbs if spacing is 56 ft or more.

—4 ft to 224,000 lbs if spacing is 56 ft or more.

—4 ft to 232,000 lbs if spacing is 56 ft or more.

—4 ft to 240,000 lbs if spacing is 56 ft or more.

Extra space...at no extra cost with a modern *Butler* warehouse!

Butler buildings have been used in the construction of thousands of warehouses for public merchandise . . . raw materials and finished stock. They have proven to be a new way to build better storage facilities at low cost.

For example, compare the interior of a Butler warehouse, utilizing modern engineering and building techniques, with a conventional warehouse. The overhead trusses, rows of posts . . . thick, load-bearing walls have been eliminated. Instead, there is clear, uncluttered, post-free, truss-free space from wall to wall and floor to roof. There is extra, built-in space you can utilize . . . extra capacity without the expense of additional floor space.

Pre-engineered Butler warehouses eliminate expensive design and engineering costs. Mass-

produced and precision made they take less time to erect, too. Your new warehouse starts earning profits weeks even months sooner than traditional building methods permit.

The unique design and construction of a Butler warehouse offer advantages that no other method of building can match. Expansion can be accomplished quickly, at low cost. Illuminating, heating, ventilating are less expensive. Maintenance and upkeep is minimized as well.

For further information on these permanent, weather-tight, firesafe buildings, contact your Butler Builder. He is an expert at building efficient, profitable, low-cost warehouse and storage facilities. Ask him to show you special sound-slide film on warehouse planning and construction. He is listed in the Yellow Pages under "Buildings" or "Steel Buildings" or write direct.

WIDE-SPREAD CLAMP

Attachments Work Best on MERCURY

Mercury Fork Trucks are your best investment for use with special attachments. Their basic design anticipates and provides for added weight, low load center and off-center handling common in attachment use. Mercury's patented hoist system *alone* distributes weight evenly in *off-center* carrying. From side-shifter to barrel clamp, *every* attachment becomes an *integral* working part of Mercury trucks. That's why they save time and money...minimize downtime and speed handling.

Write and learn why attachments work best on Mercury.

Have You Looked
Into the New

WHITE 3000

with the power-tilt cab

FOR VAN SERVICE?

New power and stamina! New maintenance savings. New fuel economy!

Riding ease and excellent maneuverability!

These are just a few of the many profitable advantages of the new White 3000 for van service.

The new high cab has improved visibility and safety . . . new driver comfort. And the powerful Mustang Engine is more efficient—it's packed with power and able to cut hours off schedule time.

Look into this new White . . . now!

THE WHITE MOTOR COMPANY
Cleveland 1, Ohio

White
3000

Bought First White Quarter Century Ago . . . Still Sold on White Quality
Two new White 3000's with the Power-Tilt Cab were just added to the Great Neck Storage Fleet, Great Neck, Long Island, Creighton McShane, Vice President—White users since the early thirties. These new White 3000's are the ideal unit for van service because they are engineered to the exact requirements of this business.

Directory of For-Hire Motor Carriers

The following pages contain listings of for-hire motor freight carriers from all over the country. The data include such basic information as the carrier's type of operation, general area of operation, his principal terminals, number and type of highway vehicles, classification and tariffs and amount of cargo insurance.

To use the data, the shipper need but consider the fundamental problem: The cities between which the cargo is to be carried. Assume that a shipment of goods must be made to Dallas and that

the nearest warehousing point is Denver.

To locate a motor carrier for that shipment, we can employ these two methods:

1. We turn to the state of Colorado, then Denver. Then we go down the listings to determine if any of the carriers operate in Texas, and have a Dallas terminal.

2. The process may be reversed by determining if there is a carrier in Texas who has terminals in Dallas and Denver.

An explanation of the abbreviations used can be found on Page 108.

EVERY HANDLING PROBLEM ANSWERED! EASY GUIDE TO COST CUTTING!

**With over 2,200
especially drawn
illustrations**

This monumental text is the most comprehensive book on materials handling ever published! 636 pages jammed full of facts to give you the know-how when you need it (no advertising). An absolutely basic book for those who must know everything on the subject and come through with the answers!

MATERIALS HANDLING EQUIPMENT

by D. Oliphant Haynes, Consulting Engineer

Internationally known, Mr. Haynes is Materials Handling Consultant for **DISTRIBUTION AGE**, and brings to this book the culmination of a lifetime devoted to solving materials handling problems around the world!

Add 10 feet
or 1,000

Build your conveyor system
the quick-change

ERECTO way

Your conveyor system can be managed like a boy manages the electric railroad he got for Christmas with Lamson Erecto Conveyor Units. Whether it's 10 feet or 1,000, you add as many feet as you need, *when you need them*. Put in curves, spurs, ball top tables, turntables. Adjust quickly to changes in plant layout. You can't outgrow a Lamson Erecto system because as you grow, it can be expanded to your needs.

Supplied in 10 ft. standard lengths, pre-engineered Erecto Units are always in stock for quick delivery — can be used with any conveyor system you now operate. Available in Wheel and Roller Gravity, Live Roll and Belt, light and heavy-duty drives, unit boosters. Your Lamson Dealer will help you with the Erecto installation. Your own men can do the work without special tools. No engineering charges! No outside labor!

When Revlon Moved, So Did Erecto

When Revlon (\$64,000 Question) Inc. moved to its new plant in New Brunswick, N. J., it took along part of the Erecto installation from its old plant. That's *flexibility* — the kind only Lamson Erecto will give you. Speedy delivery of in-stock Erecto Units of every type helped Revlon make its quick move.

*TRADE-MARK

LAMSON

Highway . . .

(Continued from Page 35)

highway purposes died in seven state legislatures this year. Such an amendment is pending in New Jersey.

Motor Fuel Taxes

Six states enacted gasoline tax increases this year. Fifteen states had been asked to consider such increases.

The rate in **Indiana** was increased from 4¢ to 6¢ per gallon on March 15. **South Dakota's** increase, from 5¢ to 6¢, became effective July 1. **Utah** increased its tax from 5¢ to 6¢ May 13. **Vermont** increased its rate from 5½¢ to 6½¢ July 15. The revenue from these increases is to be distributed in the same manner as under their previous tax rates, but in each case the increased revenue apparently is scheduled for federal-aid matching.

Beginning June 1, **Oklahoma's** tax rates on gasoline and special fuels were increased from 6.58¢ to 7.58¢ to pay for roads and bridges damaged by floods. The rate in **Nebraska** will be increased from 6¢ to 7¢ effective Sept. 17, and revenue from the increase is to be allocated 77 per cent to state and 23 per cent to counties. A 1¢ increase is pending in **New Hampshire**.

Special fuel tax rates were increased also in those states (except **Vermont**, which has no such tax) and rates are the same as the gasoline tax rate. **Wyoming** increased its tax rate on special fuel from 4¢ to 7¢ on April 1.

Montana and **Pennsylvania** have enacted tax reductions. On Jan. 16, 1958 Montana's tax will reduce from 7¢ to 6¢, and on June 1, 1957, Pennsylvania's tax was reduced from 6¢ to 5¢.

Maryland and **Connecticut** (buses only) enacted interstate fuel-use tax laws, and the **Tennessee** tax was amended to apply to three-axle vehicles or those exceeding 24,000 lb.

Registration Fees

Mileage tax bills (including "weight-distance" taxes) were in-

troduced in 10 state legislatures. These states are: **California**, **Connecticut**, **Illinois**, **Iowa**, **Maine**, **Massachusetts**, **Minnesota**, **Montana**, **New Mexico**, and **North Dakota**.

North Dakota effective July 1, imposed a tax ranging from 1½¢ to 3¢ per vehicle-mile on vehicles having three or more axles. A companion law makes this apply primarily to vehicles over 24,000 lb that are not carrying North Dakota plates. A new schedule of mileage tax rates was enacted in **Idaho** for vehicles over 6,000 lb gross weight that are propelled by fuel other than gasoline, in lieu of fuel taxes.

California amended its 3 per cent transportation receipts tax to reduce the rate to 1.5 per cent after Dec. 31. **Kansas** increased registration fees slightly for smaller trucks. **Maine** increased its truck fees about seven per cent. Registration fees for trucks exceeding 27,000 lb gross weight were increased about 20 per cent in **Minnesota**. A previously adopted general registration fee increase in **Maryland** was repealed, while an increase for for-hire vehicles was postponed until 1958.

Bills in **Ohio** sought repeal of the axle-mile tax and substitution of an additional 1¢ fuel tax or a straight mileage tax. Corresponding with increased gross weight limits in **Oklahoma**, a registration fee of \$470 was fixed for trucks between 46,001 and 50,000 lb, and a fee of \$495 for those between 50,001 and 66,000 lb.

Texas increased registration fees for all vehicles by about 10 per cent. **Vermont** increased truck fees approximately 10 per cent. **Washington** increased its basic registration fee for all vehicles from \$5 to \$6.50. **Wyoming** amended the Carrier Compensatory Tax to provide a new schedule of fees and mileage tax rates and a tax on diesel fuel users of 7¢, instead of 4¢ per gallon.

Uniform Vehicle Code

Proposals increasing conformity of state laws to provisions of the Uniform Vehicle Code ranged this year from those embracing the entire Code to those adopting parts of sections

BRAINS... who needs 'em?

Perhaps not this beauty! But recently a research laboratory in London needed the best brain money could buy. An electronic "brain" was located in New York. To save on elaborate crating and to assure gentle handling, the technicians turned to KLM Air Cargo. Next day the brain was clicking out answers in London with nary a miss or a falter.

Serving Europe, the Near, Middle and Far East, South Africa and the Americas

SEATTLE

*means
business!*

George Z. Lefton, President

**"Tried all other
West Coast ports...
find Seattle the
best," says major
importer.**

George Zoltan Lefton Co., Chicago

The Problem

Import chinaware from Japan by fastest, most economical route for further shipment to major markets throughout entire United States.

The Solution

Direct water shipment to Seattle, thence by rail to distribution center—taking advantage of direct short route from Japan and utilizing services of railroad foreign freight staff.

The Proof

Mr. George Z. Lefton, president, George Zoltan Lefton Co., Chicago, says, "Having tried all other West Coast ports, we find Seattle the best. We get better service, a direct short route from Japan with frequent sailings, prompt loading of cars. Another important factor is the excellent cooperation of the Milwaukee Road's foreign freight staff."

Complete dockside facilities, two days sailing closer to the Far East...connections with nine major airlines, four trans-continental railroads, more than 100 truck lines to all North America, plus intelligent aid in solving marketing problems. You get them all at the *enterprising* Port of Seattle.

If you have a marketing problem, write direct to...

M. J. WEBER, Vice-President

H. M. BURKE, General Manager

"PORTSEA"

Highway . . .

(Continued from Preceding Page)

Wisconsin passed the entire Code almost verbatim. Illinois enacted the first nine chapters of the Code, containing definitions, providing a department of motor vehicles, certificates of title, and anti-theft provisions, licensing of dealers, driver license provisions and financial responsibility.

Nevada and New York enacted the Rules of the Road Sections. Colorado and Utah passed equipment provisions, but a similar bill died in Oklahoma.

Certificate of title and anti-theft provisions were passed in Connecticut and South Carolina. Similar bills died in Minnesota and New York.

Nebraska, Nevada, and South Dakota created separate motor vehicle departments, but a bill for this purpose died in New Mexico.

Equipment Requirements

Except for comprehensive measures in Colorado and Wisconsin, equipment enactments this year were confined to individual items of equipment. Vehicle lighting was the subject of most equipment legislation. The new laws generally increased conformity to the Uniform Vehicle Code. (For complete State Highway Safety Equipment Requirements, see Page 63 in this issue.)

Eleven states lowered the minimum mounted height for headlamps to 24 in. or less. Fourteen states amended their laws to permit more than two headlamps, in conformity with the Code, to legalize the use of the new dual headlamp lighting system. On approval of the pending Alabama measure, containing these provisions, the new headlamp system will be legal throughout the country.

Traffic hazard warning lamps now are permitted in Colorado, Connecticut, Florida, Idaho, Iowa, Oregon, and South Carolina.

Auxiliary driving and passing lamps provisions of the Code were enacted in California, Colorado, Idaho, Montana, and Utah.

Code requirements on clearance lamps were enacted in South Dakota and Wisconsin.

Identification lamps now are permitted in Colorado, Idaho, and South Carolina. A South Dakota measure provides that such lamps are mandatory.

Tail lamp and stop lamp laws, requiring two each on new vehicles were enacted in California and Colorado. Wisconsin requires vehicle originally equipped with two, to have both in working order.

Turn signal requirements were made into law in Arkansas, Colorado (effective Jan. 1, 1958), Kansas (on new vehicles after Dec. 1, 1959), and Montana.

California enacted the Code requirement for turn signal devices when the distance from the steering post to the left side of the vehicle or load exceeds 24 in.

Other Equipment

In addition to lighting requirements the following items of equipment were the subjects of new laws:

Exhausts—California measures authorize the Air Pollution Control Board to set and enforce specifications for equipment used on motor vehicles to control the issuance of air contaminants. Another California law prohibits directing exhaust gases to the side of a vehicle between 2 and 11 ft from the ground.

Brakes—Montana and Iowa permit three-axle vehicles to have one brakeless axle (Iowa specifies front axle of truck or truck tractor.)

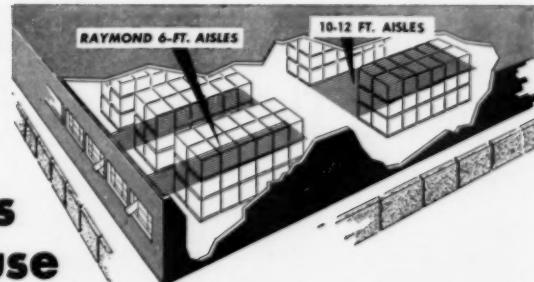

Brake fluid—The Code provision for minimum standards was enacted in Arkansas, Oklahoma, Pennsylvania, and Texas.

Mudflaps—Illinois and Wisconsin amended specifications, and Maine specified that semi-trailers are subject to requirements.

Safety glass—Colorado enacted the Uniform Code provision. Tennessee provided that "tempered glass" will satisfy safety glass requirements only in rear windows. The requirement for approval of safety glass was repealed in Wisconsin.

Horsepower—Pennsylvania reduced minimum net brake horsepower from 50 to 30.

Trailer hitches and safety
(Please Turn Page)

Increases warehouse capacity . . . as much as 50%

3000 lb. CAPACITY

RAYMOND
Reach-Fork
TRADE MARK

WHY BUILD OR LEASE additional storage when there's space to be had right in your present warehouse? A Raymond Reach-Fork . . . the truck with "boarding-house reach" . . . may increase your warehouse capacity up to 50%.

THE REACH-FORK eliminates wasteful 10 to 12-ft. aisles . . . permits you to tier in space-saving 6-ft.* aisles. No special racks or pallets required because it operates from the aisle, without straddling bottom pallet. Its forks extend to pick up or deposit your load . . . retract in seconds.

IDEAL FOR LOADING and unloading. Stacks pallets closely on racks, in truck trailers, boxcars, bulk storage areas. Safe on elevators and low-capacity floors. Raymond power unit is highly accessible, opens up like a book for ease in servicing. Reach-Fork available in 2,000 or 3,000 lb. capacities . . . may be leased or purchased over 1 to 3-year periods if you wish.

*For exact aisle width, ask Raymond representative to survey your operation.

THE RAYMOND CORPORATION

13981 Madison St., Greene, N. Y.

Please send Bulletin on Raymond Reach-Fork. I am interested in:

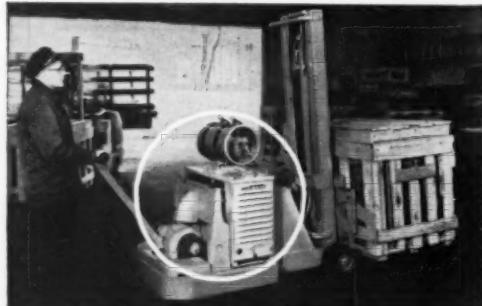

- 2,000 lb. cap. Reach-Fork.
- 3,000 lb. cap. Reach-Fork.

Get the Advantages of READY-POWER on Your Electric Industrial Trucks

Get Live Power for Walkie Trucks

Ready-Power's popular bantam model "W" is equipped with dependable 12-volt automotive-type starting and ignition. Variety of idling speeds and easy accessibility make it ideal for all walkie trucks as well as rider trucks up to 2,000 lbs.

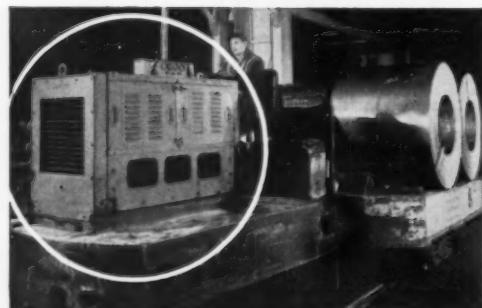

Work Your Fork, Platform, Tractor Trucks 'Round the Clock

Ready-Power gas-electric and LPG-electric units give materials handling trucks continuous, full power all the time. Slowdowns due to power fatigue are eliminated. The simple, all-electric control and live response make Ready-Power-equipped trucks rate high with truck operators.

Energize Lift Magnets on Your Electric Trucks

In the application shown at the left, the Ready-Power unit not only powers the truck, but also energizes the lift magnet for handling scrap metal. Ready-Power units are removable for shop adjustment while a spare keeps trucks working.

Get Diesel Electric for Lowest Ton-Mile Costs

Take a tip from the owners of industry's biggest trucks... power them with Ready-Power diesel-electric for maximum stamina, dependability, and lowest operating costs. Ready-Power offers power for every size and make of electric truck.

Your Truck is No Better than its Power... Write for Information on Ready-Power gas-electric, LPG-electric, and Diesel-electric Units

READY-POWER

The READY-POWER Co., 3821 GRAND RIVER AVE., DETROIT 8, MICH.

Manufacturers of Gas and Diesel Engine-Driven Generators and Air Conditioning Units; Gas and Diesel-Electric Power Units for Industrial Trucks

Highway...

(Continued from Preceding Page)

chains—New laws in Illinois and Wisconsin require safety chains in addition to hitches in towing utility trailers. The Illinois law also sets requirements for trailer hitches.

Rear-view mirrors—Uniform Code requirement for rear-view mirror on every motor vehicle was enacted in California and Wisconsin.

Safety belts—A new Pennsylvania law requires safety belts to be of an approved type.

Size and Weight

New laws increasing the length limit for vehicle combinations to 50 ft were enacted in Iowa, Maine, Minnesota, Missouri, New Jersey, North Carolina, and West Virginia.

An increase in truck and trailer combination length limits from 50 to 60 ft was enacted in South Dakota.

A new Oregon law permits tractor semi-trailer combinations a length of 60 ft on enumerated highways (major interstate routes) and permits three-unit combinations with a length of up to 60 ft on State Highway Routes Numbers 86 and 242.

Gross weight limits have been increased in Maine, Minnesota, Missouri, Oklahoma, and South Dakota. New higher maximum gross weight limits are: Maine, 60,000 lb; Minnesota, 72,500 lb (with not more than 60,000 lb on any four consecutive axles of a 5-axle combination); Missouri, 64,650 lb; Oklahoma, 66,000 lb; South Dakota, 73,280 lb.

Illinois increased the weight limit for three-axle trucks with "spread tandems" (over 72 in. apart) to 45,000 lb.

A bill awaiting the Governor's approval in Wisconsin, would increase the gross weight limit on Class A highways to 73,000 lb.

Height limits have been increased to 13½ ft in Colorado (designated highways), Nebraska, North Dakota, and Ohio. (For complete State Size and Weight Limits, see Page 66 in this issue.)

Periodic Inspection

Periodic motor vehicle inspection measures conforming generally to the provisions of the Uniform Vehicle Code were introduced in 17 states this year. These proposals, however, were not acted upon.

Financial Responsibilities

Vehicle liability insurance legislation was proposed in most states.

Twenty-seven legislatures were asked to enact a system of compulsory liability insurance similar to those now in effect in **Massachusetts** and **New York**. The most common proposal would require proof of financial responsibility as a requirement for obtaining vehicle license plates. Such a proposal has been enacted into law in **North Carolina** for the period Jan. 1, 1958, until May 15, 1961.

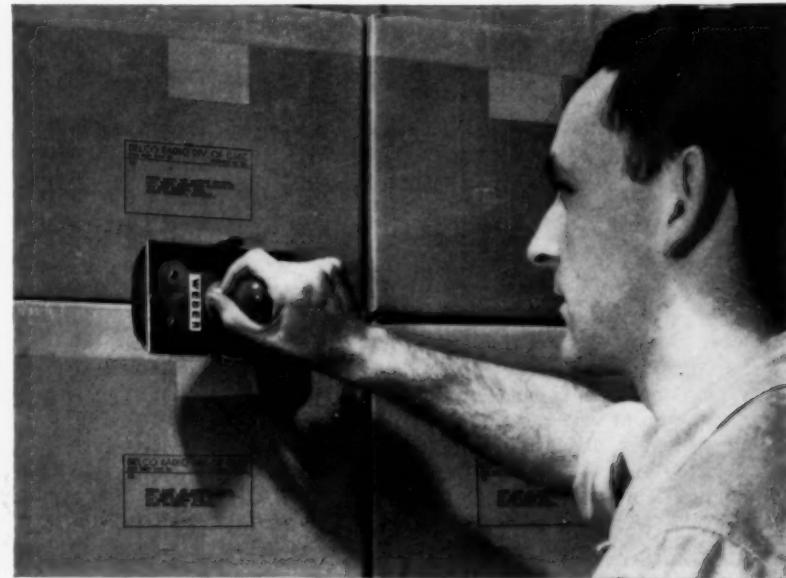

Unsatisfied judgment fund laws were proposed in 13 states, and such a law was enacted in **Maryland**.

Amendments to existing financial responsibility laws were introduced in several states. Fourteen states were asked to increase the amounts of insurance coverage necessary to satisfy requirements of the financial responsibility laws. These amounts were increased in **Georgia** (\$5/10/1,000 to \$10/20/1,000) and in **California, Indiana, Iowa, and Pennsylvania** (\$5/10/1,000 to \$10/20/5,000).

Kansas and **South Dakota** enacted new financial responsibility laws based on the Uniform Code provisions. These require the furnishing of security following an accident and proof of financial responsibility for future operations of motor vehicles. *

(Resume Reading on Page 36)

For complete listing of State Size and Weight Limits and State Safety Equipment Requirements see Page 66.

These labels can't come off

They're facsimile labels. You print them directly on cartons. Saves cost of real labels. Faster than brush stenciling. Cuts shipping losses.

Here's a fast, systematic way for addressing multiple shipments. In one easy motion, you can imprint both a facsimile label and customer's address directly on a carton. 30 to 40 cartons can be addressed in a minute. No labels to type or apply; no ink brushes and stencilboards to wield. Facsimile labels are sharp and clear, yet can be easily blocked out for re-handling by consignee.

All that's needed is a Weber hand-printer and Kustom-Kut stencil. Stencils are die-cut with facsimile of your label. All you do is type the customer's address on the stencil and attach to the printer. Fast, neat, systematic and inexpensive. Write for full details on the Weber Facsimile-Label System.

Good for product identification marking too.

... Traffic on Rails

(Continued from page 37)

for their use in storage, economy of packaging, handling, etc., possess their own supply of pallets. These may be either flat pallets or open or closed pallet-boxes.

Such pallet shipments are charged under usual conditions according to the scale applicable to the merchandise of which they are composed. This is based on the total weight of the consignment from which is deducted a "tare forfaitaire" not exceeding 25 kg. for flat pallets and 60 kg. for open or closed box-pallets. On their return-empty journey the pallets are charged at reduced rates.

In order to benefit from this tariff the pallets must conform to agreed specifications. For use in the shipment of small parcels, pallets must measure either 80 x 120 cm. or 100 x 120 cm. and conform to other constructional requirements. However, for the shipment of complete wagon loads, of

which the loading and off-loading is undertaken by the shipper and consignee, respectively, dimensions other than these may be used, and forms of pallets, adapted to particular requirements are admitted.

S.N.C.F. loans pallet-boxes on request and against a loan charge. Shipment charges are the same as those for shippers owning their own pallets, but there is, of course, no return-empty charge.

Pallet Pool

In order to stimulate, even further, the use of pallets and pallet-boxes in France the S.N.C.F. adopted a new pallet pool system. Under the scheme the user, basically, equips himself with the number of pallets or pallet-boxes normally required by him.

On despatch of a palletised consignment he uses a pallet or pallet-box taken from his own stock.

When the S.N.C.F. receives this shipment at the station of despatch it at once delivers to the shipper an identical empty pallet or pallet-box to recompense him for that now in course of transit on the railway.

When this same pallet load is delivered to the consignee the latter immediately reimburses the S.N.C.F. at the station of arrival with a similar empty pallet from his own stock.

In this way, both shipper and consignee can always maintain their stocks of pallets and pallet-boxes at a constant level. Other appreciable advantages of the system include the elimination of the return empty pallet and the expense normally associated with this. The shipper does not experience any break between the process of internal handling and external transport. He can prepare his shipments in advance and in a rational way suited to his own system. On receipt, the consignee can off-load the pallet at his own convenience.

The pool system implies com-

Encinal...

"MAGIC CARPET" TO WESTERN MARKETS

If your profit margin in the fabulous western market is being slashed by inefficient storage, shipping, and delivery — make Encinal your choice. There are good reasons why — Encinal offers *complete terminal facilities* (everything you would want from your own branch office).

• TRUCKING

• STORAGE	• DISTRIBUTION	• STORAGE-IN-TRANSIT
• WEIGHING	• CAR LOADING, UNLOADING	• STENCILING
• INSPECTION	• PALLETIZING	• RECONDITIONING
• MARKING	• STRAPPING	

Pipe-line and storage tank facilities for liquid bulk shipments, too.

ENCINAL... 750,000 sq. ft. of modern warehouse space in the *best* Central Location on the Pacific Coast — on the mainland side of San Francisco Bay.

ENCINAL... served by 66 major steamer line services... direct connections with three trans-continental railroads... served by all local, regional and transcontinental highway carriers.

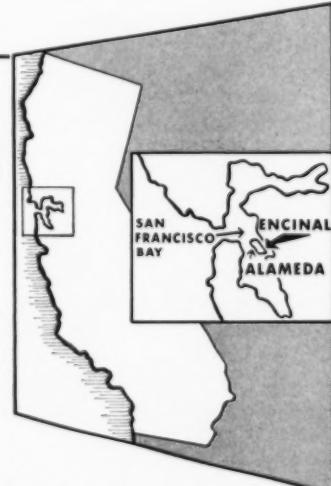

Write for Encinal's new brochure, today!

Encinal TERMINALS AND WAREHOUSES

Alameda, Oakland and San Leandro, Calif.

Main Office: P. O. Drawer A, Alameda, Calif., Telephone Lakehurst 3-1311

plete interchangeability between the pallets owned by the S.N.C.F. and those owned by its clients, and, consequently, the use of such pallets as are strictly identifiable with those of the S.N.C.F. and provided by manufacturers agreed between them. These fall into three categories: the pallet, the open pallet-box; and the closed pallet-box.

At present, this formula is not applicable to the transport of small parcels. Its extension to complete wagonloads is granted exceptionally and under certain conditions. In such cases, only the simple pallet may be used. It is felt, however, that this pool system will undoubtedly be recognized as an important development in palletised load shipments, especially when circumstances and stocks of equipment allow it generally to be extended to cover all complete freight carloads.

Piggy-Back Methods

Another method by means of which rapid door-to-door shipment is being made possible in France is the piggy-back system. Special 24-ft. road trailers, which can be hauled by standard tractors, are used. They are fitted with auxiliary flanged dolly wheels that run on rails along the edges of the flat-cars. When loaded on the flat-cars they are held by special shock absorbing clamps at each dolly wheel.

Piggy-backing has become a sizeable industry in France and the specially designed cars and terminals have been constructed by the Compagnie Francaise de Material de Chemin de Fer, one of Europe's largest car builders. •

OCTOBER 1957

INCREASE PAYLOADS with
General Logistics' Quicker, Safer,
More Adaptable Cargo Control System

HERE'S HOW IT WORKS... (a) Industrial track is installed along inside of carrier walls. (b) Cold rolled steel beams, with spring loaded end fittings are quickly and easily secured in track by one man... base for an extra loading floor, or shoring bars, to segregate and prevent shifting of cargo. (c) General Logistics TRACKLOCKS are snapped into the track wherever required, as end fittings for Aeroquip WEBLOCK II assemblies (for lighter duty tiedown); or, as shown, with a short loop of 1-inch nylon webbing, as attaching points for larger WEBLOCK assemblies (for heavier duty tiedown). Aeroquip WEBLOCK assemblies tighten with a pull... lock automatically... release with the touch of a finger... the greatest advance in cargo handling since the old fashioned knotted rope.

General Logistics is the foremost manufacturer of industrial and aircraft cargo tiedown and load control equipment including web and rope cargo nets; tiedown straps and buckles; and aircraft track, track fittings and stud fittings, for quick attachment and removal of aircraft equipment and accessories.

WEBLOCK is an Aeroquip trademark

Steel goes NKP Piggyback for Speed... Dependability

A Chicago steel fabricator needed reliable, on schedule, freight service to his Baltimore warehouse. The solution—NKP Piggyback. Among the many advantages he discovered: dependable service in any weather, equipment always available when needed, careful handling and competitive rates.

NKP Piggyback also has these added advantages: shipper and consignee always know location of shipment, rail safety and dependability, competitive service and

rates on all traffic and between all points where Piggyback service is maintained. We would like to serve you. For more information call your local NKP representative today... he'll be happy to work with you.

Section 22 Amendment Signed by President

President Eisenhower on Aug. 31 signed into law Senate Bill 939, which amends Section 22 of the Interstate Commerce Act. The new law requires that Section 22 rate quotations be submitted to the ICC and be open to public inspection. It also provides that Section 5a should apply to agreements relating to or procedures for the joint consideration, initiation, or establishment of rates, fares, or charges, and rules or regulations pertaining thereto. The House Amendment, which would have excluded household goods carriers from the provisions of Section 22, was not included in the new law.

Club Briefs

The Nominating Committee will be selected at the Oct. 21 meeting of the Traffic Club of Syracuse.

The Women's Traffic Club of San Francisco recently announced two one-year scholarships to the Golden Gate School of Traffic.

Ruth Gail Conger, a member of the Board of Associated Transport, Inc., spoke at the September meeting of the Women's Traffic Club of New York.

The Women's Traffic Club of Philadelphia opened the new season with a Sept. 10 meeting. Guest speaker was Mrs. Add Lutz Ferguson, chairman for the School for Delinquent Girls.

Marvin Hurley, of the Houston Chamber of Commerce, spoke at the Sept. 9 meeting of the Traffic Club of Houston.

Mayor J. V. Russell, of Fort Lauderdale, was guest of honor at the Sept. 10 meeting of the Foreign Commerce Club of New York.

The Traffic Club of Chicago will observe its 50th Anniversary on Oct. 23 with a special program at the Palmer House.

Clarence D. Shepard, chief commissioner of the Board of Transport Commissioners for Canada, will speak at the Oct. 17 meeting of the Transportation Club of Toronto.

Milton D. Kramer, of Associated Transport, Inc., was principal speaker at the Sept. 9 meeting of the Philadelphia Chapter of Delta Nu Alpha.

(Resume Reading on Page 21)

Motor Carrier . . .

(Continued from Page 43)

212(b), which deals with transactions between small motor carriers operating less than a total of 20 vehicles or between a carrier and a noncarrier in which the transaction involves operating rights.

For transfers of operating rights under this section, the Commission has adopted certain rules and regulations. These do not require a hearing, and the applications are handled informally.

Applications of this type are handled by a three-member Motor Carrier Board composed of ICC staff members. Division 1 of the Commission serves as an appellate division on Motor Carrier Board appeals. The majority of transfers since the passage of the act has been under Section 212(b). From 1935 through June 30, 1955, there were 30,048 approved and 3,689 denied.

Section 5(2) of Part I of the Act applies to all consolidations, acquisitions, and mergers when a total of more than 20 vehicles is involved, and when there is a transfer of operating rights.

A proposed transfer of operating rights under Section 5 is required to be consistent with the public interest. Some of the broad considerations that the Commission examines to determine consistency with public interest are:

1. Adequacy of transportation service,
2. Economy and efficiency of operation, and
3. Best utilization of transportation facilities.

Frequently the degree of competition is involved. However, this factor is by no means controlling. It is only one element in the determination of consistency with the public interest.

Some 4,510 consolidation applications under Section 5 (including those under former Section 213) were approved from 1935 through 1955. During this period, 77 per cent of the consolidations and mergers under Section 5 were approved. About 89 per cent were approved under Section 212(b).

This is in contrast to 51 per cent approval of applications for extensions of existing authority or for new certificates and permits for the year Nov. 1, 1954 to Oct. 31, 1955.

From this it appears that it is easier to secure approval of a consolidation than to secure ap-

proval of new authority.

We can expect that consolidations of motor carriers will continue. Consolidation is advantageous not only to motor carriers, but also to shippers through improved service. More frequent schedules and direct single-line service may result from consolidation. More prompt settlement of claims and improvement in tracing shipments are other factors of improved service which often result. *

Reporting Traffic Function . . .

(Continued from Page 39)

The report must have some purpose. The purpose or purposes should be defined clearly before any report is attempted. Specific purposes follow:

1. To reflect current financial facts.
2. To compare various channels of proposed action.
3. To sell a new idea.
4. To analyze a management problem.
5. To estimate a future financial position, or budget.
6. To evaluate competence of personnel.
7. To forecast a future technical or economic position, such as new piggy-back service, or changes in rate levels.

Basic Considerations

In making a report, certain basic considerations must be satisfied. Without these, there is no point in making the report in the first place. Some of these considerations are listed below:

Editor's Note: The following list includes those companies surveyed by Mr. Todd:

Allied Chemical & Dye Corp., R. H. Foltz, assistant director of traffic, New York; Belknap Hardware and Mfg. Co., Richard A. Whitty, transportation director, Louisville; Corning Glass Works, John D. Mitchell, general traffic manager, Corning, N. Y.; Detroit Board of Commerce, Hugh Campbell, manager, Transportation Bureau, Detroit, Mich.; Drake, Startzman, Sheahan and Barclay, Neil Drake, partner, New York; E. J. duPont de Nemours & Co., Robert W. Marshall, director Traffic Department, Wilmington, Del.; The Firestone Tire & Rubber Co., R. W. Wettstyne, director of traffic, Akron, Ohio; Ford Motor Co., J. A. Wallace, director General Traffic Office, Dearborn, Mich.; General Foods Corp., Arthur C. Schier, vice president-traffic, White Plains, N. Y.; H. J. Heinz Co., J. B. Carnahan, traffic manager, Pittsburgh, Pa.

The Hoover Co., R. F. Miller, traffic manager, North Canton, Ohio; International Business Machines Corp., E. M. Maney, manager of traffic coordination, New York; Johnson & Johnson, Walter K. Cabot, general traffic manager, New Brunswick, N. J.; Kaiser Steel Corp., A. P. Heiner, vice president, traffic and public relations, Oakland, Calif.; Kennecott Copper Corp., R. E. Taylor, general traffic manager, New York; Koppers Co., Inc., James F. Haley, vice president and manager, traffic and transportation department, Pittsburgh, Pa.; Kraft Foods Co., Wm. H. Ott, general traffic manager, Chicago; S. S. Kresge Co., H. E. Chapman, general traffic manager, Detroit; Line Material Co., Harold T. Reed, director of transportation, Milwaukee, Wis.; Norton Co., J. D. Dawson, general traffic manager, Worcester, Mass.; Sears, Roebuck and Co., H. A. Nater, parent traffic manager, Chicago; Socony Mobil Oil Co., Inc., A. G. Anderson, general traffic manager, New York; Union Carbide Corp., Chas. H. Beard, general traffic manager, New York; United States Rubber Co., Ross W. Benington, general traffic manager, New York; United States Steel Corp., E. G. Plowman, vice president and general traffic manager, Pittsburgh; Westinghouse Electric Corp., C. D. Duffy, general traffic manager, Pittsburgh; F. W. Woolworth Co., G. W. Albertson, general traffic manager, New York.

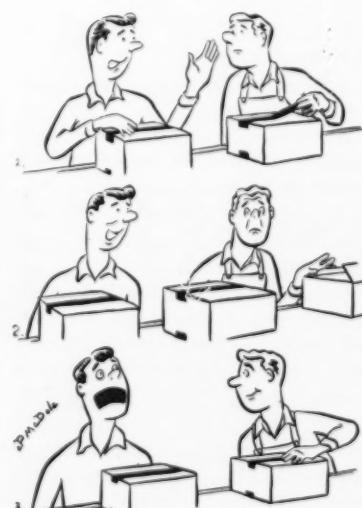

1. There must be a fact or series of facts, or an idea or series of ideas worth reporting. Without worthwhile facts or ideas, the report is meaningless.

2. The form, method, and timing of the report must be suited to the recipient's thinking and personality. This assures that the recipient will understand and appreciate the report. The reporter must know his audience as well as his subject. He must speak or write in a language familiar to the recipient. This principle often is overlooked by traffic people.

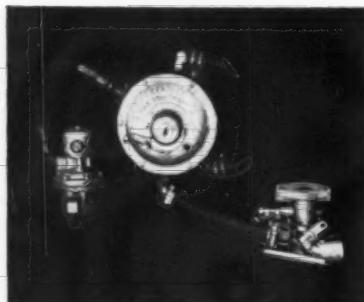

3. The report must contain some yardstick, or point of comparison or contrast. This device permits management to properly evaluate the report. Too often the writer knows his points of comparison, but forgets that the reader may not have the same basic point of reference.

Part II of the article, scheduled to appear in next month's issue of **DISTRIBUTION AGE**, will discuss the mechanical aspects of reporting, including report form, content, length, etc. It also will treat the philosophy of traffic management reporting, and include more details of the survey mentioned above. •

MCA to Conduct . . .

(Continued from Page 54)

the Commission for any action by the driver when operating under the authority of the carrier. No contract or arrangement between the carrier and the owner of the equipment or other carrier can relieve him of that responsibility," he said.

Taking part in a Shipper Relations Panel, Kenneth A. Nelson, of Greyvan Lines, reported that the average amount paid for shippers' claims by the moving industry in 1956 was \$47, an increase of \$5 over 1955. There was one claim for every three shipments, he said.

William Santini, of Santini Bros., another panel member, said the use of paraphernalia available to movers would tend to decrease the number and extent of claims. B. Leroy Burnham, of Burnham's Van Service, discussed the importance of trained personnel. Robert L. Hiner, of American Red Ball Transit Co., chairman of the Shipper Relations Committee, outlined the work of his group.

Transportation Changes

William J. Croul, president of the National Furniture Warehousemen's Association, called attention to the changes that are taking place in transportation. These, he said, point toward a greater integration of the various means of transit.

"In our own industry we have seen the need develop for combined van and sea movements to handle the effects of our military personnel to outlying territories which have now been extended to include Europe and the Far East."

"On the domestic scene," he continued, "we have seen agreements made between van lines and air lines, freight lines and air lines, and the so-called 'fishy-back' operation which combines highway and water transportation."

"The impact of all these changes within the transportation system will affect us all," the speaker said. "As warehousemen and buy-

ers of transportation, we must be alert to the best means of serving our shipping customers.

"As movers and suppliers of transportation we must be able to analyze what percentage of the traffic is going to be ours and to what extent it may be practical to have our operations coordinated with other forms of transportation," Croul said.

James D. Edgett, president of North American Van Lines; John Sloan Smith, president of Aero Mayflower Transit Co.; A. F. Schertzberg, of National Van Lines; and L. A. Larimore, executive vice president and general manager of United Van Lines, discussed what they saw for the industry in the future.

In a panel discussion on safety, Henry Retzer, of Bekins Van Lines, called on the organization's members to use good judgment and prevent the dispatching of defective equipment. Others discussing safety were Blanning; John Mikels, of United Van Lines; Andrew E. Bates, Dean Van Lines; Dale Johnson, of Lyon Van Lines; C. Richard Shirk, of North American Van Lines; and Ralph J. Magnus, chairman of the panel and chairman of the Conference Safety Committee. *

(Resume Reading on Page 54)

New Concept of Moving and Storage

A new concept of moving and storage using a specially designed van has been introduced by O. H. Frisbie Moving and Storage Co., Detroit. Household goods are moved and stored in sturdy dustproof boxes measuring 6 x 7 x 8 ft. Four of these vaults are carried in the 35-ft drop-frame van. The vehicle can be lowered as much as 3 in. to bring its floor even with docks of varying heights. Four curb-side doors permit speedy, efficient loading of the vaults. They are removed through a full rear door opening. To complete this system based on sealed vaults, Frisbie recently constructed a one-story warehouse with a 16-ft ceiling to permit double tiering.

DA Piggy-Back . . .

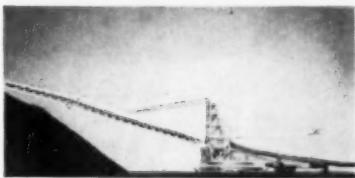

(Continued from Page 60)

tions for operating mechanical refrigeration.

Joint line service with motor common carriers is offered by five lines. This service brings TOFC to points not located along rail lines.

Most common type of piggy-

Conveyor Stacker

What is believed to be the world's largest traveling belt conveyor stacker is being erected by Link-Belt Co. at Hoy Lakes, Minn. This giant stacker, built for Erie Mining Co., is self-propelled and has a 275-ft radius boom. Its overall length, from tip of belt boom to end of counterweight boom, is 416 ft. When fully installed it will weigh 2,300,000 lb.

back is trailerload, in which one shipper uses all the space in a railroad-owned trailer. Some carry less-than-trailerloads.

Still to be settled in the piggy-back field are certain questions of concern to the TOFC user—common carriers and private truckers. At a recent Local Cartage National Conference in Chicago, Harry L. Grubbs, Jr., president of Jacobs Transfer Co., Inc., spotlighted this by calling for an investigation of contract provisions relating to contractual liability—"hold-harmless clauses"—and their relation to insurance policies.

This question is particularly important where motor carriers provide the tie-down service. He also cited the need for an investigation of liability when the trailer bears the motor carrier's name. •

Automatic Strap Recoil

Escort Appliance Trucks has announced a truck featuring a ratchet strap tightener and automatic strap recoil. Model MRT, magnesium, and Model SRT, steel, are equipped with an all steel ratchet which enables the

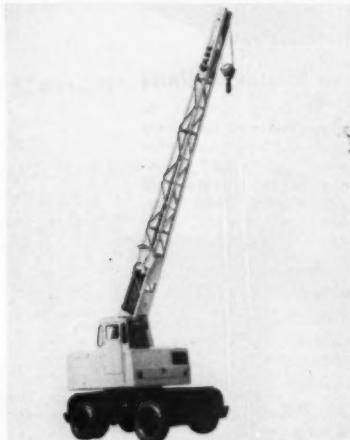

strap to be quickly and easily tightened around the appliances. When not in use, a spring activation automatically rewinds the strap, eliminating hand rewinding or having the strap drag along behind. The strap is kept completely out of the way at all times.

Circle 78 on Card Facing Page 51

Mobile Crane

A gasoline-electric, full-circle-slewing mobile crane has been announced by Coles Cranes, Inc. This crane has a maximum lifting capacity of 12

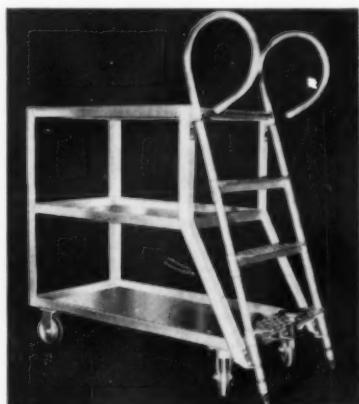

tons and has the ability to lift its maximum rate load throughout the full circle. It is powered with a gasoline engine which, in turn, drives a variable voltage DC generator which provides the power for the four separate motions.

Circle 79 on Card Facing Page 51

Stock-Picker Trucks

A new ladder-locking feature now is being incorporated into the stock-picker trucks of Rol-Away Truck Mfg. Co.

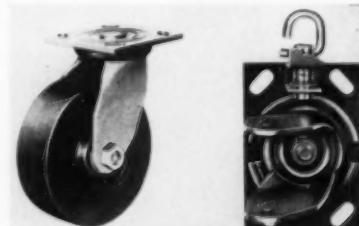

The ladder is depressed and locked into bearing position on the floor by use of a simple pedal on the bottom step. The truck is then stationary, permitting the operator to stand on the top of the truck for high reaches. The ladder has three steps instead of the two used on previous models.

Dimensions are: 43 1/2-in. high, 20-in. wide, and 50-in. overall height.

Circle 80 on Card Facing Page 51

Sealed Bearing Casters

A new line of heavy-duty sealed bearing casters featuring a four position swivel lock as optional equipment is announced by Colson Corp. Two load capacity ranges are available, 140-800 lb, and 590-1500 lb, in the new

series. Both series are available in rigid and swivel models. The swivel model includes a positive acting lock capable of holding the swivel rigidly in any of four positions, for temporary conversion into a rigid caster. The four slots are on the swivel race collar. It is easily disengaged by pulling out the full ring and rotating plunger to a notched seat on the retainer.

Tests for New Employees

A complete series of new employee aptitude tests for small businesses has just been published by Aptitests. These brief, practical tests permit smaller organizations to use the same professional approach to hiring and classifying employees as that used by large corporations. Developed by a staff of nationally known psychologists, the series covers tests for general mental ability, office arithmetic, general clerical, stenographic skill, mechanical adaptability, mechanical comprehension, sales aptitude, and personal adjustability.

Circle 114 on Card Facing Page 51

Flow Chart Bulletin

An aid to the man responsible for economical operation or any materials handling or storage system is a 10-page, two-color bulletin on how to find hidden costs that can be eliminated. This is based on a simple explanation of the fundamentals of flow and the recognized symbols for them. Included in the bulletin is a sample flow chart. The chart notes the men and equipment involved in a materials handling operation.

Circle 115 on Card Facing Page 51

Frozen Food Handling System

New methods of materials handling for frozen food warehouses and wholesale operations are described in a series of three folders published by The Rapids-Standard Co., Inc. The material includes ideas for increasing efficiency of handling frozen foods in receiving, storage, and order selection. New equipment designed to speed and simplify these operations is illustrated.

Circle 116 on Card Facing Page 51

Motor Truck Firm History

A 12-page, two-color illustrated booklet that recounts the 50-year history of International motor trucks has been produced by International Harvester Co. Entitled "50 Years of International Trucks, 1907-1957," it traces the progress of truck manufacture from the first high-wheeled, 20-hp IHC Auto Wagon built in 1907 down to the present day International operation.

Circle 117 on Card Facing Page 51

Lift Truck Brochure

The Buda Div. of Allis-Chalmers Mfg. has prepared a leaflet on its new 10,000-lb capacity lift truck. Specifications are listed for gasoline, LP-gas, and diesel power.

Circle 118 on Card Facing Page 51

Industrial Tire Guide

A 36-page illustrated guide that explains all phases of industrial tire use has been published by B. F. Goodrich Tire Co. In addition to specifications, the book describes the complete Goodrich line, use of each type industrial tire, variations in pneumatic tire capacities at various speeds, wheel and caster combinations, truck manufacturers' tire specifications, and how to change steel wheels to rubber-tired wheels.

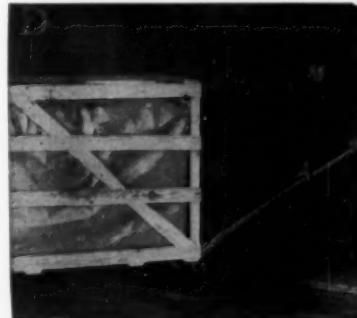

Circle 119 on Card Facing Page 51

Trucks and Attachments

The right truck and attachment for mechanical handling application is covered in a 12-page condensed guide of industrial trucks and attachments prepared by Hyster Co. The book covers Hyster's complete line of basic truck models. The lift truck line includes cushion-tired models from 3000 to 5000-lb capacity, pneumatic-tired units from 1000 to 20,000-lb capacity, crane trucks, straddle trucks, towing

WAREHOUSING

If the origin of a fire is unknown, can a warehouseman be held liable for loss?

A warehouseman has asked: "If stored goods are destroyed by fire, and no testimony is given as to the origin of the fire, is the warehouseman liable?"

Recently a higher court answered this question in the affirmative. In this case the warehouseman failed to prove that he exercised reasonable and ordinary care to safeguard the stored merchandise.

For illustration, in *W— Storage Co. v. M—*, 94 S. E. (2d) 37, it was shown that a bailor, named M—, stored his goods in a warehouse owned and operated by the *W— Storage Co.* The warehouse burned and destroyed M—'s merchandise.

The origin of the fire was unknown. The higher court held the warehouse company liable to M— for the full value of the destroyed merchandise. This court held that the warehouse company was liable because it failed to deliver on demand of M— the stored merchandise and, also, the warehouse company failed to prove that it had exercised ordinary care to prevent the loss, and other fire losses.

If the origin of a fire is unknown, can a warehouseman prove non-negligence?

More recently a higher court held that a warehouseman can avoid liability for destruction of stored goods by fire, if the testimony fails to show how the fire started and, also, that the warehouseman always had in the past exercised reasonable care to safeguard the warehouse premises against the hazard of fire.

For illustration, in *United States v. B—*, 232 Fed. (2d) 756, it was shown that a fire in a warehouse destroyed 1,549,000 lb. of tobacco.

The testimony showed that the warehouseman had stored the goods in a first class warehouse and there was no evidence that the fire resulted from negligence of the warehouseman or his employees. Furthermore, the warehouseman proved that his warehouse had been approved by the government and that regular periodic inspections were made of the warehouse premises; the warehouse was kept clean of trash and rubbish; the warehouse employees were continually on the watch for anything out of the ordinary.

What is the law on liability and the "fine print" clauses on warehouse contracts?

A higher court has held that a warehouseman's liability limitation printed in fine print on a storage receipt is valid only if the bailor's attention was directed to it by the warehouse bailee.

Ship Line President

James A. Ryder (left), president of Ryder System, Inc., has appointed Robert Leith (right) president of the newly formed Borinquen Steamship Co. The new company, to be based in Puerto Rico and serve the Miami, Jacksonville, and Savannah, is a subsidiary of Ryder

For example, in *R— v. S—*, 154 N. Y. S. 113, a fur coat worth \$975 was given by its owner to the warehouseman bailee for storage in a moth-proof vault. Eighteen days after the coat was received by the warehouseman bailee it was stolen. The bailee relied upon a fine printed notice in the receipt which stated that the bailee's liability was limited to the sum of \$124.50.

In subsequent litigation, the lower court held the bailee liable to the bailor for only \$124.50. The higher court reversed the verdict, saying that this limitation of liability is valid only if the testimony shows that attention of the bailor was directed to the fine print.

Is an agreement valid in which a warehouse seller promises not to establish a new business?

According to a late higher court decision, a person who sells his warehouse business and agrees to not enter into a competing business in the same county is bound by this.

For instance, in *M— v. M—*, 258 Pac. (2d) 40, the testimony showed that one W— entered into an agreement for the sale of his business to one K—. In this agreement W— promised that he would not thereafter re-engage in the same or a similar business in the county while K— operated the business. A written agreement later was executed by the parties, but it did not contain such restrictive clause. W— started a competing business. K— filed suit and asked the court to grant an injunction to prevent the seller from continuing the competing business because he had orally promised K— that he would not engage in a competing business in the same country.

It is interesting to observe that the higher court ordered W— to stop operating a business competing with the business being operated by K—, and said:

"The testimony established the fact that defendant (W—) agreed he

would never re-engage in a similar business in the county. Where the agreement for sale of the business was indeterminate upon length of time during which the seller would not re-engage in similar business in the county, the agreement would be construed to mean that the seller was prohibited from re-engaging in like business for so long as buyer (K—) carried on his business."

When a warehouseman purchases goods from a bailor storer, is the surety bond void?

Several months ago a higher court rendered a decision to the effect that a warehouseman's surety is not liable nor responsible for a warehouseman's failure to pay for merchandise which he purchased from a bailor.

For example, in *J— v. United States*, 298 Pac. (2d) 976, it was disclosed that the owner of merchandise stored it in a warehouse. Later the owner sold his stored merchandise to the warehouseman. When the warehouseman failed to pay the agreed purchase price for the merchandise, the bailor sued the warehouseman's surety.

The higher court refused to hold the surety liable saying that while a surety on a warehouseman's bond is liable for the warehouseman's failure to deliver the stored goods, the surety is not liable, for default, if a purchaser of the merchandise fails to make the agreed payments.

In other words, the court held that when the warehouseman purchases merchandise from the bailor after it is stored in the warehouse, the surety bond is void.

TRANSPORTATION

Who is liable for injury in accidents involving non-authorized truck drivers?

Recently a trucking official asked whether or not he is liable in damages for injuries caused by the driver of his motor truck, if the testimony shows that the driver was given permission by the regular driver to operate the truck.

Here is the law: If a person takes possession of a truck by force or stealth, and drives it without permission of the owner's regular driver, the employer is not liable for the driver's negligence. If the regular driver permits a new driver to operate the truck, even in violation of the employer's instructions, the employer is liable for negligence. In this case the new driver is considered merely an instrument in the hands of the regular driver.

For example, in *F— v. P— Transfer Co.*, 293 S. W. (2d) 170, it was shown that a truck driver for the

P— Transfer Co., without knowledge of his employer, permitted a friend to drive the truck. The friend seriously injured a pedestrian, who sued the P— Transfer Co. for heavy damages. The higher court held P— liable for \$60,000 damages, saying:

"If the friend had taken possession of the truck by force or stealth, and had been driving without the regular driver's permission, the employer would not be liable for negligence. But if the driver permitted his friend to operate the truck under his supervision, even in violation of the employer's instructions, the company is liable for the negligence."

Employers and unions are held to account for veiled statements in violation of labor laws.

Recently a higher court explained that the labor relations laws hold that a man is held to intend the foreseeable consequence of his conduct.

For example, in *National Labor Relations Board v. Oklahoma City General Drivers, Warehousemen and Helpers Local Union*, 235 Fed. (2d) 105, it was shown that a business agent of the union made certain statements to the effect that an employee, named C—, had been expelled from the union. Also, the testimony showed that the union, after expelling C— refused his tendered dues. This act caused the employer to unlawfully deny him employment. The higher court said:

Open Air Warehouse

Outside rim storage, made possible by the use of a protective coating known as Bond-A-Coat, has enabled the developer, the Metal Products Division of The Goodyear Tire & Rubber Co. to effect a considerable savings. Floor space which would be required for the inside storage of an equal quantity of finished rims now stacked out-of-doors would represent an investment of more than \$2 million. The finish is effective against the ravages of rust and corrosion. More than 50,000 rims are shown in this photograph of a portion of the four acres of black-top storage surface which surrounds the Metal Products plant in Akron, Ohio

"The single issue to be determined by us is, did the union, after expelling C— and refusing his tendered dues, cause the company to unlawfully deny him employment? We think that it did. Suffice it to say that the courts generally, in recent years, have held employers strictly to account on the one hand, and unions on the other, for veiled, oblique statements which would lead to a violation by both parties of the Act."

The higher court held further that both employers and unions are held strictly to account for veiled, oblique statements the foreseeable intent of which would lead to violation by both parties of Labor Relations Act.

Hence, an employer need not prove that a union's agent made direct threats or promises to an employer in order to establish violations by the union of the Labor Relations Act.

When injury results from equipment failure, is the owner held liable?

According to a late higher court decision the owner of a motor truck is liable for injuries to persons and property caused by his negligence in failing to repair known defects.

For example, in *K— Van & Storage Co. v. C—*, 801 Pac. (2d) 1015, the testimony showed facts, as follows:

A truck driver named C— was employed by the W— Transfer Co., hereinafter referred to as W—, which was not authorized to transfer goods in interstate commerce. The K— Van & Storage Co. was in the same business and was authorized to haul interstate.

One day K— Van & Storage Co. leased from W— a motor truck including the driver to handle a job. C—, the driver, was to obey instructions of K— Van & Storage Co. and was to receive payment from the shipper. Just prior to the trip, C— discovered that the brakes were not functioning properly. He reported to the K— Van & Storage Co. and told them about the defective brakes and suggested that they should be checked, but he was told to proceed on the trip. Later the brakes were checked and W— instructed C— to have the brakes repaired. A mechanic worked on the brakes and C— started on a two-mile down grade. C— was unable to control the truck and he was seriously injured.

In subsequent litigation the higher court held K— Van & Storage Co. liable, saying:

"The negligence is based upon the furnishing to the plaintiff (C—) of this vehicle containing a defective braking system and the failure of the defendant (K— Van & Storage Co.) to make a reasonable inspection and repair of the brakes. In the face

Warehouse Briefs

A new common motor carrier operation, **Thunderbird Transfer & Storage Co., Inc.**, has been established in Phoenix, Ariz. Officers are Fred R. Hurley, president; Randall Barton, vice president; and Marshall E. Nauman, secretary-treasurer and general manager. Thunderbird acquired the local cartage and storage business of Schade Transfer and Storage Co. Schade, as Schade Refrigerated Lines, Inc., will transport only perishables.

New members of the D. H. Overmyer Warehouse Sales Co. are: Vernon Distributing & Warehouse Co., Vernon, Calif.; Dalton Transfer & Storage Co., Albuquerque, N. M.; Milwaukee Terminal Warehouse, Milwaukee; Tillman Transfer & Storage, Tulsa, Okla.; Briggs Bonded Warehouse, High Point, N. C.; Ward Warehousing Corp., Altoona, Pa., and Spokane Warehouse & Storage Co., Spokane, Wash.

Allied Van Lines has announced a new air-van service for military personnel moving between the United States and Panama. Pan-American World Airways provides the air part of the service.

Affiliated Warehouse Co. has announced the following new members: Remy Moving & Storage Corp., Boston and Lynn, Mass.; Kencroft Warehouse, Buffalo; Edgar's Warehouses Inc., Detroit and Toledo; Tatum-Dalton Transfer Co., Greensboro; Houston Warehouse Service, Inc., Houston; Swift Line Transfer Co., Inc., and General Warehouse Corp., Jersey City; Transit Warehouse & Distributing Co., Inc., Joliet; Howard Terminal, Oakland and Sacramento, Calif.; Fazel's Seed & Storage Co., Perry, Iowa; Mid-Continent Terminal & Storage, Inc., Rock Island; Toronto Storage Co., Ltd., Toronto; and Colonial Warehouse & Distributing Co., Inc., Worcester.

Transit Warehouses Inc., of Kansas City, Kans., have leased three connecting buildings located at 45-

59-79 Ewing St. Total storage area of the company was increased by 177,000 sq ft by this lease. One of the buildings is brick and concrete while two are brick and mill construction.

Four moving firms have been named agents by North American Van Lines, Inc. They are: Meyers Transfer & Storage Co., Springfield, La.; G. & H. Transfer Co., Franklin, Pa.; Pruitt Transfer & Storage, Lebanon, Ore.; and Gabris Moving & Storage Co., Dayton, Ohio.

United Van Lines, Inc., has opened its Master Mover Award Program which will recognize drivers displaying outstanding proficiency.

New agencies appointed by Aero Mayflower Transit Co., Inc., are A. D. McMullen, Inc., of New Bedford, Mass.; City Pioneer Transfer and Storage Co., Seaside, Ore.; and Carolina Bonded Storage Co., Sumter, S. C.

Four movers have joined Allied Van Lines, Inc. They are: Miller Transfer & Storage Co., Cherokee, Iowa; L. Blanchette & Sons, Lewiston, Me.; Fred Qualls Storage Co., Pryor, Okla.; and Wright Truck Line, Stayton, Ore.

Des Moines Warehouse

White Line Transfer & Storage Co., Des Moines, recently completed new facilities for handling in-transit storage of merchandise. The warehouse contains 30,000 sq ft of space. The truck dock is at one end and a rail-road siding at the other.

Men in the Spotlight

William W. Bower—appointed sales representative for both Pinter Warehouse, Inc., and Pinter Bros., Inc., Deer Park, L. I., N. Y.

Mrs. Marion Barr—named to the special traffic staff of Dakota Transfer & Storage Co., Minneapolis.

Francis Habert—of Security Storage Co., Duluth, Minn., named driver-of-the-month for July by Allied Van Lines.

Dale Dimmitt—appointed to the post of general manager, Eck Miller Transfer Co.

Edward E. Breault—named general sales manager of Rex L. Hodges, Inc., Long Beach, Calif., warehouse.

W. Irving Moss, Jr.—elected president of the Midwest Cold Storage & Ice Corp., Kansas City, Kans.

Charles L. Pratt—of National Ice and Cold Storage Co., Sacramento, honored for fifty years' service with that company.

Alan W. Stewart—appointed assistant general manager for the Toledo branch. Samuel P. Murchison—named general manager for the Cleveland branch, D. H. Overmyer Warehouse Co.

Wesley E. Bourne, J. B. Craddock, Jr., and W. Frederick Petry—elected to the Board of Directors of Allied Van Lines.

Reed C. Smith—new manager of the Peoria Service Co., Peoria, Ill.

Raymond C. Ellis—elected to the Board of Directors of Fulton Market Cold Storage Co., Chicago.

—DA—

Michigan Warehousemen's Assn. recently elected the following officers: W. A. Rosie, United States Cold Storage Corp., president; Aaron Webster, Jefferson Terminal, vice president; C. S. Peltz, Central Detroit Warehouse, secretary-treasurer; and Dan Tindell, Detroit Refrigerating Co., assistant secretary-treasurer.

—DA—

Installment Payment Plan Asked In Van Line Petition to ICC

North American Van Lines, Inc., in a petition filed recently with the ICC, has asked approval of an installment plan for the payment of bills for moving service.

If approved, this will be the first plan of its kind. Under present regulations of the Commission, installment payment plans are not permissible.

by warehousing at NORTH DENVER!

Over 2,000,000 potential customers in all directions from Denver look to this city for their daily needs. Mr. Sales Manager. That alone points up the need to warehouse stock at NORTH DENVER. Ask your Traffic Manager...he knows NORTH DENVER offers over half a century of warehousing experience. And, while we've stored merchandise for others, we've gained our own store of valuable knowledge. It's yours for the asking. So, why not write us?

ALTOONA, PA.

William W. Ward
President

We proudly announce the opening
of our new modern all-purpose ware-
house here in the heart of the
Keystone State. Our aim is to give
the best possible service and this
aim is backed up by 25 years ex-
perience in the transportation field.

- Low insurance costs.
- 116,000 sq. feet all on one floor.
- Sprinklered and ADT protection.
- Facilities for handling truckload, carload,
and trailer-on-rail service
- 18' ceilings—No load limit.
- Daily delivery to Central Pennsylvania
points.
- 115,000 square feet of yard storage pro-
tected by Cyclone fencing.
- Heated—Fireproof.

**Public
warehousing is
profitable in**

PHILADELPHIA

Yes, we can prove to you that distribution through "Pennsylvania" is more flexible, efficient and economical than branch facilities. Here are 22 big, modern warehouses—strategically located to serve this key marketing area. Over 1,000,000 sq. ft. of free and bonded storage space; low insurance rates.

Workmen are careful and competent. Modern mechanized equipment moves the most difficult commodities safely and swiftly. Exceptional rail and highway facilities. One- to 10-ton trucks for fast store-door delivery. Write us today for full information about the money-saving advantages "Pennsylvania" offers you in Philadelphia.

RELAX...
let "Terminal"
take over your
distribution and
storage worries
in Philadelphia

You'll be amazed how "Terminal" can expedite your distribution in Philadelphia and the rich trading area surrounding it. Here you have not only eight huge, well-managed modern warehouses (over 1,600,000 sq. ft.), but also our big fleet of trucks for fast store-door delivery. Private siding connections with P.R.R. and the Reading, spacious truck docks. Mechanized handling by skilled personnel. U.S. Customs bonded space. Pool-car service. Storage-in-transit privileges. Here are all the facilities, services and experience you need for efficient, low-cost distribution in this region. Write us today about your problems and requirements.

Within the Law . . .

(Continued from Page 129)

of all the evidence it cannot be said that the defendants (K— Van & Storage Co.) either exercised reasonable care to furnish plaintiff (C—) with a reasonably safe vehicle with which to perform this work, or that they exercised the care of a reasonably prudent man in making such inspections as were necessary to maintain it in a reasonably safe condition or that this negligence was not the proximate cause of the plaintiff's injury."

Where does liability rest in accidents involving "on-loan" truck drivers?

A great deal of discussion has arisen from time to time over the legal question: If a motor vehicle driver is loaned by its owner to an

other, who is liable if the employee negligently effects an injury?

Recently a higher court laid down this law: "The question of who is the employer, and therefore responsible

for the negligent act of the employee, must be determinable by who at the time had the right to control the employee who caused the injury. To escape liability the original employer must resign full control of the employee to the person who uses the vehicle.

For example, in A— v. B—, 266 S. W. (2d) 556, it was shown that a truck driver named N— had an accident while driving a truck which was owned by one W—. N— ran through a stop sign and collided with a bus. A passenger on the bus was severely injured and sued both the bus company and N—'s employer for damages.

The higher court held the bus company not liable but held N—'s employer liable in \$10,000 damages to the injured bus passenger, and said: "Certainly, the evidence in this case was sufficient to show that defendant (dealer) had the right of direction and control over N—."

DENVER CHICAGO TRUCKING CO., INC.

THE ONLY COAST-TO-COAST CARRIER

DOCKER...THE LIFT TRUCK

THAT WORKS WHERE OTHERS CAN'T

*Shortest in its class...
unmatched for easy
maneuvering...and for
efficient low-cost operation*

This extra-compact, more maneuverable truck offers more advantages than any other of its type for materials handling in any industry. It is especially desirable where space is limited...works with ease inside trailers and in aisles, with or without pallet racks, too narrow for other similar trucks.

What's more, direct comparison shows clearly how definitely superior the DOCKER really is. Note the figures at right.

MAIL COUPON for complete specifications and FREE "COST-CUTTER" that shows how to chart and analyze your own materials handling needs.

CAPACITIES: 1000 to 4000 pounds
